## INAUGURATION OF ECO-CLUB

**Organised by-Derabish College.**

**Supported by,Centre for Environ studies Forest & Environment Dept.Govt.of Odisha. Date-14'12'2021 At.10.30 AM.**

Meeting Proceeding-

Eco-Club has been constituted Under the supervision of Sri Gurucharan Sethi,H.O.D ,Sociology,Derabish College,Derabish,Kendrapara.

The aim of establishing the Eco-Club was to conserve the natural resources and the natural environment to create awareness of biodiversity conservation and local environment issues among students and to create a clean and green conciseness among students through various innovative methods.

Eco-Club plays an important role in creating environmental awareness among the future generation. The main motives of the Eco-Club is to nurture and teach the importance of environment studies.

Our vision

To be the best institution for protecting and creating environment awareness by educating the youth. Offering programmes and resources foe the students.

Objectives

To motivate the students to keep their surrounding green and clean by underraking plantation of trees.

To maintain cleanliness in and around the campus.

To educate students to create awareness amongst public to make grenary.

Major activities to be undertaken

The Eco Club along with NSS &YRC volunteers of the college does its best efforts for a green campus.

Principal
DERABISH COLLEGE

Organize seminars and special lectures on environmental issues in the college.

Campaign against banned carry bags, use of loud speaker.

Organize rallies ,marches, human chains at public places with a view to spread environment awareness.

Removal of waste plants and thorns bushes will be done by Eco Club with the help of NSS & YRC and other students from time to time .

Eco Club of college will organize actively participated in the Swachha Bharat programme at the community.

DERABISH KENDRAPARA

Meeting Proceeding-

Eco-Club has been constituted Under the supervision of Sri Gurucharan Sethi,H.O.D ,Sociology,Derabish College,Derabish,Kendrapara.

The aim of establishing the Eco-Club was to conserve the natural resources and the natural environment to create awareness of biodiversity conservation and local environment issues among students and to create a clean and green conciseness among students through various innovative methods.

Eco-Club plays an important role in creating environmental awareness among the future generation. The main motives of the Eco-Club is to nurture and teach the importance of environment studies.

Our vision

To be the best institution for protecting and creating environment awareness by educating the youth. Offering programmes and resources foe the students.

Objectives

To motivate the students to keep their surrounding green and clean by underraking plantation of trees.

To maintain cleanliness in and around the campus.

To educate students to create awareness amongst public to make grenary.

Major activities to be undertaken

The Eco Club along with NSS &YRC volunteers of the college does its best efforts for a green campus.

Principal
DERABISH COLLEGE

Organize seminars and special lectures on environmental issues in the college.

Campaign against banned carry bags, use of loud speaker.

Organize rallies ,marches, human chains at public places with a view to spread environment awareness.

Removal of waste plants and thorns bushes will be done by Eco Club with the help of NSS & YRC and other students from time to time .

Eco Club of college will organize actively participated in the Swachha Bharat programme at the community.

CONNEQT
BUSINESS SOLUTIONS LIMITED

DERABIS COLLEGE KENDRAPARA ESTD-1981 DERABIS

Date :21 October 2022

Pramodini Behera

Hyderabad

Hyderabad-000000

Sub: Employment Letter

Dear Pramodini,

With reference to your application and subsequent interactions we are pleased to offer you an Employment as **CCE** in the **Operations** with **CONNEQT Business Solutions Limited** (The Company) with effect from **20 October 2022** on the following terms and conditions.

You will be paid an Annual Gross Salary of INR. **158680.00** In addition to the above, you will be covered under PF, ESI, Bonus, Gratuity etc., if applicable as per law. Based on the present applicability your annual CTC would be Rs **192696.0** This may undergo change in view of the changes in the laws. Detailed break-up of the monthly and annual CTC is annexed to this letter as annexure A

Please note that the information pertaining to remuneration and benefits payable to you is CONFIDENTIAL and should not be shared with anyone other than the authorized representative(s) of the Company.

The above mentioned offer shall be valid if you join us on **20 October 2022**.Should you have any further queries, please feel free to contact our Recruitment Team.

You will initially be posted at our **Hyderabad(B)** Office. The Company may transfer your services to any of the existing office (s)/ department(s) / division(s) / Section(s) / establishment(s) of the Company including any of its subsidiaries / holding / associate company or that may come into existence in the future in India or abroad. Your transfer shall be governed by the Company's Transfer Policy and Regulations, as may be in force from time to time.

You will be working on flexible timings as may be decided by the Company.

Your joining shall be subject to submission of copies of testimonials (originals to be presented):

1. Academic qualification certificates (Matriculation onwards) including proof of date of birth and professional proficiency certificates, where applicable

2. Experience certificate(s), Relieving letter/ Clearance certificate, from your previous employer(s), as applicable. (Relieving letter is a must)

3. PAN Card and Aadhar Card

4. Cancelled Cheque

You will be on probation for a period of six months from the date of your joining the Company, post which you will be deemed confirmed unless you receive an extension of probation in writing. During Probation period your notice period would be for **15** days prior notice by either side.
Upon completion of Probation period; your employment with the Company can be terminated upon 30 Days prior notice by either side. However, the Company reserves the right to, at its sole discretion; substitute the **30** days prior notice by paying you salary for **30** days in lieu thereof. Though if not certified during the training period the company has the complete rights to terminate the employment without any prior notice. Your termination/ resignation letter,(by whatever name called) will be accepted by the Company only on your satisfying the **30** days notice period as stated in this Clause. Further, till such time as the Company accepts your separation & relieves you of the responsibilities, you will be deemed to be an employee of the Company and the terms and conditions of your employment shall continue to bind you.

In the event of separation, for any reason whatsoever, within a period of 12 months from your date of joining, all expenses incurred by company or reimbursed to you upon joining/ in connection with your joining shall be recovered from you. The company also reserves the right to recover the training expenses incurred.

This overrides all verbal commitments made. Please sign and return the duplicate copy of this letter in token of your acceptance of the terms described in this letter.

Looking forward to a mutually beneficial association.

Welcome once again and wishing you the best time ahead!!!

## Terms and Conditions of Employment

This appointment is subject to your not being a partner or relative of a Director of the Company within the meaning of Section 314 of the Indian Companies Act, 1956. Should any such relationship exist, you will bring forth the same to our notice immediately and we shall intimate to you the necessary approvals/ permissions required for your employment. In such an event you will be able to join the company only after all permissions/ approvals are obtained.

As an employee, you will be privy to sensitive and commercially valuable information concerning company and business. Such information is deemed to be the property of the company, and must not be disclosed during or after this employment to any third party without prior written consent of the company. Hereby, you undertake to indemnify the company and its affiliates from any loss or damage arising from any breach of this undertaking.

You are forbidden to engage yourself in any other trade, or profession directly or indirectly and whether for gainful purpose or otherwise. Should you wish to pursue academic advancement, you will have to obtain a written permission for the same and ordinarily it shall be allowed provided it does not adversely affect your work-place responsibilities/ discharge of duties.

Please note that in the event of misconduct on your part, including but not limited to absenting yourself without prior sanctioned leave or harassment (sexual or otherwise) meted out to any other employee, the company may terminate your employment Please note that if the employment is terminated on account of disciplinary action against you, the clause relating to 30 Days' notice period is not applicable.

During the period of your employment inventions, creations, discoveries, patents, copyrights, shall become the property of the Company. You will not have any right to claim the ownership of it and assign the same to the Company.

Your appointment is contingent upon successful completion of Background verification. The background checks are not restricted to education and employment but to all aspects as per the appropriate selection procedure. Please note that furnishing of false information or suppressing any facts is a disqualification for employment in this Company. Should such an act come to our notice at any time during the period of your employment in the Company, your services will be liable to be terminated with immediate effect.

You will superannuate from the services of the company on attaining the age of 58 years without any notice whatsoever from the company in this behalf.

The above-mentioned does not purport to be exhaustive employment terms. You will be governed by the rules and regulations laid by the company from time to time. The afore mentioned terms and other rules & regulations shall remain current and binding until you are separated from the Company by way of a written agreement/ letter issued to you.

This overrides all verbal commitments made. Please sign and return the duplicate copy of this letter in token of your acceptance of the terms described in this letter. Should there be any dispute with regard to the terms stipulated herein, the same shall be resolved in accordance with the laws of India and any dispute/ reference to this shall be dealt at Hyderabad (Telangana) under the exclusive jurisdiction of the Courts of India.

I have read through the above terms and conditions of employment and hereby accept.

## LETTER OF CONTRACT EMPLOYMENT

**Ref: HEC/KUAKHIA/2022/077** **Date: 06/08/2022**

DERABISH COLLEGE KENDRAPARA ESTD-1981 DERABISH

To

NAME: SMITA RANI OJHA
FATHER: SURESH CHANDRA OJHA
AT-DUMUKAHAT, PO-DERABISH, DIST-KENDRAPARA, PIN-754289
MOB-7853879918

Dear MISS. SMITA RANI
With reference to your application and the subsequent interview you had with us, we are pleased to appoint you for the post of **'Data operator'** to join with **M/s Hindustan Engineering Corporation.** Your appointment is on Contract basis with effect from 06/08/2022.

**DEPUTATION:**

You will be deployed under our client TPNODL (TP Northern Odisha Distribution Ltd.) as **'Data operator'** at KUAKHIA Division, Odisha. However, your Services are transferable to any other place in the Country or to any Client/ Associate / Sister Concern or its Subsidiary.

**COMMENCEMENT OF EMPLOYMENT:**

- That your appointment is purely temporary in nature connected with jobs against RC No. 6200001710 entrusted to us by the client, refer to satisfactory performance of three months (Probation Period), during which the same is subject to termination at any time without any prior notice.
- Subsequent to the RC / Job Contract, your appointment in the normal course shall stand terminated w.e.f. Dt. 31.05.2024 or may be extended as per conditions of the client.

**COMPENSATION AND BENEFITS:**

- That you will be paid the minimum wages as per the Govt. notification and governed under the various applicable laws for our organization from time to time. Gross wages breakup and allowances are available in **Annexure I.**
- You will be covered under the statute benefit of EPF & ESI as per norms and employee's contribution of PF & ESI will be recovered from your gross wages for deposition to statutory authority.
- You will be entitled for Leaves and Holidays as per the Company guidelines.

Principal
Derabish College, Derabish
Kendrapara

**NATURE OF DUTIES:**

contrary to any of the above mentioned clauses shall render the contract liable for termination with immediate effect, not withstanding any other terms and conditions of the assignment.

Your appointment is based on the information provided by you. If any information given by you to the company proves to be false or if you are found to have suppresser any material information, in such an event, your services will be liable for termination with immediate effect, not withstanding any other terms and conditions of the employment.

DERABISH COLLEGE KENDRAPARA ESTD-1981 DERABIS

Here's wishing you the very best in your assignment with us.

Yours Sincerely,

**For Hindustan Engineering Corporation**

HINDUSTHAN ENGINEERING CORPORATION HEC JAJPUR

**Authorized Signatory**

I have read and understood the above mentioned terms and conditions of the Contract. I voluntarily accept the same and I shall abide to the terms and conditions mentioned therein and any amendments from time to time.

All the above mentioned terms and conditions will come in force from your date of joining, in case of no acceptance received before the first salary it would be deemed as acknowledged and accepted by you on receipt of your first salary.

DERABIS COLLEGE KENDRAPARA ESTD-1981 DERABIS

V. Habitual breach of any law applicable to work site or any rule made there under.
VI. Arranging meetings within the premises without prior permission from employer.
VII. Violations of safety provisions / regulations applicable.
VIII. Habitual late attendance (continued late attendance for 15 days shall be treated as habitual late attendance).
IX. Consumption of alcohol/drugs or gambling on duty.
X. Habitual negligence on work site or willful damage to work in progress.
XI. Threatening, abusing, or assaulting any superior, co-worker or consumer.
XII. Habitual absence without leave application for more than 5 (five) consecutive days or over staying the sanctioned leave without sufficient ground or satisfactory explanation.
XIII. Found guilty on our enquiry for misconduct or any illegal activities may be punished with warning, fine and suspension for a period of 7 (seven) days without wages or dismissal as applicable.

**ABANDONMENT:**

Absence from work for a continuous period of Seven days (including absence from work against leave thought applied for but not granted) or when overstayed for a period of seven days after expiry of sanctioned leave, will make you lose your lien on the job and your service shall automatically come to an end without any notice or information.

**SECRECY &CONFIDENTIALITY:**

You shall not divulge, communicate or pass any information in any form, related to any aspect of the company to anyone outside the company. Your individual remuneration is purely a matter between you and the company and arrived at on the basis of specific background and professional merit. We expect you to maintain this information and any changes in it, as personal and confidential.

**PROFESSIONAL ETHICS:**

You shall not conduct yourself in any manner amounting to breach of confidence or inconsistent with the position of responsibility occupied by you. You are expected to deal with the company's money, material and documents with utmost honesty and professional ethics. You will be required to demonstrate sincerity in your effort in any task assigned to you by the organization.

**COMPANY PROPERTY:**

You will always maintain the Company/Client property in good condition, which may be entrusted to you for official use during the course of your employment and shall return all such property to the Company/Client prior to relinquishment of your charge, failing which the cost of the same will be recovered from you by the Company.

**COMPANY POLICIES:**

You will be governed by the company's policies on office timings, leave, travel, transfer, misconduct etc., presently in force or introduced / amended from time to time. Kindly note that any action of yours,

Principal

# BUDDHIST HERITAGE

## BUDDHIST CIRCUIT, LALITGIRI, UDAYAGIRI, RATNAGIRI, LANGUDIGIRI AND OTHER SITES - AN EXPLORATION & FIELD STUDY.

DR Harish Chandra Prusty
M.A. Ph.D. D.Litt.
HISTORIAN & BUDDHIST RESEARCHER.

Situated in between latitude 20°-51' North and longitude 86°-21' East, adjacent to the holiest river Vaitarani and within Buddha-Kharasrota- Brahmani- Birupa- Gobari river- valley, the ancient land of puranic and historic Vaitarani Tirtha-Viraja Kshetra – Nabhi-Gaya – Jajpur with an approximate estimated circuit of Pancha- Kosi i.e 15 kilometres, has been sanctified as an earliest ever Pitri Tirtha and Sakta Peetha antiquities which may be contemporaneous as the age of Mahabharat. (5000 B.C). The name of this holiest Vaitarani *tirtha* and the foremost Sakta Srine- "Virja- kshetra -Jajpur" has already been depicted in the Vana Parva of great epic Mahabharata. The same Vana Parva has also delineated the ongoing pristine river Vaitarani as the demar -cated northern-extreme boundary (geographical) of the then ancient Kalinga. The sacred versions of Mahabharata run as follows;

*"Tato Vaitarani gachhet Sarva -Papa Pramochanim /*
*Viraja Khetra Masadya Virajate yatha Sasi*[1]
X X X X X
Again:- *Eteh Kalingah Kounteya Jatra*
*Vaitarani nadee/ Jatrajajat dha-*
*Rmopi Deba chharana meta bai"*[2]

Here it is noteworthy to state that on the basis of an intensive exploratory field study, survey and research, the modern district of Jajpur (earlier in the undivided Cuttack district, Orissa) has archaeologically been vouchsafed to be an unprecedented meeting ground of almost all the divergent religious sects and denominations i.e *sarva dharma samannvaya peetha* such as Buddhism, Jainism, Saivism, Saktism, Vaishnavism, Nathism, Sourism, Gana-Patya, Naga, Mahima cult, Islamism and Christianity, even unpanalleled in India. In fact, the assemblage of all those above mentioned religious Srines, sites and monuments in every nook and corners of entire Jajpur district satisfactorily bears the vestiges to the above noted anecdote.

However, the most popular and predominant, secular and all-pervading undying Buddhist heritage of Jajpur is particularly arresting. The amazing discovery of hundreds of Buddhist

Principal

The inner part of the drum above the podium is in the shape of a wheel, with a central solid hub twelve spokes and an outer rim. The stupa is surrounded by numerous votive stupas made of either brick or stone of various sizes. These votive stupas in Ratnagiri occupy a special place among the Buddhist vestiges of the site. As many as seven hundred votive stupas have been discovered during the course of the excavation. Most of these monolithic stupas made of chlorite or khondalite stone have niches in the drum carved with images of Buddha, Dhyani Buddha, Tara, Lokesvara, Aparajita, Vajra Tara, Heruka, Taraodbhava-kurukulla, Marichi, Chunda and other deities of the Vajrayana pantheon.

# ACKNOWLEDGEMENT

First and foremost, i thank the *Almighty* for bestowing me with a good health and confidence to compete the work in time.

I am express my deep sense of gratitude and indepted to my estimate guide *Mrs. Subhasini Mishra lecture of dept. of* Botany *Debasish Degree College, Derabish, Kendrapada* for the proficient guidance, kind co -operation and moral support to complete this work in time.

I extend much beholden and my special thanks to *Dr. Debabrata Nayak, principal , Derabish Degree College, Derabish, Kendrapada* for giving me this opportunity.

I also oblige to *Miss. Tapaswani Ratha Demonstrator of Dept. of Botany, Derabish Degree College, Derabish, Kendrapada* for her nobel guidance, Valuable suggestion for my achievement.

I am also acknowledge with a deep sence of reverence, my gratitude towards my **parents and family members** who have always supported me morally as well as financially.

At last but not the least I also very much thankful to all of my *friends* who directly or indirectly helped me in complete this project.

Date : 13.05.2023

## SYNOPSIS

As we know plants and their products are very useful for living beings. They can be used as edible purposes and other economic uese. Hence here in the project we introduce some of these important plants which are easily availlable to our locality and have some salient properties by which, most commonly food, identified diseases. Here we represent all the plants individually with their classification, description, uses by which any one can easily identity the plants and will use it as they required.

Principal
DERABISH COLLEGE

# METHODOLOGY

## Study Area

The Ethnobotanical study was carried out for one month in the locality of Jahangar and near by Jahangar of Kendrapada district. Different medicinal plants were collected from different please along with the data of medicinal value from the local people.

## Equipments Used

Following equipments were used while understanding field survey as well as in laboratory.

* Field note book
* Digital positioning system
* Pocket lens
* Binoculars
* Plant cultures
* Polythene bags for specimen
* Old news paper
* Plant press
* Alcohol and mercuric chloride
* Flora and plant guide book for reference

# INTRODUCTION

DERABIS COLLEGE KENDRAPARA ESTD-1981 DERABIS

Plants are their secondary metabolite constituents have a long history of use in morden western medicine and in certain systems of traditional medicine and are the sources of important drugs such as atropine ,codine , dioxin, morphine, quinine and vincristine use of herbal medicines in developed countries have expanded sharply in the half of twentieth century monographs on selected herbs are avelable from a number of sources including the European cooperative on photo therapy (Escop 1999) . German commission (Blumenthal etal.1998) and world health Organization (WHO, 1999) . The WHO monographs for example, describe the herb itself by a number of criteria (including synopsis and vernacular names) and the herb part commonly used. Its geographical distribution, tests used to identify and characterize the herb (including macroscopic and microscopic examination and purity testing), the active principles (when known) , dosage from dosing, medicinal uses, pharmacology, contra-indication and adverse reactions other, resources that provide detail information about herbal products in current use including the Natural Medicines Comprehensive Database (jellin,2002) and NAPRALERT (Natural Products ALERT, 2001)information other avelable database has been published by Bhatt(1995) .

