Library Management Software Introduction

Library Management **Software** using is a web based application. Library management **Software** is a project which aims in developing a computerized system to maintain all the daily work of library .This project has many features which are generally not available in normal library management systems like facility of user login and a facility of admin login .It also has a facility of admin login through which the admin can monitor the whole system. It has also a facility where student after logging in their accounts can see list of books issued and its issue date and return date.

The application is reduced as much as possible to avoid errors while entering the data. It also provides error message while entering invalid data. No formal knowledge is needed for the user to use this system. Thus, by this all it proves it is user-friendly. Library Management **Software**, as described above, can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping. Thus, it will help organization in

Every organization, whether big or small, has challenges to overcome and managing the information of Books, Student, Librarian, Address, and Member. Every Library Management System has different Student needs; therefore, we design exclusive employee management systems that are adapted to your managerial requirements. This is designed to assist in strategic planning, and will help you ensure that your organization is equipped with the right level of information and details for your future goals. Also, for those busy executive who are always on the go, our systems come with remote access features, which will allow you to manage your workforce anytime, at all times better utilization of resources.

The Application includes:

- Admin Module
- Student Management Module
- Staff Management Module
- Catalog Management Module
- Barcode Management
- Search Facility
- Subscription Management
- Send Requisition

- Issuing Books
- Return Books
- Defaulter List
- Books Issue/Return Reports
- Export authors, publications, books, users and other reports data to pdf and excel file and also print
- Question Bank Management
- E-learning Management
- Authentication and Authorization

These systems will ultimately allow you to better manage resources

OBJECTIVES

The main objective of the Project on Library Management System is to manage the details of Student, Books, Issues, Librarian, and Member. It manages all the information about Student, Address of Member as well as Student. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build a web-based application program to reduce the manual work for managing the Student, Books, Address, and Issues. It tracks all the details about the Issues, Librarian, Member, etc.

1. The objectives of a library management system is to operate a library with efficiency and at reduced costs. The system being entirely automated streamlines all the tasks involved in operations of the library.

2. The activities of book purchasing, cataloging, indexing, circulation recording and stock checking are done by the software. Such software eliminates the need for repetitive manual work and minimizes the chances of errors.

3. The library management system software helps in reducing operational costs. Managing a library manually is labor intensive and an immense amount of paperwork is involved. An automated system reduces the need for manpower and stationery. This leads to lower operational costs.

Mobile No - +91 9439738900 / +91 9937698786
E-mail – shapeinfotech@gmail.com

4. The system saves time for both the user and the librarian. With just a click the user can search for the books available in the library. The librarian can answer queries with ease regarding the availability of books.

5. Adding, removing or editing the database is a simple process. Adding new members or cancelling existing memberships can be done with ease

6. Stock checking and verification of books in the library can be done within a few hours. The automated system saves a considerable amount of time as opposed to the manual system.

7. The library management system software makes the library a smart one by organizing the books systematically by author, title and subject. This enables users to search for books quickly and effortlessly.

8. Students need access to authentic information. An advanced organized library is an integral part of any educational institution.

9. In this digital age a web-based library management system would be ideal for students who can access the library's database on their smart phones.

10. The main objective of the Project of Library Management System is to manage the details of users as well as books.

11. It also manages all the information about Student, Address of Member as well as Student

12. Creating and managing user accounts, handling patron information, and providing authentication for library services.

13. Generating reports on library usage, circulation trends, and popular genres to aid decision-making.