From time immemorial mankind is using plants, plant parts and its product for healthing different human aliments in this morden age also. It is being rampantly used by the under privileged and lible people all over the world knowledge regarding the therapeutic use of plants is passed from generation to generation. Documentation of such information is scantly, which is highly essential for listing the efficacy and future purification of it by the pharmaceutical industry. Moreover, these herbal products are more safe and human friendly as compaired to the artificial synthetic medicines. In India more than 43% of the total flowering plants are reported to be of medicinal importance (Pusphangarden,1995) . It has been reported country like USA 50% of the best prescribed drugs are based on natural products harvested from tropical region to Africa, Asia and Latin America.

PRINCIPAL DERABIS COLLEGE

Till now nearly 8000 species of plant having ethnobotanical importance have been recognized (anno,1994) .

Odisha is one of the tribal dominated states of India. As many as 62 different tribes consituting 22.6% of total state population are reported to be inhabit in different geographical pockets of state. They mostly depend on herbal products as medicine.

Various indigenous plants are being used in the diagnosis and the prevention of some disease. Plants have been the major sources of medicine in cultures from ancient times in tradition system for eliminations of physical menial or social imbalance . In India drugs of herbal medicine have been used in tradition system of medicines such as unain and Ayurvedic since ancient times.

The medical use of plants is very old. The writing indicates that the therapeutic use of plant is very old as 4000-5000 B.C and Chinese used first the natural herbal preparations as medicines. In India however, earliest references of use of plants as medicines appear in Rigveda which is said to be written 1600-3500 B.C.

The ethnobotany provides a rich resources of natural drug research and development. Medicinal plants have been a part of morden life style of a man and these plants are a source of important therapeutic aid for push away human ailments. Most of medicinal plants even today are collected from wild. The continued commercial exploitation of these plants has resulted in depletion of their population from natural habitat. Consequently cultivation of these plants are urgently needed to ensure their availability to the industry as well as to people associated with traditional system of medicines.

# AIM AND OBJECTIVES

DERABIS COLLEGE
KENDRAPARA
ESTD-1981
DERABIS

* To identify the medicinal plants and determine their present status and strategies for the conservation.
* The popularize the use of medicinal plants in preparing very low cost medicines so that the weaker section of the society can avail these medicine paying very low price.
* To impart knowledge to the society for the present and also for our future generation.
* To record and enumerate the available medicinal plants present in the study area.
* To gather ethnobotanical information from the local ethnic groups including the tribal populace of this region.
* To determine the interference of various biotic factors for the loss of biodiversity in this region.
* To promote ecotourism in this region.

# LITERATURE REVIEW

The term ethnobotany was used for first time by Harshberger in 1895 . He defined ethnobotany as the use of plants by aboriginal peoples yet during the century which has intervened, considerable attention has focused not only on how plants are used, but also on how they are perceive and managed, and on the reciprocal relationship between human societies and the plants on which they depend.

The study of folklore medicine fall with in the discipline of ethnobotany. The term folklore medicine refers to healing practices and ideas of body physiology and health preservation know to a limited segment of the population in a culture, transmitted informally as general knowledge and practiced or applied by anyone in culture having periour experience. Their is a world wide interest in folklore medicine is taken to mean knowledge and practice that have survived through only tradition in certain human societies. Particularly among the primitive and rural societies much of traditional medicine, today has its origins in early discoveries. Tribal and rural societies today have inherited ancient knowledge through oral folklore, and some still depend totally or largely on this knowledge and the practices based on it. Many renowned drugs of today would have gone into wider use decades ago if the folklore and traditions of tribal people concerning certain plants had been taken seriously.

Indigenous knowledge refers to the accumulation of knowledge, rule, standards, skill and mental set which are possessed by local people in a particular area. It is the results of many generations long years experience, carefully observations and trial and error experiments, traditional people around the process unique knowledge of plant resources on which they depend for food, medicine and general utility including tremendous botanical expertise. Over centuries, indigenous people of different locality have developed their own specific knowledge on plant resources use, management and conservation.

PRINCIPAL
DERABISH COLLEGE

Systemic application of indigenous knowledge is important for sustainable use of resources and sustainable development. Various animals and mineral products contribute to human Wellfare, the plant kingdom is most essential to human wellbeing especially in supplying basic needs. Since ancient times, human being have been using plants for the purpose of diseases control and prevention. It was belived to be the results of many generation long years experience. Careful observation and trial error experiments that early human acquired the knowledge on the utilization of plants for disease prevention and curative purpose. So, the knowledge and application of traditional medicine is one of the wildly used indigenous knowledge systems.

According to Fassilkibebew (2001) , about 75-90% of the rural populations in developing countries (for instant ,80% of the population in Africa) primarily rely on traditional medicinal plants for their health care. In Northern Ethiopia, the major portion of the parts used in traditional medicine come from plant sources, while animal parts and minerals contribute only a small supply . More than 35,000 plant species are being used around the world for medicinal purposes and in Ethiopia there are 800 or more plant species employed as medicinal agents, which according to the database or the National Herbarium has grown to 1000 and more will be added to the list as new studies bring as new medicinal plant from various cultures.

Traditional medicine remains the main resource for a large majority (80%) of the people in Ethiopia to treat their illnesses and veterinary diseases and maintain their health and a traditional medical consultancy including the consumption of the medicinal plants has a much lower cost than morden medical attention. However, this is not only because of poverty where people cannot afford to buy expensive morden drugs, but traditional system are also more culturally acceptable and meet the psychological need. so, medicinal plants are the main sources of traditional medicine for the rural population and are of high demand in the health care systems of this population when compared to morden medicine.

# ANALYSIS

## PLANT1- Azadirachta *indica*

### SYSTEMATIC POSITION

Kingdom-Plantae
Division-Magnoliophyta
Class-Magnoliopsida
Order-Sapindales
Family-Meliaceae
Genus-Azadirachta
Species-A. indica
Vernacular name-Neem

### DESCRIPTION

Neem is the fast-growing tree that can reach a height of 15-20m, rarely to 35-40m. It is evergreen, but in severe drought it may shed most or nearly all of its leaves . The branches are wide spread. It blossoms in spring with the small white flower. It has a straight trunk. Its bark is hard rough and scaly, fissured even in small trees. The color of the bark is brown grayish. The leaves are alternate and cinsist of several leaflets with serrate edges, Its flowers are small and white in color. The olive like edible fruit is oval, round and thin skinned.

### MEDICINAL VALUE

Neem inhibits allergic reactions when applied externally or eaten. Oral doses of neem leaf extracts. It reduced insulin requirements by between 30% and 50% of diabetes. Neem extracts gives significant protection from discomfort and speed the healing of gastric problems. Neem quickly kills external parasites and a neem decoction is safer and just as effective as standard treatments for lice and scabies. Neem products are believed by Ayurvedic practitioners to be, antifungal, antibacterial and antiviral. Neem oil is also used for healthy hair to improve liver function, detoxify the blood. Neem extracts have also used in cosmetics repellants soap and lubricants. It purifies blood. Beneficial in treating Acne and other skin disorder. It boost immune function. It is lower risk of cancer and cardiovascular disease.

PRINCIPAL DERABISH COLLEGE

## PLANT 2- Aloe vera

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Magnoliophyta
Class - Liliopsida
Order - Liliales
Family - Aloaceae
Genus - Aloe
Species - A. vera
Vernacular name-Aloe vera

### DESCRIPTION

Aloe vera is a short stemmed shrubby aloe, frequently suckering and forming dense clumps. The leaves are greyish green, growing to about 50cm long, with margins that are pinkish with many small spines. The leaf surface are sometimes marked with white flecks or spots. The leaf surface are sometimes marked with white flecks or sports .

### MEDICINAL VALUE

Aloevera is fairly well known herbal preparations with a long history of use. It is widely used in morden herbal practice and is often avelable in properties herbal preparations. Different parts of the plant are used for different effects on the body and aloevera has both internal and external applications. It is good to drink aloevera juice (the inner gel of the aloe plant) almost aloin free and even add it to smoothie to gain some of the benefits of the incredible plants. Aloe vera contains over 200 active components including vitamins, minerals, amino acids, enzymes, Polysaccaharide, and fatty acids-no wonder it's used for such a wide range of medicines, it acts as natural fighter against all sorts of infection, an efficient anti-oxidant, help in treating all digestion related problems, heartburn, arthritis, stress, diabetes, rheumatism pain, asthma, cancer, ADIS. It also acts as a laxative, beauty enhancer and studies have shown that it has an effect on lowering blood sugar levels in diabetes.

## PLANT 3- *Bryophyllum pinnatum*

### SYSTEMATIC POSITION

kingdom - Plantae
Division - Spermatophyta
Class - Magnoli
Order - Rosidae
Family - Crassulaceae
Genus - Bryophyllum
Species - pinnatum
Vernacular name-Amarpoi

### DESCRIPTION

It is a fleshy upright plant usually growing 60-120 cm tall. Its relatively broad leaves have scalloped margins and are oppositely arranged. These leaves may be simple or compound, with three or five leaflets. Its drooping bell-shaped flowers are greenish-yellow to pinkish-red in color.

### MEDICINAL VALUE

Bryophyllum pinnatum is commonly known as Amarpoi in India traditional system of medicine which implies its stone breaking property. The leaves of the plant are widely used by tribal and other population for treatment of stones. Despite its wide traditional use, the scientific studies are limited to delineate its antilithiatic effect. The present study was undertaken to substantiate the ethnomedicinal use of leaves of Bryophyllum pinnatum in kidney stones and urinary insufficiency in traditional practice. The present investigation showed amelibrative effect of alcoholic and hydro-alcoholic extracts of Bryophyllum pinnatum by preventing EG-induced alterations in body weight, urine and serum biochemical parameters oxidative stress and histology of kidney. The root is used to treat high blood pressure and also any kind of cardiac problem. The leaf is used for treatment of fever. The extract of the plant is used for the treatment of roundworms. Using the juice of this plant as ear drop heal ear pain. The root is believed to protect the liver and has proven to be useful for the treatment of hepatitis.

## PLANT 4- Ocimum sanctum

### SYSTEMIC POSITION

Kingdom - Plantae
Division - Magnoliophyta
Class - Magnoliopsida
Order - Lamiales
Family - Lamiaceae
Genus - Osimum
Species - O.sanctum
Vernacular name-Tulsi

### DESCRIPTION

The Holy basil plant is a small annual or short-lived perennial shrub, up to 1m.(3.3feet) in height. The stems are hairy and bear simple toothed or entire leaves oppositely along the stem. The fragrant leaves are green or purple, depending on the variety. The small purple or white tubular flowers have green or purple sepals and are brone in terminal spikes. The fruit are nutlets and produce numerous seeds.

### MEDICINAL VALUE

Tulsi is a super skin toner for oily ance prone skin, removes excess oil and balance the skin ph. It is a skin tonic that can fight skin against disease like ringworm, ance, enczema and other infection. Ease from dandruff, itch, and control hair fall. It promote wellness, balance metabolic activities, protect against harmful chemicals. It is used in cold and cough to ease a sore throat. It helps overcome fatigue, stress, anxiety and depression. Tulsi leaves left in boiled water overnight can be used to wash eyes. It reduce strain on eyes and makes them feel relaxed. Tulsi can help cure fever. Tulsi is used to treat insect bites . Tulsi is also used to treat heart disease. Tulsi helps in treating Asthma. A tulsi drink after a tiring day at work can be revitalising and help to relieve stress and fatigue. Similarly, a tulsi drink during prolonged hours of study can also help to enhance concentration for student. It also reduce swelling or resultant irritation to a great extent.

# PLANT 5- Aegle marmelos

## SCIENTIFIC NAME

Kingdom - Plantae
Division - Magnoliophyta
Class - Magnoliopsida
Order - Spindales
Family - Rutaceae
Genus - Aegel
Species - A. marmelos
Vernacular name-Bael tree

## DESCRIPTION

The slow growing tree bears strong spines and alter compound leaves with three leaflets. The sweet-scented white flowers are brone in panicle culsters and are sometimes used in perfume. The fruit is pyriform to oblong in shape and 2-25 inches in diameter. It has very hard Woody gray or yellow rind and sweet, thick orange-colored pulp.

## MEDICINAL VALUE

Bael is known to act as a tonic for heart and brain. It is also gut-friendly and has been traditional used to cure Constipation, diarrhea, diabetes and other conditions. Extract of leaves are efficient to treat ulcer, abscess, backache, vomiting, cuts, weakness of heart, acute bronchitis, blood sugar, beri-beri etc. Medicated oil prepared from leaves of the plant not only helps to prevent cold, cough and other respiratory aliments but it is also a good hair tonic when mixed with cumin seed and massaged on the scalp. Leves are also used as a veterinary medicine for wound and fooder for animals and stimulations of denervated nictitaing membrane in a anaesthetized cats. Root bark is used in remission of intermittent fevers, remedy for heart palpitation and melancolia . It is also used in dog bite, gastric troubles, heart disorders, antiamoebic, rheumatism. Fruits are used in diarrhea, dysentery, constipation laxative tonic, digestive, brain and heart tonic, ulcer, intestinal parasites, gonorrhea, epilepsy.

## PLANT 6- Centella asiatica

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Magnoliopsida
Class - Magnoliopsida
Order - Apiales
Family - Apiaceae
Genus - Centella
Species - C. asiatica
Vernacular name - Thankuni

### DESCRIPTION

Thankuni is a creeping plant that blowing to the family Apiaceae and has a few different names. It is related to herbs like parsley and cilantro which are more well known. It is also called by its scientific name. Centella asiatica which is same as pennywort.

### MEDICINAL VALUE

The spice has been used for hundreds of years by both indians and Chinese. In Ayurveda, it is seen as a kind of medicine for anxiety. In old sanskrit texts, thankuni is mentioned as a treatment for both heart disease and respiratory illness like bronchitis. It has been used for wound healing, better circulation, memory enhancement, cancer, vitality, general tonic, respiratory aliments, detoxifying the body, treatment of skin disorders (such as psoriasis and enzema), revitalizing connective tissue , burn and scar treatment, clearing up skin infections, slimming and edema, arthritis, rheumatism treatment of leaver and Kidneys, periodontal disease, strengthening of, sedative, anti-stress, anti-anxiety etc. Thankuni leaves have many minerals in them that help the blood clot quickly. Because of this, a lot of complicated diseases get better very quickly.

## PLANT 7- *Mentha* spicata

### SYSTEMIC POSITION

Kingdom - Plantae
Division - Trachephyta
Class - Magnoliopsida
Order - Lamiales
Family - Lamiaceae
Genus - Mentha
Species - M. spicata
Vernacular name - Garden mint

### DESCRIPTION

Mint is a rapid growing perennial herb with many varieties that grow up to 10-20 cm tall and are quite invasive, mint grows best in full sun and partial shade, should be planted early in growing season and generally hardy to 20° F. Mint have squard stems and opposite aromatic leaves.

### MEDICINAL VALUE

Mint has been long know as herbal remedy, eating queasy stomach, calming stress and anxiety, and promoting restful sleep. One of the most important properties of mint is that it creates antispasmodic and carminative effects which help to combot digestive problems, especially in case of indigestion, flatulence and stomach pain or colic. It also important for the treatment of the respiratory tract because it contains certain components that are powerful expectorants. Mint contains components that are very effective for treating anxiety problems, these same components acts by relaxing us and preventing possible consequences that could be brought about by this condition. Mint is very effective as an antiseptic and painkiller, therefore, its use is recommended for the treatment of injuries. The mixture of mint is applied directly to the burns, which helps to avoid staining and a possible infection. Mint infusion come highly recommended in order to eliminate gases that are found accumulated in the digestive tract, which is useful to eliminate flatulence.

## PLANT 8- *Paederia foetida*

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Magnoliophyta
Class - magnoliopsida
Order - Gentianales
Family - Rubiaceae
Genus - Paederia
Species - P. foetida
Vernacular name - Prasarini

### DESCRIPTION

Prasarini is a climber plant which has ovate to lanceolate leaves. Prasarini leaves are around 5 cm long and 2.5 cm in width. The leaves are also mebranous and have long petioles. Prasarini flower are found in scorpioid cymes and are purple or violet in color.

### MEDICINAL VALUE

It has anti inflammatory property and is useful in the treatment of edema and all other other inflammatory conditions. It is very useful in the treatment of joint problem like arthritis and joint pain, gout etc. It is useful to balance the vata and kapha doshas in body and their related disorder. It also has aphrodisiac property and improves the semen quality. It has Anthelmintic activity also. It helps to relieve from abdominal pain and bloating. It acts as immunity enhancer and provide strength to the body against various infections. It also used to stimulate the central nervous system. It is also used in the treatment of feaver. It also has diuretic property. Its fruits are used to relieve toothache. It has hepatoprotective and antispasmodic activities. Its oil is very beneficial in various joint disorders. Most of the message oil used for vata balancing containing this herb as an essential ingredient. On external use, this herb relives pain, inflammation and stiffness.

## PLANT 9- *Nyctanthes arbor-tristis*

### SYSTEMATIC POSITION

kingdom - plantae
division - Magnoliophyta
class - Magnoliopsida
order - lamiales
family - oleaceae
genus - Nyctanthes
species - N.arbor-tristis
vernacular name - Gangasiuli

### DESCRIPTION

The shrubs grows to a height of 10 meters. The simple leaves are opposite, with an entire margin about 6-12cm long and 2-6.5 cm wide. The flowers are fragrant with a five-to-eight lobed Corolla and oranged - red centre, often seen in a cluster of two to seven.

### MEDICINAL VALUE

Nyctanthes is known as a great anti pyretic. It cures various nauseous types of feaver including maleria, dengue, and chikungunya feavers. The paste of the seeds is applied over the area affected with alopecia . The fresh juice of the leaf of Nyctanthes arbor-tristis is given in a dose of 5-10 ml to treat sciatica. The fresh juice of the plant is given in cases of constipation, internal worms, hepatomegaly and piles in a dose of 10-15 ml. In case of asthma and cough, the powder of dried leaf or bark is given with betel leaf juice in a dose of 2-3 gram. The past of the bark or leaf is applied over the area affected with eczema and ringworm. In case of snake poisoning, the juice of the leaf is administered. The cold infusion of the leaf is given to treat difficulty in micturition. The flowers are used to prepare perfumes and scents after distillation.

Its oil is used in aromatherapy to relieve stress and anxiety.It helps by increasing the serotonin levels in the brain and regulating mood. Boil some leaves in water and have them once a day to reduce any kind of pain and swelling in the body.

## PLANT 10- *Murraya koenigii*

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Magnoliophyta
Class - Magnoliopsida
Order - Spindales
Family - Rutaceae
Genus - Murraya
Species - M. koenigii
Vernacular name - Curry leaf

### DESCRIPTION

Curry leaf is an evergreen tree growing up to 4 miter (13feet) by 3 miter (9 feet) at a medium rate. Compound, odd pinnate 30 cm long leaves are composed of 11-12 shiny, dark green, lance-shaped leaflets (4.9 cm long, 1.8 cm wide).

### MEDICINAL VALUE

Curry leaves are believed to have several medicinal properties. They are considered to have anti-diabetic, antioxidant, antimicrobial, anti-inflammatory, anti-carcinogenic, and hepatoprotective (capability to protect the liver from damage). It is a super skin toner for all skin type acne pimples, bruises, burns, rashes etc. Strengthens the roots, promote hair growth treats dandruff and prevents hair greying. It protects the nervous system as it reduce the oxidative damage to brain cells. It rich with antioxidant the reduce oxidative stress in the body. It may help treat digestive disorders, biliousness, obesity, blood pressure, blur vision, diabetes. It helps in weight loss and reduce colestrol, it cleanses body by flushing out toxins. It treatments of morning sickness, nausea and vomiting, it preventing premature graying of hair. The juice of the root can be taken to relieve pain associated with the kidney. Curry leaves are a rich source of protein which is essential for hair growth and maintaining overall health of mane. Plus, it has beta-carotene and amino acids which also work at reducing hair loss and help strengthen hair follicles, regenerate dormant follicles and regrow new hair.

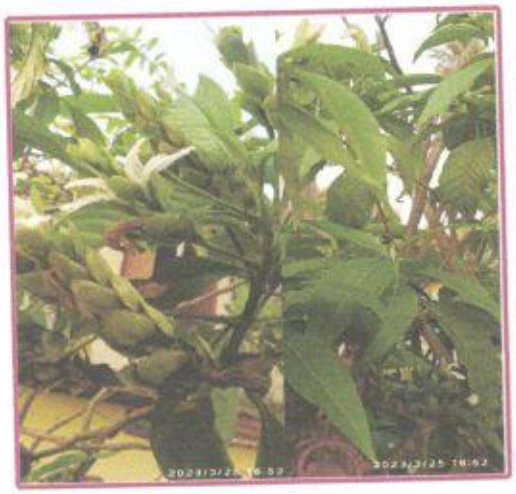
## PLANT 11- *Justicia abhatod*

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Magnoliophyta
Class - Magnoliopsida
Order - Lamiales
Family - Acanthaceae
Genus - Justicia
Species - J. adhatoda
Vernacular name - Basanga



### DESCRIPTION

Justicia adhatoda is a shrub with 10-20 lance-shaped leaves 8-9 centimeters in length by four wide. They oppositely arranged smooth-edged , and borne on short petioles. When dry they are of a dull brownish green color. They are bitter testing.

### MEDICINAL VALUE

Leaf of basanga is an important drug of ayurveda. The entire parts of the plant from root to leaves are used to treat many ailments. It is an effective herb in the management of respiratory congestion like cough, bronchitis , asthma etc. The medicinal herb expands the airways and provides great relief to the bronchitis patients. It is a well known ayurvedic medicine for expectorant and helps to ease the phlegm. The parts of this plant present intestinal worms, The leaves juice three times a day a reduce diarrhea, bleeding, vomiting,, and dull feaver. Apply the warm leaf infusion to the skin to reduce eczema, rashes, itching and other skin elements. Its nut is used in Ayurveda, unani and other herbal medicines. It is used to treat health issues related to respiration. It is used in treatment of information. Its nut can help with cough and is used as bronchodilator. Drugs obtained from this herb include bromhexine and ambroxol . They are prescribed for asthma, chronic obstructive pulmonary disease and tuberculosis.

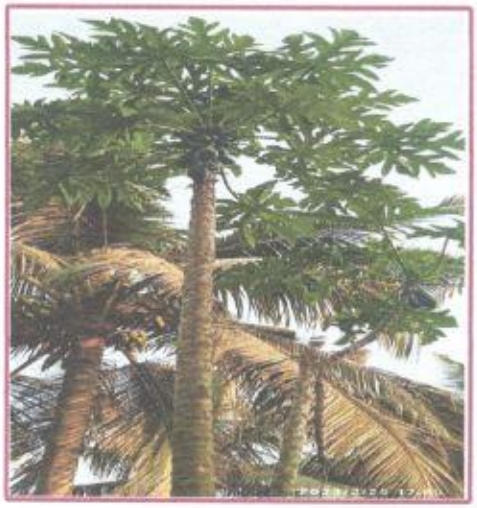
## PLANT 12- *Carica papaya*

### SYSTEMATIC POSITION



Kingdom - Plantae
Division - Magnoliophyta
Class - Magnoliopsida
Order - Brassicales
Family - Caricaceae
Genus - Carica
Species - C. papaya
Vernacular name - Papaya

### DESCRIPTION

Carica Papaya is an evergreen, tree like herb, 2-10 miter tall, Usually unbranched, although sometimes branched due to injury, containing White latex in all parts. Stem Cylindrical, 10-13 cm in diameter, hallow with prominent leaf scars and spongy - fibrous tissue . Has an extensive rooting system.

### MEDICINAL VALUE

It is tropical fruit, rich in sugar, fiber and beta-carotene . It contains papain, an enzyme that helps digesting food. It works by cleaving proteins at the bonds between certain amino acids making meat softer and easier to digest. The antioxidants in papaya prevent the cellular damage caused by free radical and promote cardiovascular health. In combination with papain , benzyl isothiocyanate it through to contribute to antiparasitic activity of papaya seeds. It recommend for gastritis, difficult digestion, flatulence etc. It also contains alkaloids, that traditionally have been used to treat intestinal worms. Its leaf extract is potent medicine, especially for denue, reduces heartburn, it aids in cancer treatment, treats for diabetes, increase platelet count, prostate enlargement, reduce skin problems, promotes hair growth and it also good for liver. Papaya reduce wrinkles of skin, controls acne, removes dead skin cells, improves skin tone.

## PLANT 13- *Pandanus amaryllifolius*

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Angiosperms
Class - Magnoliopsida
Order - Pandanales
Family - Pandanaceae
Genus - Pandanus
Species - P. amaryllifolius
Vernacular name - Pandan

### DESCRIPTION

Pandan plant is a tropical plant native to South -East Asia. It is a perennial evergreen tree with fragrantly -scented leaves, growing into a small herb 1-1.6m tall when the leaves are harvested often, or a small tree 2-4.5m tall in its tropical native habitat.

### MEDICINAL VALUE

Pandan extract helps people lower their sugar level in blood. It has been proven that the plasma glucose of the people studied had lowered significantly throughout the period of study. It relieves headache and arthritis, treats ear pains, eases chest pains reduce fever, treats leprosy wounds and Smallpox, it acts as a laxative for children. It solves several skin problems. It strengthen gum and reduce stomach spasms. It helps in speeding in the recuperation of women who have just given birth are still weak. It reduce stomach pain. Pandan also manifest anti cancer activities. Decoction of the bark may be taken as tea, or mixed with water that is to be used in bathing. In order to cough, and urin related concerns. Chew the roots to strengthen the gum.

## PLANT 14- *Catharanthus roseus*

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Magnoliophyta
Class - Magnoliopsida
Order - Gentianales
Family - Apocynaceae
Genus - Catharanthus
Species - C.roseus
Vernacular name - Sadabahar

### DESCRIPTION

Catharanthus roseus is an evergreen herbaceous plant growing up to 1meter tall. The leaves are oval to oblong, 2.5-9 cm long and 11-3.5 cm broad glossy green hairless with a pale midrib and a short petiole about 1-1.8 cm long and they are arranged in the opposite pairs. The flowers are white to dark pink with a dark red center, with a basal tube about 2.5-3 cm long and a Corolla about 3-5 cm diameter with five petals like lobes.

### MEDICINAL VALUE

Sadabahar is one of the most medicinal valuable plant species of Apocynaceae family, which is used in traditional herbal medicine in the world, and the chemical extraction has a role in cancer treatment. It have been used in the treatment of leukemia, Hodgkin disease, malignant lymphomas, neuroblastoma, wilms tumor, kaposi sarcoma , mycosis fungoides to improve cerebral blood flow, and treat high blood pressure. In the Philippines, decoction of leaves is used to treat diabetes. Decoction of young leaves is used for stomach cramps. Root decoction for intestinal parasitism as emmenagogue, may produce abortion. Infusion of leaves is used for treating menorrhagia. Root is used for dysentery. It treats Astama, natural burn care, it treats kidey stone , it also treats ulcer.

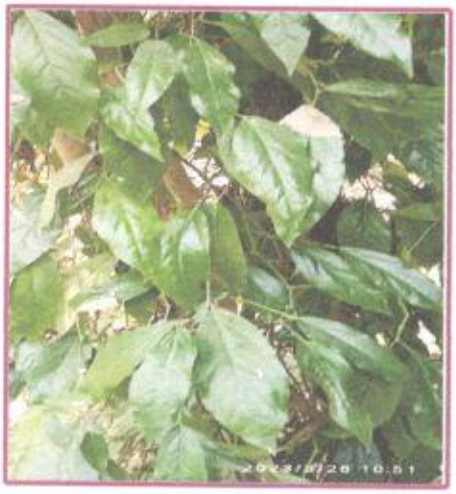
## PLANT 15- *Piper longum*

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Magnoliophyta
Class - Magnoliopsida
Order - Piperales
Family - Piperaceae
Genus - Piper
Species - P.longum
Vernacular name - pippali



### DESCRIPTION

Long pipper is a slender aromatic climber and creeping jointed stem and fleshy fruit are embedded into the spikes. The leaves are of dark green color. Flowers of this plant are monoecious. Male and female flower are borne on different plants. Leaves are ovate or heart shaped having dark green color above and pale green below. They are about 2-3 inches long.

### MEDICINAL USES

Pippali promotes digestive fire, Aphrodisiac. Having sweet taste after digestion and rejuvenating properties. Slightly hot in potency with pungent taste. It pacifies vata and kapha. The herb is useful for asthma, cough, diabetes, piles, spleen disorder and endotoxins . Raw pippali aggravates kapha. It is unctuous, cold in potency, sweet in teste, heavy in nature and pacifies pitta. Dry pippali aggravates pitta if mixed with honey. It pacifies cough, fever, excess of adipose tissue and good for digestive fire. If pippali is used with jaggery. It is useful for low digestive fire, indigestion, asthma, heart disease, anemia and worms. It behaves as an Appetizer. It has spermophytic effect. It acts as Rasayana (antioxidant) . It is abdominal tumor and abdominal colic. It is useful in abdominal diseases it reduce fever. It is helpful in Ama digestion.It benifits in diabetes and skin disease. It is given in Hemorrhoids and spleen diseases. It helps with weight loss.

## PLANT 17- *Hibiscus rosa-sinensis*

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Magnoliophyta
Class - Magnoliopsida
Order - Malvales
Family - Malvaceae
Genus - Hibiscus
Species - H. rosa - sinensis
Vernacular name - China rose

### DESCRIPTION

Hibiscus rosa-sinensis os a bushy, evergreen shr up or small tree, growing 2.5-5 meter (8-16ft) tall and 15-3 meter (5-10 ft) wide, with glossy leaves and solitary, brilliant red flowers in summer and autumn. The 5-petaled flowers are 10 cm in diameter, with prominent orange-tipped anther.

### MEDICINAL VALUE

Hibiscus rosa-sinensis is a flowering plant native to tropical Asia. Hibiscus is commonly consumed in teas made from its flowers, leaves, and roots. In addition to casual consumption, Hibiscus is also used as an herbal medicine to treat hypertension, cholesterol production, and cancer progression.In case of mumps, infection of the urinary tract , use dried drug materials 15-30 gm,boil to decoction and drink. For absence, carbuncle and boils, crush fresh lives and poultice the infected area. Also, pound flower bud into a paste and apply to external swelling;also used for boils, cancerous swelling and mumps. Decoction of roots, bark, leaves and flowers used as an emollient. Decoction from roots of red and white flowers used as an antidote for poison. Bark is an emmen agogue, also used for normalized menstruation. Seeds used it as a stimulate and for cramps. Decoction of leaves for fevers. For headaches an infusion of leaves or poultice of leaves. Leaves are mildly laxative. Mucilage during labor. Red flowers are purgative when taken with papaya seed, may be abortive. Infusion of leaves as an expectorant in bronchitis. Hair stimulant oil made by mixing the juice of fresh petals and olive oil for stimulating hair growth.

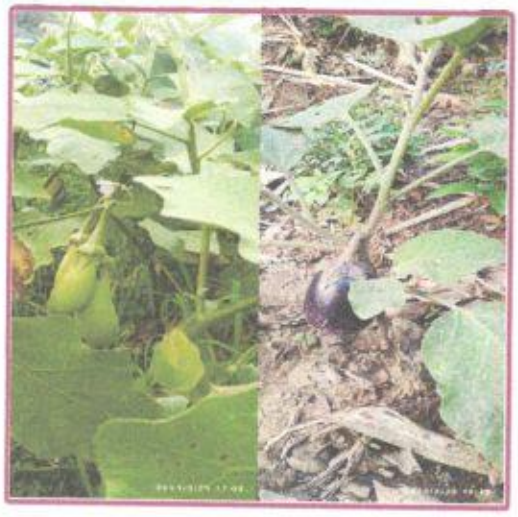
## PLANT 18- *Solanum melongena*

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Anthophyta
Class - Dicotyledoneae
Order - Solanales
Family - Solanaceae
Genus - Solanum
Species - S. melongena
Vernacular name - Brinjal



### DESCRIPTION

Brinjal is a heat loving, branching bushy plant thick, Woody stem. The grayish green leaves are large, lobed and alternative with undersized typically covered with spiny fuzz. Mature plants range from 1-8 feet in height. Although brinjal is a perennial plant. It is more commonly grown as an annual.

### MEDICINAL VALUE

Brinjal, commonly called as Baingan and Vrintak in Ayurveda, is a nutritious food rich in minerals, vitamins and fibers and low in calories. Brinjal might help in weight management as it is low in calories and rich in dietary fibers that help improve digestion and metabolism. Leaves are used for piles. The bolid root of the wild plant, mixed with sour milk and green Porridge, has been used for the treatment of syphilis . Long fruit is phlegmatic and leaves is used for washing sores, exudative surface and used as astringent for hemorrhage from the bladder and other hemorrhagic fluxes. The juice of leaves used for throat and stomach troubles. Decoction of roots taken for asthma and as a general stimulant. According to a study, eating a bowl cooked brinjal can reduce the risk of LDL levels and nonalcoholic fatty liver disease. This humble vegetable is loaded with nutrients and antioxidants that can improve digestion, reduce blood sugar level and prevent cardiovascular diseases.

## PLANT 19- *Mangifera indica*

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Tracheophyta
Class - Magnoliopsida
Order - Sapindales
Family - Anacardiaceae
Genus - Mangifera
Species - M. indica
Vernacular name - Mango

### DESCRIPTION

The mango tree grows erect to a height of to 10-30 meter. The bark is usually dark grey-brown to black. The bark contains 78% regin, 15% gum and tannic acid. Twigs are not very thick but they are smooth, apically angular, glabrous, glossy and dark green.

### MEDICINAL VALUE

Mango contains natural sugar, which can lead to increased blood sugar levels. However, individuals with diabetes can consume one small to medium-sized mango twice a week in season. The fruit has high fibre and water content, making it a better option for people with diabetes. Polyphenolic antioxidant compounds in mango that provide protection against breast cancers and leukemia. I is high in copper is a Co-factor for enzymes including cytochrome C-oxidase and superoxide dismutase. Red blood cells also depend on copper for their production. Mangoes have enzymes such as eater, Terpenes and aldehydes that helps the digestive tract relax and process food items more efficiently. This is way mango are also good for people with Indigestion and individuals suffering with acidity. Mangoes are Rich source of vitamin -A, a compound essential for maintenance of good eyesight. 100 gram of frash provides 765 mg of 25% of recommended daily levels of vitamin-A. The mango is rich in Glutamic acid which is an important Excitatory neurotransmitters, and has been shown to boost concentration in children.

## PLANT 20- *Momordica charantia*

### SYSTEMATIC POSITION

Kingdom - Plantae
Division - Magnoliophyta
Class - Magnoliopsida
Order - Cucurbitales
Family - Cucurbitaceae
Genus - Momordica
Species - M. charantia
Vernacular name - Bitter gourd

### DESCRIPTION

Bitter gourd is an annual climbing or trailing herb with stem up to 5 meter long. The stems are ridged, glabrous or hairy, and they bear simple tendrils. They are showy, alternate, simple borne on 1.5-7 cm long petioles .

### MEDICINAL VALUE

Bitter gourd is an excellent source of vitamin B1, B2, B3, C, magnesium, folate, zinc, phosphorus, manganese and has high dietary fiber. It is rich in iron, contains twice the potassium of a banana. It is reverses insulin resistance. It prevents diabetes competition. It can protect the body from non-communicable diseases. It is scientifically proven: bitter gourd has lower blood glucose levels. It increases cellular uptake of glucose. It improves glycemic control. It reduce incidence of acen and pimples. It reduces fever and boosts immunity. It helps in weight loss. It improves female fertility due to PCOS. It lowers bad cholesterol levels. It is great for eyes. It over come type 2 diabetes. It cures hangovers and cleanses the liver .It improves stamina and energy levels. It is helpful for glowing skin and lustrous hair. It is hair tonic. It helps prevent dandruff. It fights against acen. It improves heart health. Bitter gourd has antioxidant and antimicrobial properties, which help excretion toxins from our blood and liver and heal many liver conditions. Regular consumption of bitter melon improves our gut health and treats many intestinal conditions, including constipation and irritable bowel syndrome (IBS).

# CONCLUSIONS

The ethno-medico-botanical survey of the area revealed that the people of the area possessing good knowledge of herbal drug but as the people of societies are in progressive exposure to modernization their knowledge of traditional uses of plant may be lost in due course. So it is important to study and record the uses of plant by different tribe and subtribe for future study . Based on the research results the following recommendations are forward.

* Local community of the study area should be involved in conservation and management of plant resources and their indigenous knowledge in their locality.
* Identify effective medicinal plants and encouraging thr local people to grow medicinal plants in home garden . Harvest plant for business or for household use with little awareness of its thread. Awareness should be rised through which suitable harvesting be practiced.
* The knowledge of traditional medicine practitioners must be encouraged and protected. This could be way through which such people could exercise their skill broadly.
* There is a need of coordination or traditional healers of the area together by certification or by organizing them at various levels that Popularity their indigenous knowledge on medicinal plants . Establishing Traditional Herbal Association, by providing land for cultivating medicinal plants, fund and assisting their activities with professional guidance help to conserve the first eroding medicinal plants of the area.
* Their should be a need of community based forest priority area (park) establishment of the study area for the conversation of forest in general and medicinal plants in particular rather than converting all areas in to nonspecific agriculture products.
* These traditional remedies indeed, need to be confirmed through scientific investigation to identify those that may provide alternatives for morden drugs .

# SYNOPSIS

As we know plants and their products are very much useful for living beings. They can be used as edible purposes and other economic uses. Hence here in the project we introduce some of these important plants which are easily available to our locality and have some salient properties by which, most commonly food, identified diseases. Here we represent all the plants individually with their classification, description, uses by which any one can easily identify the plants and will use it as they required.

PRINCIPAL
DERABISH COLLEGE

# METHODOLOGY

In order to know the different uses and other edible purpose of the vegetable plants, we (the students of Botany department) have been visited to different places of Kaupada. We have collected different plants from different places and details data about different plants along with it's description, photograph and economic uses and etc. are attached have one by one.

# CHAPTER-I

## INTRODUCTION:

- Horticulture has been defined as the culture of plants for food,comfort and beauty. A more precise definition can be given as "the cultivation, processing and sale of fruits, nuts, vegetables ornamental plants, and flowers as well as many addition services.
- It also includes plant conservation, landscape restoration, soil management, landscape And garden design, construction, and maintenance, and arboriculture.in constant to agriculture, horticulture, horticulture does not include large-scale crop production or animal husbandry.
- The word horticulture comes from two Latin words which mean "garden" and "culture". Horticulture is the art and science of growing and handing fruits, nuts, vegetables, herbs Flowers, foliage plants, woody ornamentals, and turf.
- Horticulture is different things to different people.it is a science on the cutting edge of biotechnology, an art, profession, business, industry, hobby, way-of-life, and therapy for millions of people. Each of us comes in contact with horticultural products and professions every day of our lives.

## *FLORICULTURE:*

- Floriculture, or flower farming, is a discipline of horticulture concerned with the cultivation of flowering and ornamental plants for gardens and for floristry, comprising The floral industry. the development, via plant breeding, of new varieties is a major occupation of floriculturists.
- Floriculture crops include bedding plants, houseplants, flowering garden and pot plants, cut cultivated greens, and cut flowers. As distinguished from nursery crops, floriculture crops are generally herbaceous.
- Bedding and garden plants consists of young flowering plants(annual and perennial) and Vegetable plants. flowering plants are largely sold in pots for indoor use. The major flowering plants are poinsettias, orchids, florist chrysanthemums, and finished florist azaleas.
- Cut flowers are usually sold in bunches or as bouquets with cut foliage. The production of cut flowers is specifically known as the cut flower industry. Farming flowers and foliage employs special aspects of floriculture, such as spacing, training and pruning plants for optimal flower harvest; and post-harvest treatment such as chemical treatments, storage, preservation and packaging.

CHAPTER-II

# DIFFERENT ORNAMENTAL PLANTS IN DERABIS LOCALITY

## ROSE:-

**BOTANICAL NAME:** *Rosa indica*

**FAMILY:** Rosaceae

## DESCRIPTION: -

- The rose is a type of flowering shrub. Most roses have prickles on their stems. Rose are erect, climbing, or trailing shrub, the stems of which are usually copiously armed with prickles of various shapes and sizes, commonly called thorns.
- The leaves are alternate and pinnately compound, usually with oval leaflets that are sharply toothed. The flowers of wild roses usually have five petals, whereas the flowers of cultivated roses are often double (with multiple sets of petals).
- Rose flowers size ranges from tiny miniatures 1.25cm in diameter to hybrid flowers measuring more than 17.5 cm across. The rose plants fleshy, sometimes edible, berry like fruits is known as a hip and usually ranges from red to orange in colour. The root is tap root.

## ECONOMIC IMPORTANCE: -

Gulkand made by the mixture of rose petals and white sugar in equal proportion acts as the tonic and laxative. Hips, the fruit of roses are the good source of vitamin c. Rose petals are used to make skin healthy and glowing. It cures dry and patchy skin. The rose scent has been used in pill making for centuries. Its herbal tea is used in the treatment of cold and cough. Roses are also used in the preparation of rose water and rose vinegar. They are used for making herbal tea, jam and jellies.

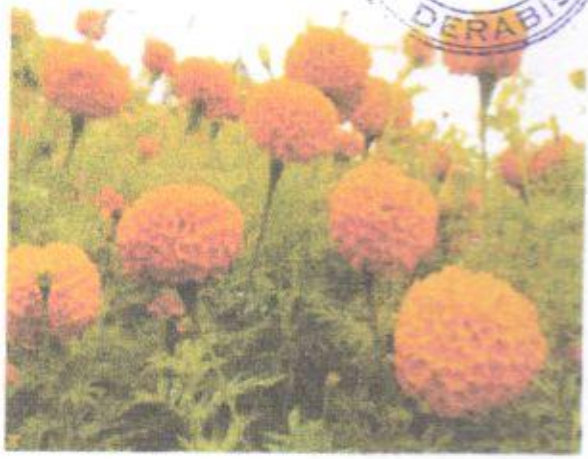
FAMILY: - Clendulaceae



## DESCRIPTION: -

- It flowers from july to September. The scented flowers are hermaphrodite (have male and female organs). It is hardly to zone 6 and is frost tender. The lower leaves are broad and spatula shaped. Upper leaves may be oblong, are smooth at the edges, and are arranged alternately along the stem.
- Seeds are crescent to horseshoe shaped with the rough exterior. Its branching stem grows to the height of 30-60 cm.
- Marigold plant is propagated by the seeds. They are shown during the early spring. marigold is cultivated throughout India.

## ECONOMIC IMPORTANCE:-

- Marigold is used for stomach upset, ulcers, menstrual period problems, eye infection, inflammations, and for wound healing. It is antiseptic. If the marigold flower is rubbed on the affected part, it brings relief in pain and swelling caused by a wasp or bee. A lotion made from the flowers is must useful for sprains and wounds and a water distilled from them is good the sore eyes. Externally it is used for the treatment of alopecia. Internally it is used to treat bladder and kidney problems, blood in urine, uterine bleeding and many more.

## DAHLIA: -

*BOTANICAL NAME: - Dahlia pinnata*

*FAMILY: - Asteraceae*

## DESCRIPTION: -

- Dahlia is the national flower of Mexico. It is a tuberose perennial, growing to 1 m tall. The flowers are hermaphrodites and are pollinated by insects. Dahlia are annual blooming plants, with mostly tuberose roots. while some have herbaceous stems, others have stems which lignify in the absence of secondary tissue and As a member of the Asteraceae the flower head is actually a composite with both central disc florets and surrounding ray florets.

## ECONOMIC IMPORTANCE: -

- The common garden variety dahlia was once an important root crop and medicinal plant. Its root were valued both for the nutritious inulin stored inside them and for the antibiotic compounds concentrated in the skin of the tubers.
- The flower petals are used in salad. Root-cooked and used as a vegetable. A sweet extract of the tuber, called "dacopa", is used as a beverage or as a flavouring. It is mixed with hot or cold water and sprinkled on ice cream.
- Its naturally sweet mellow taste is said to combine the characteristics of coffee, tea and chocolate.

# TUBEROSE:-

**BOTANICAL NAME :-** ***Polianthes tuberose***

**FAMILY: - Amaryllidaceae**

## DESCRIPTION :-

- Tuberose is one of the most important tropical ornamental plant cultivated for production of long lasting flower spike. It is a mesophytic plant .
- The root is tap root, and adventitious root is also present. The modified underground stems are present called bulb. The leaf is green and margine entire and green in color and parallel venation. The midrib is present in it.
- The flowers are attractive and elegant in appearance with sweet fragrance.it has long been cherished for the aromatic oils extracted from its fragrant white flowers.

## ECONOMIC IMPORTANCE: -

- Tuberose are also used for making artistic garlands, floral ornamentals, bouquets, buttonholes, gajras and extraction of essential oil. It is also a popular cut flower, not only for use in arrangements, but also for the individual florets that can provide fragrance to bouquets and boutonnieres.
- The long flower spikes are excellent as cut flowers for table decoration. Tuberose represents sensuality and is used in aromatherapy for its ability to open the heart and calm the nerves, restoring joy, peace and harmony.
- Tuberose flowers have long been used in perfumery as a source of essential oils and aroma compounds.

CHAPTER-III

## GLADIOLUS: -

BOTANICAL NAME: - *Gladiolus communis*

FAMILY :- Iridaceae

## DESCRIPTION: -

- Gladioli grow from rounded, symmetrical corms, that are enveloped in several layers of brownish, fibrous tunics. There stems are generally unbranched, producing 1 to 9 narrow, sword-shaped, longitudinal grooved leaves, enclosed in a sheath. The lowest leaf is shortened to a cataphyll. The leaf blades can be pane or cruciform in cross section.
- The flower spikes are large and one-sided, with secund, bisexual flowers, each subtended by 2 leathery, green bracts. The sepals and the petals are almost identical in appearance, and are termed tepals. The perianth is funnel-shaped, with the stamens attached to its base.

## ECONOMIC IMPORTANCE: -

- Gladiolus is one of the important bulbous plants which is valued xn the gardens for its beautiful flower spikes. Flowers with brilliant colours, attractive shaped, varying sizes, excellent keeping quality. The gladiolus is ideal both for garden and floral decoration. The florqts open in sequence over a longer duration and hence has a good keeping quality of cut spike.
- It is ideal as a cut flower, very good for beds, herbaceous border, for making bouquets and does well in pots. Among the different bulbous plants, the gladiolus top the list in its beauty, glamour keeping quality, various colours and shades, shapes, hence it is called as "Queen of Bulb".

## SAGES: -

BOTANICAL NAME: - *Salvia officinalis*

FAMILY: -Lamiaceae

## DESCRIPTION: -

- Salvia or common sage, or culinary sage is a perennial, evergreen subshrub with woody stems, grayish leaves, and blue to purplish flower. Cultivars are quite
- variable in size, leaf and flower color, and foliage pattern, with many variegated leaf types.
- The plant flowers in late spring or summer. The leaves are oblong, ranging in size up to 2.5 in (6.4 cm) long by 1 in (2.5 cm) wide. Leaves are grey-green, rugose on the upper side, and nearly white underneath due to the many short soft hairs. Modern cultivars include leaves with purple, rose,cream, and yellow in many variegated combinations.

## ECONOMIC IMPORTANCE: -

- In folk medicine *S. officinalis* has been used for the treatment of different kinds of disorders including seizure, ulcers, gout, rheumatism, inflammation, dizziness, tremor, paralysis, diarrhea, and hyperglycemia.
- In recent years, this plants have been a subject of intensive studies to document its traditional use and to find new biological effects. these studies have revealed a wide range of pharmacological activities for *salvia officinalis*
- It is used against skin diseases. And antifungal and anti-inflammatory potential of its essential oils and their cytotoxicity on macrophages and keratinocytes.

## TULIP: -

**BOTANICAL NAME:** -*Tulipa sp.*

**FAMILY:** -Liliaceae

## DESCRIPTION: -

- Tulip is aspring blooming perennial herbaceous bulbiferous geophytes (having bulb as storage organs). The flowers are usually large, showy and brightly coloured, generally red, pink, yellow, white, etc.
- They often have a different coloured blotch at the base of the tepals. The plants range in size from 4 to 24 inches in height, with an upright form. Their leaves are usually medium green in colour, with a lance or oval shape.
- Each bulb produces one flower. The roots grow bottom of the bulb, called the basal plate.

## ECONOMIC IMPORTANCE: -

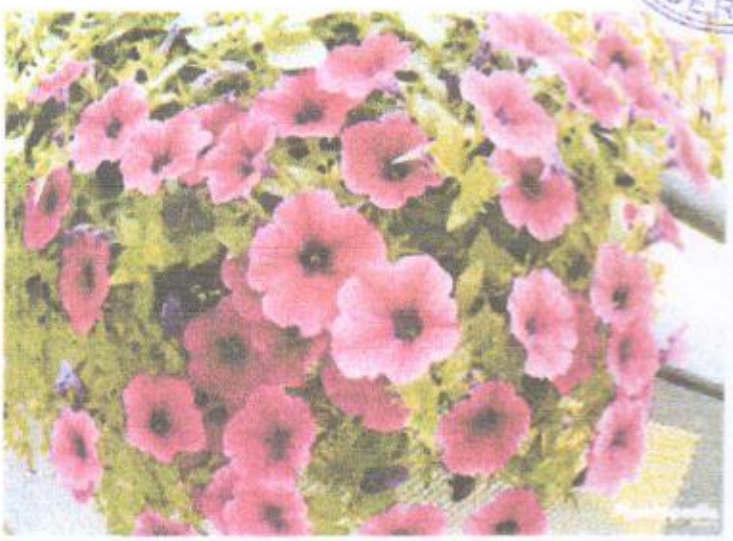
- Tulips are one of the most versatile flowers that are currently available. They can be used for any occasion and they have a simplicity that is perfect for home decorating.
- Tulip bulbs are edible and are a good substitute for onions during cooking.
- Tulip has anti-septic properties. Best remedy for cough and cold, reduces risk of cancer. Used for sinus pain, high fever and headache are some of the tulip health benefits.

PRINCIPAL
DERABISH COLLEGE

## PETUNIA: -

BOTANICAL NAME: - *Petunia sp.*

FAMILY: - Slanaceae



## DESCRIPTION: -

- Petunia species are mostly annual hebs. The leaves are sessile and are usually oval shaped with smooth margins. The flowers are funnel shaped, consisting of five fused or partially fused petals and five green sepals.
- Most species are insect pollinated. The minute seeds are borne in a dry capsule. They are grown from seeds, but it is easier to grow them from transplants.

## ECONOMIC IMPORTANCE: -

- Besides beauty benefits they are used in aesthetic uses, long ago, when allopathy was not a part of medical science, plants were the major source of medicine used for almost all type of health issues.
- This ancient herbal knowledge is still being used by many doctors for curing health. Plants have the ability to synthesize a wide variety of chemical compounds that are used to perform very important biological functions.

CHAPTER-IV

## LILAC: -

BOTANICAL NAME: -*Syringa vulgaris*

FAMILY :-Oleaceae

## DESCRIPTION: -

- The plant is upright, deciduous shrub. It is 8-15 feet in tall. And 6-13 feet in wide. The lower parts of the branches do not have leaves. The leaf is opposite, simple, ovate, 2-5 inch long. the leaf margin is subcordate. It is dark green in colour.
- The flower is fragrant, blooms in may, flowers are borne in large. And the inflorescence is terminal penicle. The fruit is capsules, located in terminal tips of branches, the bark is light-gray in colour.

## ECONOMIC IMPORTANCE :-

- Lilac can be steeped to make a tonic that reduces fevers and to get rid of internal parasites. Skin burns or wounds are soothed and heal well. When a paste or get made from lilacs is applied.
- Lilac flowers are edible, but make sure they have been well washed and not exposed to chemicals. they are crystalize and use them as candied flowers on cookies,pies,and cakes.
- Add them to brown rice dishes and fresh green salads,mixfresh lilac blossoms with honey and greek yogurt for an aromatic, yet elegent dessert. Create a decadent lilac sorbet by simply mixing lilac flowers with sugar and water.

## PAMPAS GRASS:

BOTANICAL NAME: -*Cortaderia selloana*

FAMILY: - Poaceae

## DESCRIPTION: -

- It is a tall grass, growing in dense tussocks that can reach a height of 3m(10ft). the leaves are long and slender, 1-2m (3ft 3in-6ft 7in)long, and 1cm(3/8in)broad, with very sharp edges. The leaves are usually bluish green, but can be silvery grey. the flowers are produced in a dense white panicle 20-40cm (8-16in) long on a 2-3 (6ft 7in – 9ft 10in) tall stem.
- Pampas grass is highly adaptable and can grow ina wide range of environments and climates. It also seeds prolifically, with each plant able to produce over one million seeds during its life time.
- Pampas grass is names for the pampas plains, where it is endemic. It is cultivated as an ornamental in warm parts of the world and is considered an invasive species in some areas outside its native range, including newzealand, south Africa, and the south western united states.

## ECONOMIC IMPORTANCE :-

- The pampas are one of the best places in the worldto produce them, and argentina's economy is not only diversified, so it depends on the pampas region to produce income.
- The pampas are one of the biggest open air food factories of the world . very very productive and extensive agricultural land. With the climate advantage over similar regions in the rest of the world.
- These varieties of grasses serve no purpose other than decoration, akin to garden gromes or sundials.

## DAFFODILS: -

**BOTANICAL NAME :-**

*Narcissus pseudonarcissus*

**FAMILY :-Amaryllidaceae**

## DESCRIPTION: -

- Daffodil or trumpet narcissus, bulb forming plant in the amaryllis family, widely cultivated for its trumplet like flowers. Daffodils are native to northern Europe and are grown in temperate climates around the world.
- The daffodils popularity has resulted in the production of many varieties, in addition to the classic yellow form, the trumpet and petals may themselves be of contrasting yellow, white, pink or orange.
- The daffodil is a perennial and grows to about 41 cm(16inchs) in height. Each plant features five or six linear leaves that grow from the bulb and are about 30cm (12 inch) long. The stem bears one largre yellow blossom with a cololla deeply cleft into six lobes and a central bell shaped crown, or corona, that is frilled at its edges. This trumplet shape contains the stamens and is the flowers most conspicuous feature.

## ECONOMIC IMPORTANCE: -

- Daffodils is a plant. the bulb, leaf, and flower are used to make medicine. Despite serious safety cancers, people take daffodil for whooping caugh, colds, and asthma. They also take it to cause vomiting.
- Traditionally daffodils have been used as a poultile for burns and wounds. Unsupervised ingestion has proved fatal.
- Modern uses include extracting galantamine from the bulbs to treat alzheimers disease, research at the university of coperhagen to use daffodil.
- Daffodil compounds can kill off certain cancer cells.

DERABISH COLLEGE

# HIPPEASTRUM

**Botanical Name: -** *Hippeastrum reginae*

Family :- *Amaryllidaceae*

## DESCRIPTION:-

- Most *Hippeastrum* bulbs are tunicate (a protective dry outer layer and fleshy concentric inner scales or leaf bases). The bulbs are generally between 5–12 cm (2"–5") in diameter and produce two to seven long-lasting evergreen or deciduous leaves that are 30–90 cm *(12"–36") long and 2.5–5 cm (1"–2") wide. The leaves are hysteranthous (develop after* flowering), sessile, rarely persistent and subpetiolate.
- The flowers, generally 2–4, are smaller than other members of the genus. The paraperigon features bristles at the throat of the tepal tube.
- The perigone is about 7.6–10 cm in size and the tepal segments are 2–2.5 cm broad in their middle. Their colour is a bright red with a green keel that extends half way up the segment. The stigma is trifid.
-

DERABISH COLLEGE ESTD-1981 DERA

## HIPPEASTRUM

**Botanical Name: -** *Hippeastrum reginae*

Family :- ***Amaryllidaceae***

## DESCRIPTION:-

- Most *Hippeastrum* bulbs are tunicate (a protective dry outer layer and fleshy concentric inner scales or leaf bases). The bulbs are generally between 5–12 cm (2"–5") in diameter and produce two to seven long-lasting evergreen or deciduous leaves that are 30–90 cm (12"–36") long and 2.5–5 cm (1"–2") wide. The leaves are hysteranthous (develop after flowering), sessile, rarely persistent and subpetiolate.
- The flowers, generally 2–4, are smaller than other members of the genus. The paraperigon features bristles at the throat of the tepal tube.
- The perigone is about 7.6–10 cm in size and the tepal segments are 2–2.5 cm broad in their middle. Their colour is a bright red with a green keel that extends half way up the segment. The stigma is trifid.
-

## ECONOMIC IMPORTANCE:-

The plant is well adapted to a warm and humid environment. In some parts of the world, such as Bangladesh, agro-ecological conditions are extremely conducive to the survival and culture of **amaryllis**; thus, this plant exhibits significant local **economic** potential, including the export market.

# ANGEL WING BEGONIA

**Botanical Name: -** ***Begonia coccinea***

Family :- ***Bigoniaceae***

## DESCRIPTION:-

- With 1,831 species, *Begonia* is one of the largest genera of flowering plants.[1][2][3] The species are terrestrial (sometimes epiphytic) herbs or undershrubs, and occur in subtropical and tropical moist climates, in South and Central America, Africa, and southern Asia. Terrestrial species in the wild are commonly upright-stemmed, rhizomatous, or tuberous.
- The plants are monoecious, with unisexual male and female flowers occurring separately on the same plant; the male contains numerous stamens, and the female has a large inferior ovary and two to four branched or twisted stigmas.
- In most species, the fruit is a winged capsule containing numerous minute seeds, although baccate fruits are also known. The leaves, which are often large and variously marked or variegated, are usually asymmetric (unequal-sided).

## ECONOMIC IMPORTANCE:-

Often, these plants are used as year-round houseplants. They're easy to grow for a gardener who understands their needs. Since begonias originated in the tropics, the ideal growing conditions include high humidity, good circulation of the air around the plant, a lot of water, and a lot of light.

CHAPTER-V

# ALUMINUM PLANT

*BOTANICAL NAME- Pilea cadierei*

*FAMILY- Urticaceae*

## DESCRIPTION

- The aluminum plant is an easy going house plant that is generally simple to please.
- So long as the piela cadierii plant gets the water and sunlight it wants it will continue to be a stunning addition to our indoor garden for years to come.
- Featuring wide bushy leaves that are marked with silver patterns,this native to china and Vietnam does wonderfully as a house plant.
- The leaves are normally squat and broad measuring upto 12 inches {30cm} long and upto 8 inches {21}cm} wide.
- The root system is extensive ,and will break containers if it needs more room .

## ECONOMIC IMPORTANCE:-

- Aluminum is also the most widely distributed and used metal in the westionort.
- It is used to treat the symptoms of too much stomach acid ,such as stomach upset, heartburn and acid indigestion.

## SAINT PAULIA

BOTANICAL NAME- *Saintpaulia ionantha*

FAMILY- *Gesneriaceae.*

## DESCRIPTION:-

- Saintpaulias , commonly known as Africanviolets are a genus of 6-20 species of herbaceous perennial flowering plants.
- Several of these species and subspecies are endangered .
- Saintpaulias ,which grow from 6-15 cm tall ,can be anywhere from 6-30 cm wide .The leaves are rounded to oval ,2.5-8.5cm long with a 2-10 cm petiole ,finely hairy ,and have a fleshy texture .
- The flowers are 2-3 cm in diameter ,with a five lobed velvety corolla and grow in clusters of 3-10 or more on slender stalks called peduncles.

## ECONOMIC IMPORTANCE:-

- Gesneriaceae in the western world is for ornamentals .
- Anumber of organizations have been established by growers and enthusiasts of grsneriads in general and of various gesneriad taxons.
- Many of these plants have been grown for competition .
- Competitive flower shows encourage best practices in horticulture.

## CHINA ROSE:-

BOTANICAL NAME: *Hibiscus rosa-sinensis*

FAMILY: *Malvaceae*

## DESCRIPTION:

- It is a bushy, evergreen shrub or small tree growing 2.5-5m (8-16 ft.) tall and 1.5 -3 m (5-10 ft.) wide, with glossy leaves and solitary, brilliant red flowers in summer and autumn.
- The 5-petaled flowers are 10 cm (4 in) in diameter, with prominent orange-tipped red anthers.

## ECONOMIC IMPORTANCE:

- The flowers, and to a lesser degree the roots and leaves ,are anodyne ,emmenagogue and used in the treatment of women's complaints They regulates menstruation and stimulate blood circulation
- The leaves, fruits and roots are decorated and used in the treatment of boils, cough, etc.
- The fruit is applied to sprains, ulcers and wounds.
- The flowers buds are used in the treatment of poor circulation, stomach pains and swelling

## CHINESE EVERGREEN:-

BOTANICAL NAME: *Algonema commutatum*

FAMILY: *Araceae*

## DESCRIPTION:

- These are evergreen perennial herbs with stems growing erect or decumbent and creeping. Stems that grow along the ground may root at the nodes.
- There is generally a crown of wide leaf blades which in wild species are often variegated with silver and green coloration.
- Inflorescence bears unisexual flowers in a spadix, with a short zone of female flowers near the base and a wider zone of female flowers near the base and a wider zone of male flowers nearer the tip.
- The fruit is a fleshy berry that ripens red. The fruit is thin layer covering one large seed

## ECONOMIC IMPORTANCE:

- These days Chinese evergreen plants are extremely popular and can be used as single specimens to decorate home or in mass to create a coarse-textured, tropical effect.
- These are used in ground cover, mass planting, landscaping, container or above-ground planter; suitable for growing indoors.

ESTD-1981

# CONCLUSION

Not only are the various plant adaptations we've discussed fascinating to study—they are also important considerations for gardeners. Understanding how the plants in your garden get what they need and respond to the challenges they face helps you provide the optimum conditions for them. And a gardener hoping to propagate plants by seed would be wise to learn beforehand just what conditions those seeds need before they'll break out of dormancy and germinate.

Well, this is the end of Exploring the Garden: Plant Growth and Diversity. We hope you've enjoyed the course and that it has sparked a new and deeper appreciation for, and understanding of, the miracles taking place in your plants and your environment. Please join us for Exploring the Garden: Plant Relationships and Cycles, the second part of our journey into the world of plants!

# SYNOPSIS

DERABISH COLLEGE
KENDRAPARA
ESTD-1981

As we know plants and their products are very much useful for living beings. They can be used as edible purposes and other economic uses. Hence here in the project we introduce some of these important plants which are easily available to our locality and have some salient properties by which, most commonly food, identified diseases. Here we represent all the plants individually with their classification, description, uses by which any one can easily identify the plants and will use it as they required.

Principal
DERABISH COLLEGE

# METHODOLOGY

In order to know the different uses and other edible purpose of the vegetable plants, we (the students of Botany department) have been visited to different places of Derabis. We have collected different plants from different places and details data about different plants along with it's description, photograph and economic uses and etc. are attached have one by one.

# CHAPTER-I

## INTRODUCTION

- Horticulture has been defined as the culture of plants for food, comfort and beauty. A more precise definition can be given as "the cultivation, processing and sale of fruits, nuts, vegetables ornamental plants, and flowers as well as many addition services.
- It also includes plant conservation, landscape restoration, soil management, landscapeAnd garden design, construction, and maintenance, and arboriculture.in constant to agriculture, horticulture, horticulture does not include large-scale crop production or animal husbandry.
- The word horticulture comes from two Latin words which mean "garden" and "culture". Horticulture is the art and science of growing and handing fruits, nuts, vegetables, herbs Flowers, foliage plants, woody ornamentals, and turf.
- Horticulture is different things to different people.it is a science on the cutting edge of biotechnology, an art, profession, business, industry, hobby, way-of-life, and therapy for millions of people. Each of us comes in contact with horticultural products and professions every day of our lives.

## OLERICULTURE

- Olericulture is the science of vegetables growing dealing with the culture of non-woody plants for food. Olericulture is the production of plants for use of the edible parts.
- Olericulture deals with the production, storage processing and marketing of vegetables. It encompasses crop establishment including cultivar selection, seed bed preparation and establishment of vegetable crops by seed and transplants.
- It also includes maintenance and care of vegetables crops as well commercial and nontraditional vegetable crop production including organic gardening and organic farming, horticulture, hydroponics and biotechnology.
- In gardening or agriculture, the cultivation of plants having esculent properties particularly such as are pot herbs. To increases domestic vegetable production are first needed in the vegetable seed industry.
- Olericulture is the technology which has improved vegetable production. It helps to produce more uniform plants and wastes. Much or less water by dropping just the right amount of water at the base of each plants.

## VEGETABLES

Vegetables are parts of plants that are consumed by humans or other animals as food. The original meaning is still commonly used and is applied to plants collectively to refer at all edible plant matter including the flowers, fruits, stem, leaves, roots and seeds.

## CHAPTER-II

## DIFFERENT TYPES OF VEGETABLES IN DERABIS LOCALITY

# TOMATO

SCINTIFIC NAME: - *Lycopersicum esculentum*

FAMILY: - Solanaceae

## DESCRIPTION: -

- The tomato is the edible, often red, berry of the night shade *Solanum lycopersicum* commonly known as tomato plant. The species originated in the western South America.
- Botanically classified as berries. They are commonly used as a vegetable ingredient or side dish. The fruit that are more than 10 cm in diameter and weight more than 100gm.
- They are usually red, scarlet or yellow through green and purple varieties do exists and they very in shape from almost spherical to oval and elongated to pear shaped.
- Each fruit contains at least two cells of small seeds surrounded by jelly like pulp. It is also considered as poor man's orange in India.

## ECONOMIC IMPORTANCE: -

- Tomatoes have many advantages over growing other types of crops, such as their high economic value. They have very high nutritional value with high levels of pro-vit A and C, potassium, vit K etc. It helps in maintaining surface using of eyes, respiration.
- Tomatoes are the major dietary source of the health benefits including risk of heart disease and cancer. Tomato contain lycopene and beta-carotene pigments. It helps in the regulation of immune system.

# CABBAGE

**SCIENTIFIC NAME:-** *Brassica oleraceae*

**FAMILY: -** Brassicaceae

## DESCRIPTION: -

- Cabbage is a leafy green, red or white biennial plant grown as an annual vegetable crop for its dense leaved heads. Cabbage heads generally range from 0.5 to 4 kg.
- Smooth-leaved, firm-headed green cabbages are the most common. It is a multi-layered vegetable. Cabbage was a most likely domesticated somewhere in Europe before 1000 BC.
- Having the thin tap root and alternative leaves, the plants are 40-60 cm tall in their first year at the mature vegetative stage and 1.5-2.0 m tall when flowering in the second year.

## ECONOMIC IMPORTANCE: -

- Among the other vegetables cabbage is one of the easiest crop to established and manage thus most of the people grow in their home garden. Cabbage is especially rich in vit C, a potent anti-oxidant that may protect against heart disease.
- Cabbage is a low calorie vegetable i.e. rich in vitamins minerals and antioxidants. Cabbage contains powerful antioxidants that may help reduce inflammation.
- Red cabbage is particularly high in this nutrient providing 85% of the RDI. Cabbage contains insoluble fiber, which keeps the digestive system healthy by providing fuel for friendly bacteria.

# POTATO

SCIENTIFIC NAME: - *Solanum tuberosum*

FAMILY: - Solanaceae

## DESCRIPTION: -

- The potato is a starchy tuberous crop from the perennial right shade *Solanum tuberosum.* In many contents, Potato refers to the edible tuber. Potatoes were introduced to Europe in the 2nd half of 16th century by the Spanish.
- The size of a potato varies from 1.5 to 2.25 inches in diameter. The shape of the potato varies from long cylinder shape, elliptical, round, oval and long. The flesh colour of tubers may be yellow, white, purple.
- Potato is propagated from tubers, which are commonly known as seeds. They are shown whole or after cutting into pieces. Potato has a wide range of seasonal adaptability.

## ECONOMIC IMPORTANCE: -

- The fleshy part of the root(Potato) is commercially used as a vegetable. Potato is also used to make medicine. People take raw potato juice for stomach disorders and water retention.
- A purified protein powder made from potato is mixed with water and used to control appetite for weight loss. The potato peel and even the potato juice can gently improve skin health. A potato facial or face mask helps treat acne and other six condition.
- The potatoes fiber, potassium, vit C and vit $B_6$ content coupled with lack of cholesterol all support health. Potatoes contain significant amount of fiber. Fiber helps in lower the total amount of cholesterol.

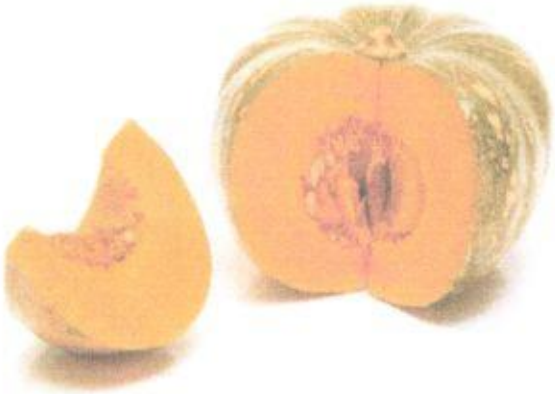
# PUMPKIN

**SCIENTIFIC NAME: -** *Cucurbita pepo*

**FAMILY: -** Cucurbitaceae



## DESCRIPTION: -

- A pumpkin is a cultivar of a squash plant most commonly of *Cucurbita pepo* i.e. round with small slightly ribbed skin and most often deep yellow to orange in colour. The thick sheath contains the seeds and pulp.
- It is the native of North America. Pumpkins are one of the oldest domesticated plants have been used as early as 7,500 to 5,000 BC. The weight of pumpkin generally between 3 to 8 kg. The largest cultivars regularly reach weight of over 34 kg.

## ECONOMIC IMPORTANCE: -

- Pumpkin is a highly nutrient dense food, rich in vit C and minerals but low in calories, as its 94% water. It is also very high in beta-carotene, a carotenoid that your body turns into vit A.
- Moreover, pumpkin seeds are edible nutritious and linked to numerous health benefits. The antioxidants protect skin against sun damage, lower the risk of cancer, eye disease.
- Pumpkins contains antioxidants such as alpha-carotene, beta-carotene and beta-kryptoxanthin. These can neutralize free radicals, stopping them from damaging your cells.

# BRINJAL

SCIENTIFIC NAME: - *Solanum melongena*

FAMILY: - Solanaceae

## DESCRIPTION: -

- *Solanum melongena* is a tropical herbaceous, perennial plant closely related to tomato. The plant has a branching stem and simple, long, flat. The colour of the fruit is variable and can be white, green, yellow, purple or black.
- Brinjal is the native to south eastern Asia. The brinjal is about 8 inches long 5 to 5.5 inches in diameter and weight 2 to 2.5 pounds. About an average size, the plant grows up to 1.5 meter.
- The brinjal plant is a much branched perennial herb but it is usually grown as an annual. The light purple-bluish flowers are solitary and arranged in lateral cymes.

## ECONOMIC IMPORTANCE: -

- Brinjal are a good source of calcium, phosphorous, irons and vitamins. Its green leaves are the main source of vit C. Dark purple brinjal has more vit C than those with white.
- It is supposed to contain certain mediational property and white brinjal is said to be good for diabetic patients. The fruits are employed as a cure for toothache. It is also an excellent remedy for those who suffering from lever complaints.
- Brinjal is consumed as vegetable. The roots are antiasthmatic and general stimulant. The leaves are used in bronchitis, asthma. The fruit juice is employed for otitis.

## CHAPTER-III

# PARWAL

SCIENTIFIC NAME: - *Trichosanthes dioica*

FAMILY: - **Cucurbitaceae**

## DESCRIPTION: -

- *Trichosanthes dioica* also known as pointed gourd, is a vine plant in the Cucurbitaceae family. It is a dioecious vine plant with heart shaped leaves and is grown on a trellis.
- The fruits are green with white or no stripe. Size can vary from small and round to thick and long 2 to 6 inches. The plant remains dormant during the winter season and prefers a fertile well drained sandy loam soil due to its susceptibility to water logging.

## ECONOMIC IMPORTANCE: -

- Healthy vegetables like parwal are good for digestion. The vegetables are loaded with good amount of fiber there by improves digestion. Parwal is helpful in receiving stool there by curing constipation.
- Another one of the best health benefits of pointed gourd is that it provides you relief from gastro intestinal and a few problems associated with the liver.
- Regular use of parwal helps in weight loss. Consumption of parwal on regular basis can purify blood. It not only cleans the blood tissue but also makes our skin look great.

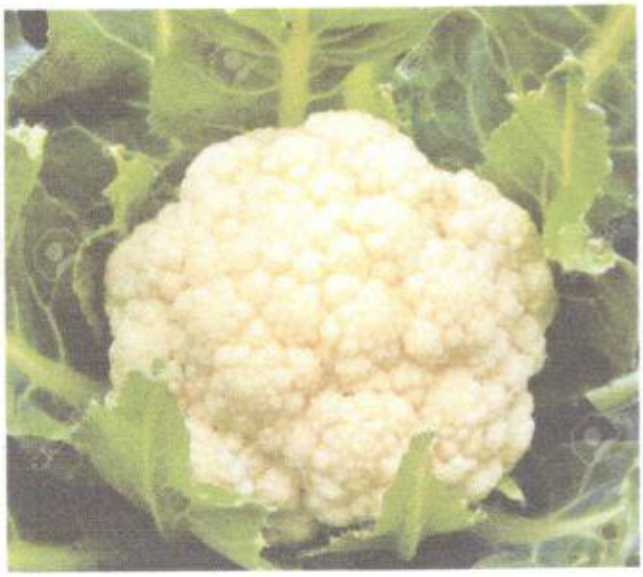
# CAULIFLOWER

SCIENTIFIC NAME: - *Brassica oleraceae*

FAMILY: - Brassicaceae



## DESCRIPTION: -

- Cauliflower is a cruciferous vegetable i.e. naturally high in fiber and B-vitamins. Cauliflower is one of the several vegetables in the species *Brassica oleraceae* in the genus Brassica, which is in the family Brassicaceae. It is an annual plant that reproduces by seeds.
- It is originated from North-east Mediterranean. Coloured cauliflower is available in green known as Broccoflower.
- A matured cauliflower is 6 to 8 inches i.e. 15 to 20 cm. A medium size cauliflower is about 5 to 6 inches on 13 cm to 15.25 cm across diameter weight 21 net wet or 588 grams.

## *ECONOMIC* IMPORTANCE: -

- Cauliflower is a cruciferous vegetable i.e. naturally high in fiber and vitamin B. It provides antioxidant and phytonutrients that can protect against cancer. It also contains fiber to enhance weight loss and digestion. Choline I.e. essential for learning and memory and many other important nutrients.
- It helps in the transmission of nerve impulses assists in the absorption of fat and reduces chronic inflammation. Cauliflower is high in fiber and water. Both are important for preventing constipation. Maintaining a healthy digestive tract and lowering risk of colon cancer.

# CAPSICUM

SCIENTIFIC NAME: - *Capsicum annuum*

FAMILY: - Solanaceae

## DESCRIPTION: -

- Capsicum are seed pods. They can be red, green, yellow, orange, white, purple brown and lime green.
- Capsicum are sweet and juicy with a mild spicy flavor. Red capsicums, being ripen, are sweeter than green capsicum.
- Shape also varies with each variety from the more commonly found blocky shape to a pointy capsicum.
- All capsicums are good source of vitamin C and a source of vitamin $B_6$.
- Red capsicum contains higher levels of vitamin C compared to the other colours and both red and orange capsicums are a source of vitamin A.

## ECONOMIC IMPORTANCE: -

- Capsicum is an important cash crop in India and is grown for its pungent fruits.
- Both red and green capsicums are used to import pungency to the food. Red chili powder is used as condiment in every Indian household. Green chilies of some varieties are used as vegetables.
- It is also used for preparation of chutneys, masala, sauces and pickles. There is demand for export of raw chilies and chili powder.

# RADISH

SCIENTICFIC NAME: - *Raphanous raphanistrum*

FAMILY: - Brassicaceae

## DESCRIPTION: -

- Radish are annual or biennial crops grown for their swollen tap roots, which can be globular, tapering or cylindrical.
- The root skin colour ranges from white through pink, red, purple, yellow and green to black, but the flesh is usually white.
- Leaves are usually arranging in a rosette; they have a lyrate shape.
- The white flowers are born on a racemose inflorescence. The radish is a diploid species and have 18 chromosomes.

## ECONOMIC IMPORTANCE: -

- Radish is important as a root vegetable, a leafy vegetable, a fruit vegetable, a crop and also a cover plant.
- Some radish lines have high salt tolerance and disease resistance.
- Radish is known to control damages to our red blood cells and in the process also increase oxygen supply to the blood.
- The root vegetable cleans the stomach, thus detoxifies the system.

## CHAPTER-IV

# PEA

**SCIENTIFIC NAME: -** *Pisum sativum*

FAMILY: - Fabaceae

## DESCRIPTION: -

- *Pisum sativum* is an annual plant, with a life cycle of one year. It is a cool season crop grown in any parts of the world.
- The average pea weigh between 0.1 and 0.36 gm. Immature peas are used as a vegetable, fresh, frozen.
- A pea is most commonly green, occasionally, golden yellow or purple, pod shaped vegetables.
- Peas have both low growing and vining cultivars. The seeds may be planted as soon as the soil temperature reaches 10°C.

## ECONOMIC IMPORTANCE: -

- Green pods of watana are fried with salt and seeds are eaten. Matured seeds are used as vegetables or mixed in other food articles like pulav.
- Husk and grinded seeds are fed to cattle. It contains high percentage of digestive proteins, vitamin A and Vitamin C.
- It is also rich in minerals like calcium and phosphorous peas are canned, frozen and dehydrated. It is also grown as mixed crop with oat and used as fooder.

# SPINACH

SCIENTIFIC NAME: - *Spinacia oleraceae*

FAMILY: - Amaranthaceae

## DESCRIPTION: -

- Spinach is a leafy herbaceous annual plant, grown for its leaves which are used as vegetables.
- The spinach plant has simple leaves which stem from the center of the plant and measure about 2-30 cm long and 1 to 15 cm across.
- The leaves grew in a rosette and can appear wrinkled or flat. The plant produces small yellow green flower which are 3-4 mm in diameter. The flowers produce small fruit clusters which contain seeds.
- Spinach is an annual and survives only one growing season and can reach 30 cm height.

## ECONOMIC IMPORTANCE: -

- Spinach is a superfood. It is loaded with tones of nutrients in a low calorie package.
- Dark, leafy, greens like spinach are important for skin, hair and bone health. They also provide iron, protein, vitamins and minerals.
- The possible health benefits of consuming spinach include improving blood glucose control in people with diabetes and lowering the risk of cancer.
- It improves bone health, as well as suppling minerals and vitamins. Spinach can be added as an ingredient to many dishes and either cooked or served raw.

# BEETROOT

SCIENTIFIC NAME: -*Beta vulgaris*

FAMILY: - Chenopodiaceae

## DESCRIPTION: -

- Beets are herbaceous biennial root vegetables grown for their edible root. The plant is usually erect with a long main root and a rosette of leaves growing on stems.
- The leaves are oval in shape, arrange alternately on the stem and grown 20-40 cm in length. The roots are usually red in colour.
- The plant produces sessile green flowers and can reach 1-2 m in height. Beets are usually grown as annual plants harvested after one growing season.
- Beets may also have referred to as beet root, garden beet or spinach beet.

## ECONOMIC IMPORTANCE: -

- Beet root decreases the risk of obesity, overall mortality, diabetes and heart disease. Blood pressure is significantly lowered by consuming beet root juice.
- Beet roots helps to prevent constipation and promote regularity for a healthy digestive tract.
- Beet roots provide 1% of daily needs vitamin A.

# BITTER GOURD

SCIENTIFIC NAME: - *Momordica charantia*

FAMILY: - Cucurbitaceae

## DESCRIPTION: -

- Bitter melon comes in a variety of shapes and sizes. The cultivar common in China is 20–30 cm (7.9–11.8 in) long, oblong with bluntly tapering ends and pale green in color, with a gently undulating, warty surface.
- The bitter melon more typical of India has a narrower shape with pointed ends, and a surface covered with jagged, triangular "teeth" and ridges. It is green to white in color. Between these two extremes are any number of intermediate forms.
- Some bear miniature fruit of only 6–10 cm (2.4–3.9 in) in length, which may be served individually as stuffed vegetables. These miniature fruit are popular in Bangladesh.

## ECONOMIC IMPORTANCE: -

- It also maintains the blood pressure of the body as it is rich in potassium, which absorbs excessive sodium in the body. It is rich in iron and folic acid which are known to decrease the risk of stroke and keep your heart healthy.
- Bitter gourd juice has powerful anti-oxidants along with vitamin A and C which prevent premature skin ageing and diminishes wrinkles.
- Bitter gourd fights viruses and bacteria and strengthens your immunity. It prevents allergies and indigestion. The antioxidants work as powerful defense mechanisms against illness and also help fight free-radical damage that can cause various types of cancer.

## CHAPTER-V

# RIDGE GOURD

SCIENTIFIC NAME: - *Luffa acutangula*

FAMILY: - Cucurbitaceae

## DESCRIPTION: -

- It is a dark green, ridged and tapering pretty vegetable. It has white pulp with white seeds embedded in spongy flesh. A ridge gourd also commonly known as Turai or Turiya is a well beloved in India. Its hard skin is peeled off and chopped and cooked as desired.
- Ridge gourd can be stuffed with zesty filling made from spices like sesame seeds, coriander seeds, cumin seeds and red chilies that are roasted and ground to a fine paste along with ginger, garlic, onions and tamarind, has a mingling of flavors: - sweet-spicy-tangy. A delicious stuffed curry that goes well with both rice and rotis.
- Fresh ridge gourd is best stored in a refrigerator. They can be wrapped in plastic bag and will stay crisp and firm for a week.

## ECONOMIC IMPORTANCE: -

- Ridge gourd is low in saturated fat and cholesterol, high in dietary fiber, vitamin C, riboflavin, zinc, thiamin, iron, magnesium and manganese.
- The nutritional value of gourd makes it suitable for maintaining optimum health and weight loss. It has excellent cooling properties.
- Ridge gourd is extremely rich in dietary fibre and enriched with all the vital elements that include Vitamin-C, zinc, iron, riboflavin, magnesium, thiamine and traces of another mineral.
- It is low in saturated fat, cholesterol and calories that aids in weight loss.
- Ridge gourd contains good amount of cellulose and high in water content that helps to relieve from constipation.

# KNOL-KHOL

SCIENTIFIC NAME: - *Brassica caulorapa*

FAMILY: - Cruciferae

## DESCRIPTION: -

- Knol-Khol is successfully grown on all types of soil. But the sandy loam and clay loam soils are best suited for knol-khol crops.
- The land should be well prepared and of good tilth for sowing of Knol- Knol, 5- 6 ploughing should be given to prepare a good tilth. After ploughing, planking is essential to make soil pulverized and leveled.
- Harmful weeds and stubbles of previous crop should be removed before the transplanting of this crop. Aldrin or Hefted or Heptachlor 5 % or BEC 10 % should be applied @ 10 – 15 kg percent with the last preparatory tillage to check the infestation of termites and cutworm.

## ECONOMIC IMPORTANCE: -

- **Knol-khol** (L. Brassica oleracea) rich in the antioxidant vitamins C, E and carotene and are good sources of dietary fiber. They also contain sulphoraphanes and other is thiocyanates, which are believed to stimulate the production of protective enzymes in the body.
- Improves Digestion. Just like most of the cruciferous vegetables, kohlrabi is a great source of **dietary fiber** that can seriously improve your digestive health.
- It helps us move, breathe, react, and function every single day. As such, the high potassium content in this vegetable makes it a great addition to your diet to keep alert, energetic, and in great shape.

# SNAKE GOURD

SCIENTIFIC NAME: - *Trichosanthes cucumerina*

FAMILY: - Cucurbitaceae

## DESCRIPTION: -

- **Snake gourd**, (*Trichosanthes cucumerina*), also called **serpent gourd**, rapid-growing vine of the gourd family (Cucurbitaceae), cultivated for its oddly shaped edible fruits. The snake gourd is native to southeastern Asia and Australia and is also grown in parts of tropical Africa.
- The whole fruit is eaten as a vegetable when young and can be dried and used as a soap. The leaves and shoots are also edible, and the pulp of mature fruits is sometimes eaten as a tomato substitute.
- The snake gourd is an annual plant with forked tendrils and kidney- or heart-shaped leaves that are sometimes palmately lobed. The white unisexual flowers have long lacy fringes on the five petals and open at night.

## ECONOMIC IMPORTANCE: -

- Snake gourd, which is also known as Trichosanthes cucumerina has been found to help reduce bilious fever. If you add a bit of charrette and honey, the efficacy of snake gourd is increased and it will be able to treat bilious fever quickly and effectively.
- Many cases have been recorded where snake gourd is used along with coriander leaves, where this mixture was found to be more effective in treating bilious fever.
- This juice has been used as an emetic to induce vomiting. It has been found to be effective in treating malarial fever as well.

# OKRA

SCIENTIFIC NAME: - *Abelmoschus esculentus*

FAMILY: - **Malvaceae**

## DESCRIPTION: -

- **Okra**, (*Abelmoschus esculentus*), herbaceous hairy annual plant of the mallow family (Malvaceae). It is native to the tropics of the Eastern Hemisphere and is widely cultivated or naturalized in the tropics and subtropics of the Western Hemisphere for its edible fruit.
- The leaves are heart-shaped and three- to five-lobed. The flowers are yellow with a crimson center. The fruit or pod, hairy at the base, is a tapering 10-angled capsule, 10–25 cm (4–10 inches) in length (except in the dwarf varieties), that contains numerous oval dark-coloured seeds. Only the tender unripe fruit is eaten.
- The fruit is grown on a large scale in the vicinity of Istanbul. In some countries the seeds are used as a substitute for coffee.

## ECONOMIC IMPORTANCE: -

- The leaves and immature fruit long have been popular in the East for use in poultices to relieve pain. Okra is a warm-season vegetable, also known as gumbo or ladies' fingers. It is a good source of minerals, vitamins, and fiber. It contains a characteristic viscous juice that can be used to thicken sauces.
- Okra is also a source of antioxidants. Okra seeds contain oligomeric catechins and flavonoid derivatives, both of which have been linked to a lower risk of cancer.
- The gumbo itself contains quercetin derivatives, and both pods and seeds contain phenolic compounds.
- These compounds are believed to have antioxidant, antimicrobial, and anti-inflammatory properties.

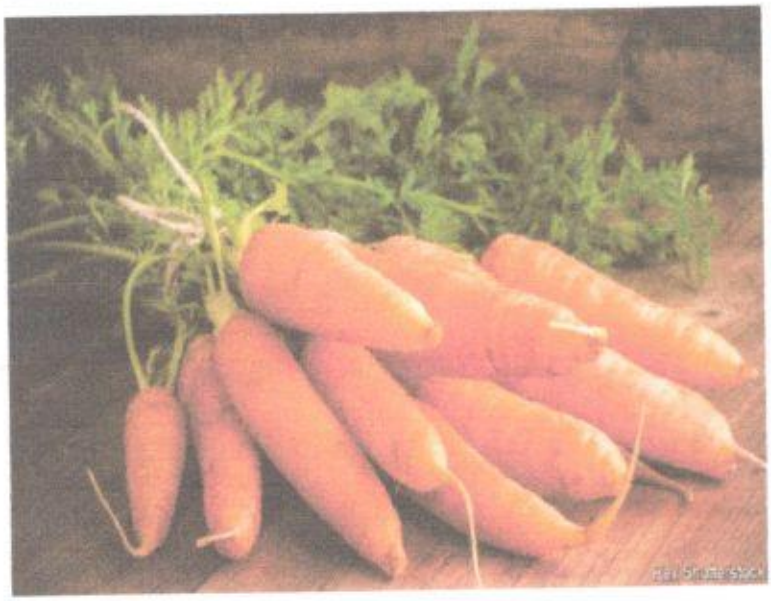
# CARROT

SCIENTIFIC NAME: - *Daucus carota*

FAMILY: - Apiaceae



## DESCRIPTION: -

- Carrot, *Daucus carota*, is an edible, biennial herb in the family Apiaceae grown for its edible root. The carrot plant produces a rosette of 8–12 leaves above ground and a fleshy conical taproot below ground.
- The plant produces small (2 mm) flowers which are white, red or purple in color. The root can grow to between 5 and 50 cm (2.0–20 in) long and reach 5 cm (2.0 in) in diameter. The foliage of the plant can reach a height of 150 cm (59.1 in) when in flower.
- The carrot plant can be annual or biennial and may also be referred to as wild carrot. The plant is believed to have originated in Europe or the Western Mediterranean.

## ECONOMIC IMPORTANCE: -

- Carrot roots are eaten as a vegetable and can be consumed fresh or cooked. Carrot juice is consumed as a beverage. The leaves of the plant can be used as feed for animals.
- Carrots have a number of health benefits. They are a weight loss friendly food and have been linked to lower cholesterol levels and improved eye health. The carotene antioxidants in them have also been linked to reduced risk of cancer.
- They are found in many colours, including yellow, white, orange, red and purple. The traditional orange coloured carrots get their bright colour from beta-carotene, an antioxidant that is converted to vitamin A in the body.

# CONCLUSION

In conclusion, there are many benefits to consuming fruits and vegetables daily. We know from the healthy plate example, that fruits and vegetables will not supply us with everything our body needs but it does make up a good portion of it. Hopefully this web quest provided you with plenty of information that will encourage not just to eat more fruits and vegetables but to living a healthy lifestyle and eating a healthy diet that includes all food groups.

## ABSTRACT

India is home to a rich diversity of wildlife, including many critically endangered species that are at risk of extinction. Some of the most critically endangered animals in India include the Bengal tiger, the Indian rhinoceros, the Asiatic lion, the snow leopard, the Indian elephant, the blackbuck, the red panda, and the gharial. These species face threats from habitat loss, poaching, and human-wildlife conflict. Conservation efforts, including protected areas, anti-poaching measures, and community involvement, are crucial to preserving these species and their ecosystems for future generations. Unfortunately, many of India's animal species are threatened due to a range of human activities. One major threat is habitat loss and fragmentation caused by human development such as agriculture, mining, and urbanization. This often leads to wildlife being forced into smaller and more isolated habitats, which can reduce their genetic diversity and increase their vulnerability to other threats.

## INTRODUCTION

An endangered species is a species that is very likely to become extinct in the near future either world wide or in a particular political jurisdiction. As of 2021, of the 120,372 species currently tracked by the IUCN, there are 8,404 species that are considered to be Critically Endangered (IUCN Red list Retrieved November 17,2021). As the IUCN Red List does not consider a species extinct until extensive, targeted surveys have been conducted, species that are possibly extinct are still listed as Critically Endangered. IUCN maintains a list (IUCN Red list.org Retrieved 2017-12-10) of "possibly extinct" and "possibly extinct in the wild" species, modelled on categories used by BirdLife International to categorize these taxa. The IUCN Red List provides the public with information regarding the conservation status of animal, fungi, and plant species (IUCN Red list Retrieved August 13,2020). It divides various species into seven different categories of conservation that are based on habitat range, population size, habitat, threats, etc. Each category representing a different level of global extinction risk. Species that are considered to be Critically Endangered are placed within the "threatened" category (National Geography March 17,2011. Retrieved August 13 2020). Critically Endangered in the Red List, a species must meet any of the following criteria:

A: Population Size Reduction

1. The rate of reduction is measured either over a 10 year span or across three different generations within that species.
2. If the reasons for population reduction no longer occur and can be Reversed, the population needs to have been reduced by at least 90%
3. If not, then the population needs to have been reduced by at least 80%

B: Reduction Across a Geographic Range.

1.This reduction must occur over less than 100 km² OR the area of occupancy is less 10km2

I. Severe habitat fragmentation or exiting at just location
II. Decline in extent of occurance , area of occupancy , area /extent /quality of habitat ,number of location /subpopulation
III. Population Decline .

C: Population Size Reduction

1.The population size must be reduced to numbers of less than 50 MI.

Principal

## REVIEW AND LITARATURE

"Conserving India's Forest: An Overview of Forest Conservation Efforts in India with Case Studies "edited by Ajay Rastogi: This book provides an overview of forest conservation efforts in India including the protection of critically endangered species. The author highlights the importance of conserving forest as habitat for these animals and provide case studies of successful incitive in various parts of the country.

Sawfish: A Global Strategy for conservation "by Nick Dulvy, Rachel C, Cavanagh and Sonja V. Fordham. This book provides an overview of of the biology, ecology and conservation status of the large tooth sawfish. It also provides recommendations for conservation action and policy initiatives to protect sawfish populations around the world.

The Gharial "by Romulus Whitaker-This book provide a detailed account of the biological. behavior, and conservation of the gharial, a critically endangered species of crocodile found in India

"Wildlife conservation in India" by Asad R. Rahmani. This book covers a wide range topic, including the history of conservation in India, the various laws and policies related to wildlife conservation and the challenges facing conservation efforts in the country Rahmani also provides detailed profiles of some of the most critically endangered species in Indi

"Leatherback turtles: The last Giants" by Shanker. This book provides an in depth look at the biology and conservation of Leatherback turtles, including their current status and threats to their survival. Overall, these books provide valuable insights in to the critically endangerment of animal species in India and the urgent need for conservation efforts to save them from extinction.

Principal
Derabish College, Derabish

## AIM AND OBJECTIVE

The article focuses on the various critically endangered animal species of India.

The objective of the current study is:

I. To study those species which are critically endangered and have greater chances to be extinct in the future.

II. To study these specie's habit, habitat, weather and food preference.

III. To study their cause for being endangered.

Principal
Derabish College, Derabish

## MATERIALS AND METHODS:

L. The critically endangered species in India based on IUCN Red List are identified and the literature is collected regarding them.

II. The data on population, habitat and threats to each species are collected.

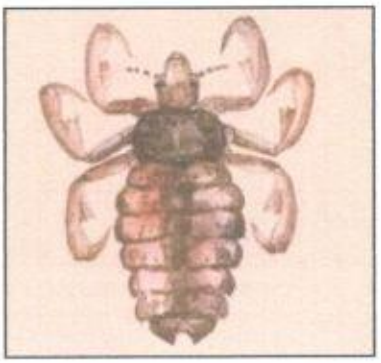
III. The interviews with experts and stakeholders are conducted to gather insights into conservation efforts and challenges for each species.

IV. The prioritization framework is developed for Conservation efforts based on urgency of the threat, feasibility of conservation measure and potential impact on the species.

V. The effectiveness of current conservation efforts based on finding are evaluated.

## MAMMALS

1. The **Pygmy Hog** (*Porcula salvania*) is the world's smallest wild pig, with adults weighing only 8 kgs. This species constructsa nest throughout the year. It is one of the most useful indicators of the management status of grassland habitats. The grasslands where the pygmy hog resides are crucial for the survival of other endangered species suchas Indian Rhinoceros (*Rhinoceros unicornis*),Swamp Deer (*Cervus duvauceli*), Wild Buffalo(*Bubalus arnee*), Hispid Hare (*Caprolagus hispidus*), Bengal Florican (*Eupodotis bengalensis*) and Swamp Francolin (*Francolinus gularis*). In 1996, a captive-breeding programme of the species was initiated in Assam, and some hogs were reintroduced in Sonai Rupai area in 2009.



* **Pygmy hog-sucking Louse** (*Haematopinus oliveri*), a parasite that feeds only on Pygmy Hogs will also fall in the same risk category of critically endangered as its survival is linked to that of the host species.

**Habitat:** Relatively undisturbed, tall 'terai' grasslands.

**Distribution:** Formerly, the species was more widely distributed along the southern Himalayan foothills but now is restricted to only a single remnant population in Manas Wildlife Sanctuary andits buffer reserves.

**Threats:** The main threats are loss and degradation of grasslands, dry-season burning, livestock grazing and afforestation of grasslands. Hunting is also a threat to the remnant populations.

Principal
Derabish College, Derabish

2-4. **Andaman White-toothed Shrew** (*Crocidura andamanensis*), **Jenkin's Andaman Spiny Shrew** (*Crocidura jenkinsi*) and the **Nicobar White-tailed Shrew** (*Crocidura nicobarica*) are endemic to India. They are usually active by twilight or in the night and have specialized habitat requirements.

**Habitat:** Leaf litter and rock crevices.

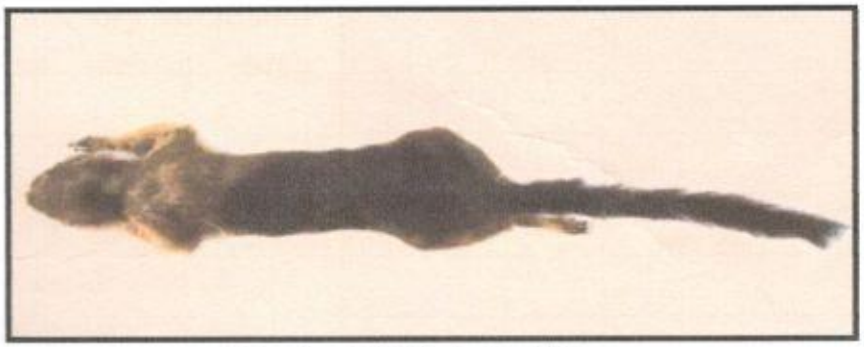
**Distribution:** The Andaman White-toothed Shrew is found on Mount Harriet in the South Andaman Islands. The Jenkin's Andaman Spiny Shrew is found on Wright Myo and Mount Harrietin the South Andaman Islands.

The Nicobar White-tailed Shrew (*Crocidura nicobarica*) is found in the southern tip of Greater Nicobar Island and is also recorded in the area extending from the Campbell Bay National Park to the Galathea River in the Andaman and Nicobar Islands.

**Threats:** Habitat loss due to selective logging, natural disasters such as the tsunami and drasticweather changes.

Andaman White-toothed Shrew

Jenkin's Andaman Spiny Shrew



Nicobar White-tailed Shrew

DERABISH COLLEGE * ESTD-1981 * KENDRAPARA

5. **Kondana Rat** (*Millardia kondana*) is a nocturnal burrowing rodent that is found only in India. It is sometimes known to build nests.

**Habitat:** Tropical and subtropical dry deciduous forests and tropical scrub.

**Distribution:** Known only from the smallSinhagarh Plateau (about one km$^2$), near Pune in Maharashtra. Reported from an elevation of about 1,270 m above meansea level.

**Threats:** Major threats are habitat loss, overgrazing of vegetation and disturbance from tourism andrecreational activities.

6. The **Large Rock Rat** or **Elvira Rat** (*Cremnomys elvira*) is a medium sized, nocturnal and burrowing rodent that is endemic to India.

**Habitat:** Tropical dry deciduous shrubland forest, seen in rocky areas.

**Distribution:** Known only from Eastern Ghats of Tamil Nadu. Recorded from anelevation of about 600 m above mean sealevel.

**Threats:** Major threats are habitat loss, conversion of forests and fuel wood collection.

Principal
Derabish College, Derabish
Kendrapara

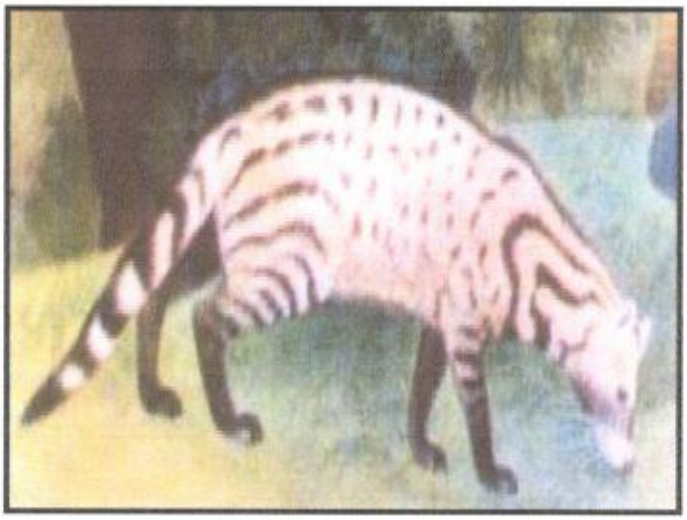
7. The **Namdapha Flying Squirrel** (*Biswamoyopterus biswasi*) is a unique(the only one in its genus) flying squirrelthat is restricted to a single valley in the Namdapha Tiger Reserve in Arunachal Pradesh.

**Habitat:** Tropical forest.

**Distribution:** Found only in Namdapha Tiger Reserve in Arunachal Pradesh.

**Threats:** Hunted for food.

8. The **Malabar Civet** (*Viverra civettina*) is considered to be one of the world's rarest mammals. It is endemic to India and was first reported from Travancore, Kerala. It is nocturnal in nature and found exclusively in the Western Ghats.



**Habitat:** Wooded plains and hill slopes ofevergreen rainforests.

**Distribution:** Western Ghats.

**Threats:** Deforestation and commercial plantations are major threats.

Principal
Derabish College, Derabish
Kendrapara

9-10. The **Sumatran Rhinoceros** (*Dicerorhinus sumatrensis*) is the smallest and most endangered of the five rhinoceros species. It is now thought to be regionally extinct in India, though it onceoccurred in the foothills of the Himalayas and north-east India.The **Javan Rhinoceros** (*Rhinoceros sondaicus*) is also believed to be extinct in India and only a small number survivein Java and Vietnam.

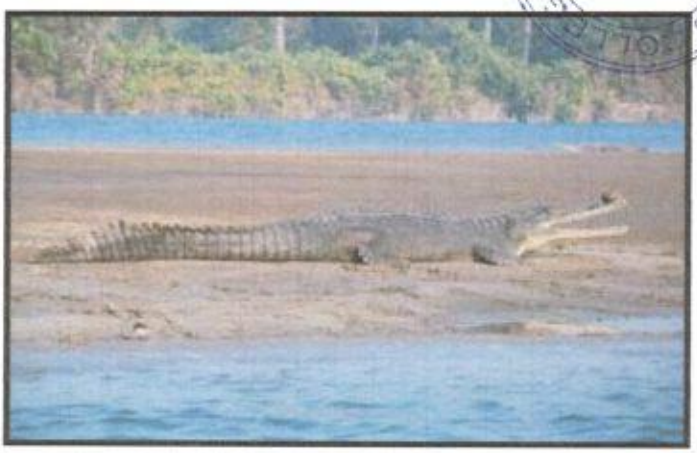
## REPTILES

1. The **Gharial** (*Gavialis gangeticus*) is the most uniquely evolved crocodilian in theworld, a specialized, river-dwelling, fish- eater. The dire condition of the gharial reflects the tragedy of our rivers, where westand to not only lose other endangered taxa such as the Ganges River Dolphin (*Platanista gangetica*) but also the use of their waters for human consumption and other needs.



*Andrew Leith Adams (1867) wrote: "abounds in all the great rivers ofNorthern India...Ten or twenty may be frequently seen together."*

**Habitat:** Clean rivers with sand banks.

**Distribution:** Only viable population
in the National Chambal Sanctuary, spread across three states of Uttar Pradesh, Rajasthan and Madhya Pradesh in India. Small non-breeding populations exist in Son, Gandak, Hoogly and Ghagra rivers. Now extinct in Myanmar, Pakistan, Bhutan and Bangladesh.

**Threats:** The combined effects of dams, barrages, artificial embankments, change in river course, pollution, sand-mining, riparian agriculture and ingress of domestic and feral livestock causedirreversible loss of riverine habitat and consequently of the gharial.

Principal

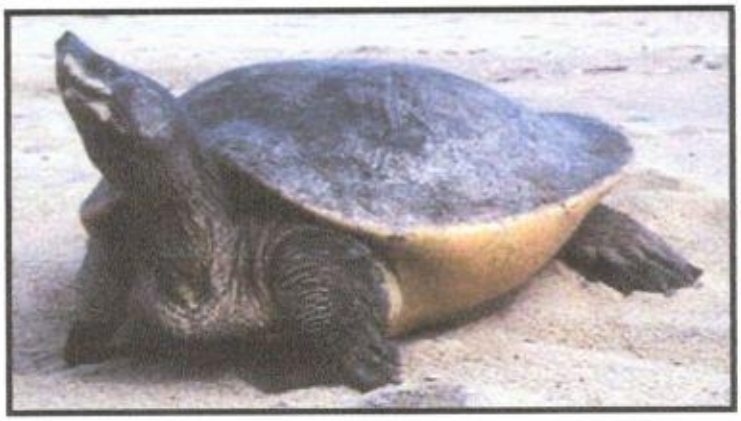
2. The **Hawksbill Turtle** (*Eretmochelys imbricata*) is a heavily exploited species. The species is migratory in nature andnesting occurs in about 70 countries across the world. Maturation is slow andis estimated between 25 – 40 years.

**Habitat:** Nesting occurs on insular,sandy beaches.

**Distribution:** In India they are found in the Andaman and Nicobar Islands, thecoast of Tamil Nadu and Orissa.

**Threats:** Turtle shell trade, egg collection, slaughter for meat, oil pollution and destruction ofnesting and foraging habitats.

3. **Four-toed River Terrapin or River Terrapin** (*Batagur baska*) is a critically endangered turtle. The omnivorous diet of the river terrapin and other terrapin species makes them an essential part of the efficient clean-up systems of aquatic habitats.



**Habitat:** Freshwater rivers and lakes.

**Distribution:** Bangladesh, Cambodia,India, Indonesia and Malaysia.

**Threats:** Use of flesh for medicinal purposes, demand for eggs, which are considered a delicacy.

Principal
Derabish College, Derabish
Kendrapara

4. The **Leatherback Turtle** (*Dermochelys coriacea*) is the largest of the living sea turtles, weighing as much as 900 kg. Adult leatherback turtles are excellent swimmers. They swim an average of 45-65 km a day, travel upto 15,000km per year and can dive as deep as 1200 m. Jellyfish is their primary food. The population spikes of leatherbacks coincide with abundance of jellyfish,

making them important top-predators in marine environments.

**Habitat:** Tropical and subtropical oceans .

**Distribution:** Found in tropical and temperate waters of the Atlantic, Pacific, and Indian Oceans.

**Threats:**

High sea fishing operations, harvesting of eggs, destruction of nests by wild predators and domesticated species such as cats, dogs and pigs. Artificial lighting disorients hatchlings and adults and causes them to migrate inland rather than towards the sea. Threats to habitat includeconstruction, mining and plantation of exotics.

Principal
Derabish College, Derabish

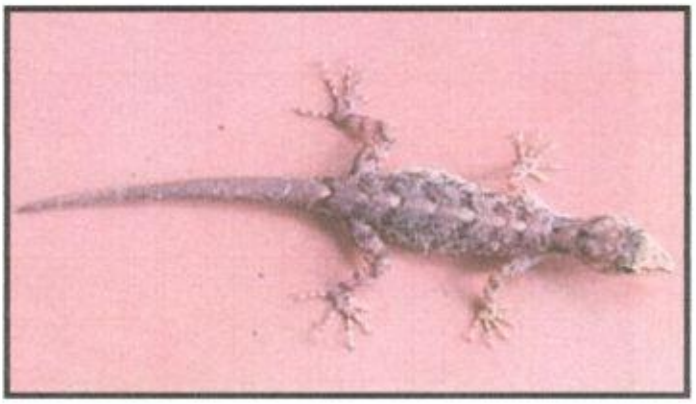
5. **Red-crowned Roofed Turtle** or the Bengal Roof Turtle (*Batagur kachuga*) is a critically endangered turtle mainly restricted to the Ganga basin. Males have a bright red coloration during the breeding season.

**Habitat:** Deep, flowing rivers but with terrestrial nest sites.

**Distribution:** Found in India, Bangladesh and Nepal. In India it resides basically in the watershed of the Ganga.

**Threats:** Water development projects, water pollution, human disturbance and poaching for theillegal wildlife market.

6. **Sispara day gecko** (*Cnemaspis sisparensis*) is a large gecko which dwells usually in forests, it is largely insectivorous and is active by night.



**Distribution:** Endemic to WesternGhats, and found in Sispara, Nilgiris, Kavalai near Cochin.

**Threats:** Habitat conversion and modification.

PRINCIPAL
DERABISH COLLEGE

## AMPHIBIANS

1. The **Anamalai Flying Frog** (*Rhacophorus pseudomalabaricus*) is confined to rainforests of south- western Ghats and lives at elevations greater than 1,000 m above mean sealevel.

**Distribution:** It is found in AndiparaiShola, Pudothottam and the AnamalaiHills of Tamil Nadu and Kerala.

**Threats:** Conversion of forest to cultivated land (including timber and non-timber plantations) outside the Indira Gandhi National Park, and extraction of woodand timber by local people are the major threats to this species.

2. The **Gundia Indian Frog** (*Indirana gundia*) is found at an elevation of around 200 m above mean sea level.

**Distribution:** Known only to exist in Gundia, Kempholey in the Western Ghats region of Karnataka, South India.

**Threats:** Habitat loss caused dueto intensive livestock production, harvesting of wood and timber by local people, road construction, andthe development of tourism facilities.

Principal
Derabish College, Derabish
Kendranara

3. The **Kerala Indian Frog** (*Indirana phrynoderma*) is found at elevations of around 500 m above mean sea level. Due to the presence of prominent warts and tubercles of various sizes and glandular folds on its dorsal surface, it is commonly also known as the toad-skinned frog.

**Distribution:** Anamalai Hills of Kerala and Tamil Nadu in the Western Ghats of south India.

**Threats:** Habitat loss due to subsistence wood collection is the major threat to this species.

4 The **Charles Darwin's Frog** (*Ingeranacharlesdarwini*) is found at elevationsbelow 500 m above mean sea level.

**Distribution:** This species is currently restricted to its type locality of Mount Harriet in South Andaman Island andSaddle Peak in the North Andaman Island, India.

**Threats:** Clear felling of forest

Principal
Derabish College, Derabish
Kendrapara

5. The **Kottigehar Bubble-nest Frog** (*Micrixalus kottigeharensis*) is only known to occur in Kottigehar, Kadur in the Western Ghats of Karnataka state. Its distribution is restricted to elevation around 1000 m above mean sea level.

**Distribution:** This species is known to occur in Kottigehar, Kadur in the Hassan district and Bhadra in Chikamangalur district, Karnataka, India.

**Threats:** Habitat loss as a result of conversion to agriculture, including paddy fields and cash crops such as coconut and cashew.

6.. The **Amboli Bush Frog** (*Pseudophilautusamboli*) was recently discovered in 2009 in Amboli forest in the Western Ghats of Maharashtra. It is found at elevationsranging from 550 m to 940 m above mean sea level.

**Distribution:** This species has been recorded from its type locality of Amboliforest, Sawantwadi district; and Amba, Kolhapur district of Maharashtra; Londa, Belgaum district, Jog Falls-Mavingundi, Shimoga district, Castle Rock, Uttara Kannada district, Kudremukh-Malleshwaram, Chikamangalur districtof Karnataka.

**Threats:** Habitat loss and fragmentation due to urbanization and tourism development are themajor threats to this species.

7. The **Chalazodes Bubble-Nest Frog** (*Raorchestes chalazodes*) was described in 1876 based on a single female specimen, from "Travancore", south India. There was no authentic report of this species since 1876 until its rediscovery in Febuary2011.

**Distribution:** All recorded specimens havebeen from the Western Ghats, India.

**Threats:** Conversion of forest tointensively cultivated areas.

8. The **Small Bush Frog** (*Raorchestes chotta*)is the smallest bush frog found in Indiawith a snout to vent length of 1.7 cm only. It was recently discovered in 2009 in Ponmudi, Kerala in the Western Ghats.It is found at elevation of 980 m above mean sea level.

**Distribution:** Known only to occur in Ponmudi in Thiruvananthapuram district of Kerala, south India.

**Threats:** Extensive tea and Acacia plantations threaten the habitat of this species. While the species has been found to occur in abandoned plantations, its decline suggests that this species may not be tolerant to habitat changes or other unknown and less obvious threats.

Principal
Derabish College, Derabish

9. The **Green-eyed Bush Frog** (*Raorchestes chlorosomma)* was discovered in 2009 from Munnar in Idukki district of Kerala. This species has greyish green iris with irregular brown lines, bordered by a blue ring.

**Distribution:** Known only to occur in the type locality of Munnar, Idukki district, Kerala in the Western Ghats ofSouth India.

**Threats:** Extensive degradation of habitat by large-scale tea, eucalyptus and wattle plantations. The expanding tourism industry is also becoming a cause of concern. Though the species seems to be adaptable, its tolerance to degraded habitats is not precisely known.

10. The **Griet Bush Frog** (*Raorchestes griet*) is a small frog of snout to vent length rangingfrom 2-2.2 cm only. This species occurs atelevations between 600–1, 800 m abovemean sea level.

**Distribution:** Munnar, Devikulam and Vagaman in Idukki district of Kerala; and Anamalai Hills and Valparai in Coimbatore district of Tamil Nadu.

**Threats:** Habitat fragmentation due to tea and eucalyptus plantations. It is not likely to survive in the face of extensive habitat loss.

Principal
Derabish College, Derabish

11. The **Kaikatt's Bush Frog** (*Raorchestes kaikatti*) was discovered in 2009 from Kaikatti-Nelliyampathi, in the Western Ghats of Kerala. This species occurs at an altitude of 1000 m above mean sea level.

**Distribution:** Known only to occur in the type locality Kaikatti-Nelliyampathi in Palakkad district of Kerala, south India. It is believed to be endemic to the Nelliyampathi Hills.

**Threats:** Habitat loss and fragmentation due to small and large-scale agricultural practices and infrastructure development for tourism over the past five years.

12. The **Mark's Bush Frog** (*Raorchestes marki*)was discovered in 2009 from Kaikatti-Nelliyampathi, in the Western Ghats ofKerala. This species is found at an altitudeof 1000 m above mean sea level. Mark'sBush frog is a small frog with snout to vent length ranging between 2.1-3 cm only.

**Distribution:** Currently known to occur only in Kaikatti-Nelliyampathi inPalakkad district, Kerala, India.

**Threats:** Habitat loss and fragmentation due to small and large-scale agricultural practices, infrastructure development and construction for tourism over the last five years. However,adaptability of this species to disturbed environments is not known.

Principal
Derabish College, Derabish
Kendranara

13. The **Munnar Bush Frog** (*Raorchestes munnarensis*) was discovered in 2009 from Munnar in Idukki district of Kerala. It is found at an elevation of about 1,400m above mean sea level.

**Distribution:** Currently known only to occur in two locations, Devikulam and Munnar, Idukki district, Kerala, south India.

**Threats:** Habitat clearance for tea andeucalyptus plantations. This threat is very serious as there are no other known areas in the surrounding region that could be considered assuitable habitat for the species.

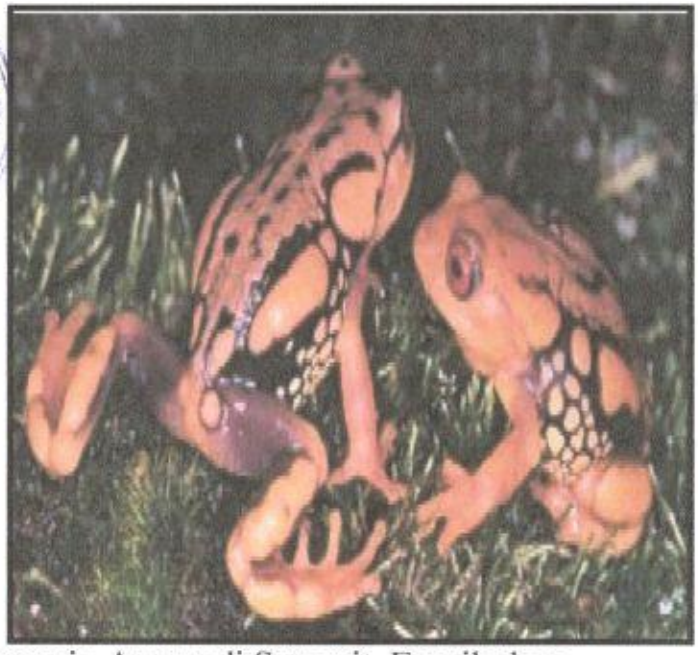
14. The **Large Ponmudi Bush Frog** (*Raorchestesponmudi*) is the largest bush frog of Indiawith a snout to vent length upto 4 cm.

**Distribution:** Ponmudi and AgasthyamalaHills, Thiruvananthapuram district, Gavi, Pathanamthitta district, Vagaman, Idukki district., Wayanad Plateau, Kalpetta, Mananthavady and Sultan's Battery, Wayanad district of Kerala; Anamalai Hills and Valparai, Coimbatore district, Tamil Nadu.

**Threats:** Habitat decline and the rate of forest loss is likely to further intensify due to the expansionof surrounding tea plantations.

Principal
Derabish College, Derabish
Kendrapara

15. The **Resplendent Shrub Frog** (*Raorchestesresplendens*) was described in 2010 to occur in Anamudi Summit, Eravikulam National Park in the Western Ghats. The Resplendent Shrub Frog is a unique bush frog having brick red dorsal skin with black irregular furrows and prominent glands. This is the highest elevation bush frog reported from the Western Ghats from an altitude of 2,695 m above meansea level.



**Distribution:** Currently known to occur in Anamudi Summit, Eravikulam National park in theIdukki district, Kerala.

**Threats:** Occurs in a highly protected national park with secure habitat. Cause for observed declinesremains unknown in view of its protected habitat.

16. The **Sacred Grove Bush frog** (*Raorchestes sanctisilvaticus*) is known to occur only in the Kapildhara Falls, Madhya Pradesh.

**Distribution:** Known only to occur in Kapildhara Falls, Amarkantak, JabalpurDistrict, Madhya Pradesh.

**Threats:** Habitat loss due to harvesting ofwood for subsistence purposes, infrastructuredevelopment for tourism, and occurance offires are the major threats to this species.

Principal
Derabish College, Derabish
Kendrapara

17. The **Sushil's Bush Frog** (*Raorchestes sushili*) was discovered in 2009 in Andiparai Sholai, Valparai in the Western Ghats of Tamil Nadu. It is found at an altitude of around 600 m above mean sea level.

**Distribution:** Known only to occur in Valparai and its vicinity, Coimbatore district, Tamil Nadu.

**Threats:** Habitat loss due to small and large-scale agricultural activities such as tea and coffee cultivation in the Anamalai Hills.

18. The **Shillong Bubble-nest Frog** (*Raorchestesshillongensis*) was discovered in Shillong, Meghalaya.

**Distribution:** Currently known to occur in the type locality of Malki Forest, Shillong, Meghalaya and in Mizoram.

**Threats:** Selective logging, collection of wood for subsistence use and urbanization are major threats to the habitat of thisspecies.

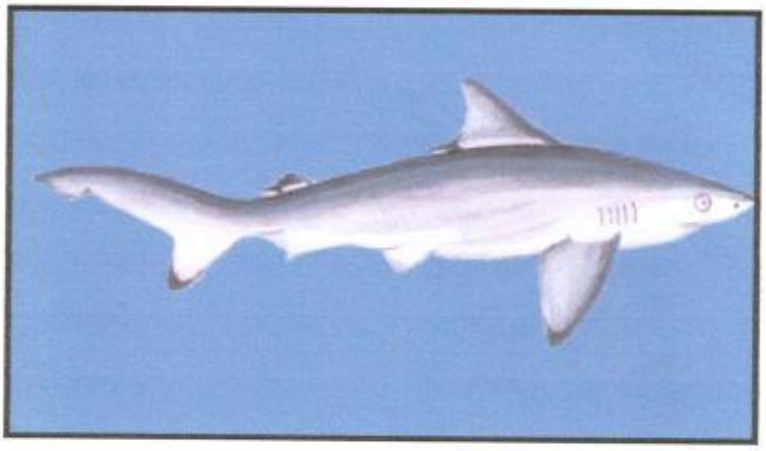
19. The **Tiger toad** (*Xanthophryne tigerinus*)was discovered in 2009 from Amboli in the Western Ghats of Maharashtra state. It is found at an altitude of around 720 m abovemean sea level.

**Distribution:** Found only in Amboli, Sindhudurg district, Maharashtra.

**Threats:** Loss of forest and habitatfragmentation.

Principal
Derabish College, Dera Ba

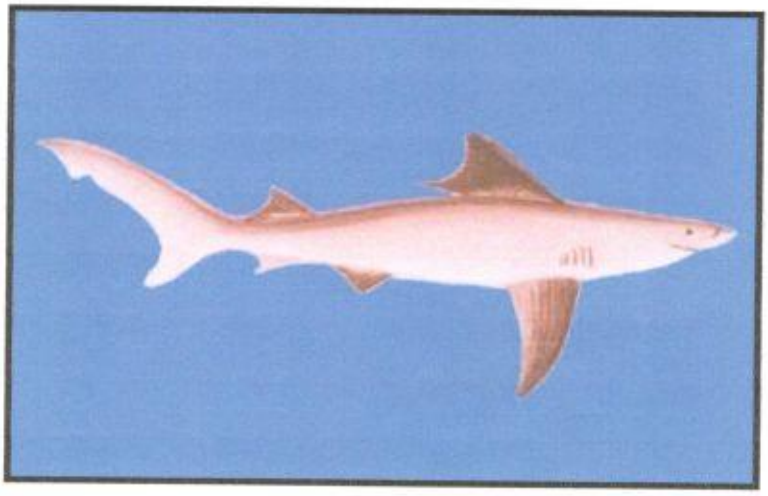
## FISH



1. **The Pondicherry Shark** (*Carcharhinus hemiodon*) is a marine fish that occurs or occurred inshore on continental and insular shelves. This is a very rare and little-known species.

   **Distribution:** Indian Ocean - from Gulf of Oman to Pakistan, India and possibly Sri Lanka. In scattered localities spanning India to New Guinea. Has also been recorded at the mouth of the Hooghly river.

   **Threats:** Large, expanding, and unregulated commercial fisheries in inshore localities and habitats. If still extant, it is probably caught as bycatch, although market surveys have failed to record it. Its populations are considered to have been severely depleted as a result of continued exploitation.



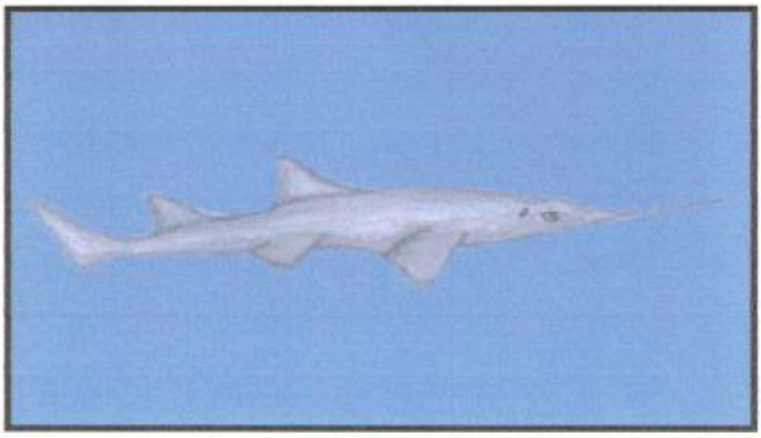
2. The **Ganges Shark** (*Glyphis gangeticus*) is a uniquely adapted fish-eating shark that occurs in the turbid waters of the Ganga river and the Bay of Bengal. The small eyes suggest that it is adapted to living in turbid water, while the slender teeth of the species suggests that it is primarily a fish-eater. It grows to a maximum length of 2.04 m.

**Distribution:** It occurs in India and possibly in Pakistan. The Ganga river system and Hooghly river mouth are its known habitats.

Principal

**Threats:** Major fisheries targeting sharks. Other probable threats include overfishing, pollution, increasing river use and construction of dams and barrages. A few jaws of the species were found tohave been traded in the international market during recent years, which testifies that the speciesis not extinct.

3. The **Knife-tooth Sawfish** (*Anoxypristis cuspidata*) has a long narrow snout with blade-like teeth and a shark-like body. It spends most of its time near the bottom of the sea,sometimes going down to almost 40 m. It can grow up to 2.8 m. in lengthand can withstand a range of salinity conditions. It is found in shallow coastal waters and estuaries.

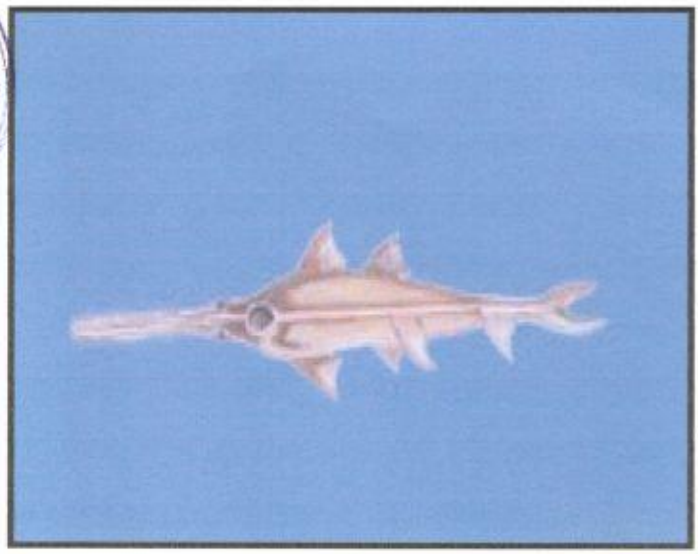


**Distribution:** Widespread in western part of the Indo-Pacific region, including Red Sea.

**Threats:** The principal threat to all sawfish are fisheries (targeted, bycatch, commercial and subsistence). Their long tooth-studded saw, makes them extraordinarily vulnerable to entanglementin any sort of net gear, including primitive fishing contraptions. When sawfish are caught in bycatch, they often end up being traded because of the very high value of their products (meat is highquality and fins and saws extremely valuable in international trade).

Principal
Derabish College, Derabish
Kandrapara

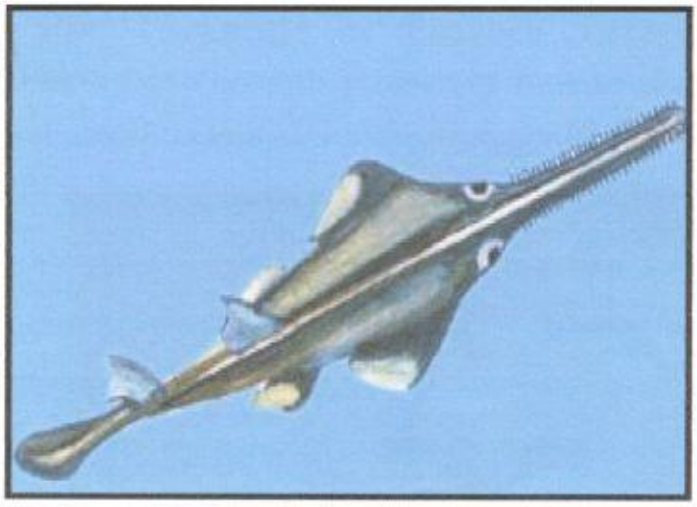
4. **Large-tooth Sawfish** (*Pristis microdon*) are heavy-bodied sawfish with a short but massive saw, and grow up to 3 m in length. It is seen seasonally and very occasionally caught along with the Bull Sharks and the Green Sawfish.



**Distribution and habitat :** Western part of the Indo-Pacific (East Africa to New Guinea, Philippines and Vietnam to Australia). In India, it is known to enter the Mahanadi river, up to 64 km inland, and also is very common in the estuaries of the Ganga and Brahmaputra.

**Threats:** Same as that for the Knife-tooth Sawfish. There is also an increasing demand for sawfish in aquaria. Major habitat changes include construction of dams over rivers, siltation, pollution from industries and mining operations.

5. **Long-comb Sawfish or Narrow-snout Sawfish** (*Pristis zijsron*) grow up to 4.3m in length and are heavily exploited by humans. This species was reported as frequently found in shallow water. It inhabits muddy bottoms and also enters estuaries. Its presence has been recorded in inshore marine waters, and it goes down to depths of at least 40 m.



**Distribution and habitat:** Indo-Pacific region including Australia, Cambodia, China, India, Indonesia and Malaysia.

**Threats:** This species has been damaged intensively, both as a target species and as incidental bycatch in commercial, sport or shark-control net fisheries, as well as for aquarium display. As a result, it has become severely depleted in recent decades, and now appears to have been extirpated from many parts of its range.

Principal

## SPIDERS

1. **The Rameshwaram Ornamental orRameshwaram Parachute Spider**(*Poecilotheria hanumavilasumica*) was recently described in 2004, and is only found in India. It can give a nasty bite which usually is not fatal. The species is semi-social, which means they live partlyin groups.

**Habitat:** Arboreal and tend to live inhiding.

**Distribution:** Endemic to India. Spread along the coastal savannah, tropical lowland rain forests and montane forests upto an altitude of2000 m above mean sea level.

**Threats:** Major threats causing the disappearance of this species is habitat alteration anddegradation.

2. **The Gooty Tarantula, Metallic Tarantula or Peacock Tarantula** (*Poecilotheria metallica*) is steel blue in colour with patches of intense orange-yellow, black and white. It was first foundin Gooty (Ooty/Udagamandalam) in south India in a burn pile during railway construction. Ever since the first picture of this spider was circulated globally, it has been in great demand in the illegal pet trade. A combination of small litter sizes and increased human pressures have made this species critically endangered.

**Habitat:** Wooded mountain area of southIndia.

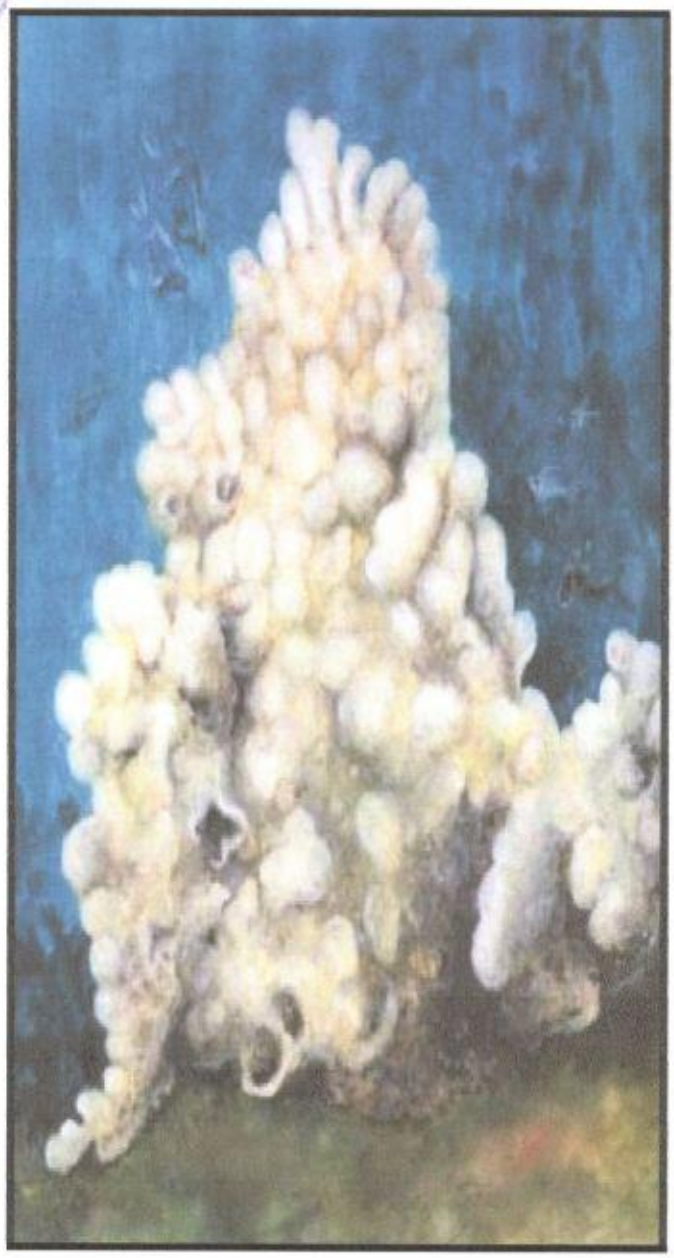
**Distribution:** Endemic to India

**Threats:** They are one of the most expensive spiders in the illegal pet trade. Large areas where the species occurs have been deforested, or subjected to habitat degradation due to local fuel woodcollection, leading to decline in its population.

Principal
Arabian College, Derabish

## CORALS

1. **Fire corals** (*Millepora boschmai*) are more closely related to jellyfish than corals. On contact, one usually feels a burning sensation similar to a sting from a jellyfish. The scientific name '*millepora*' is derived from the several small pores on the surface of these corals. They are usually yellow- green or brown in colour.



**Habitat:** Millepora species are generally found in murky inshore waters and display a tolerance for siltation. They often are found in clear offshore sites.

**Distribution:** Indonesia, Gulf of Chiriquí, Panama Pacific Province. Possibly extinct from Australia, India, Indonesia, Malaysia, Panama, Singapore and Thailand.

**Threats:** Collected for decoration and jewellery trade. This group is also sensitive to temperature rise, and is thought to have completely disappeared from the majority of marine areas possibly because of growing global warming related bleaching effects.

Principal
Derabish College, Derabish

## BIRDS

1. The **Jerdon's Courser** (*Rhinoptilus bitorquatus*)is a nocturnal bird found only in the northernpart of the state of Andhra Pradesh in peninsularIndia. It is a flagship species for the extremely threatened scrub jungle. The species was considered to be extinct until it was rediscoveredin 1986 and the area of rediscovery was subsequently declared as the Sri Lankamaleswara Wildlife Sanctuary.

**Habitat:** Undisturbed scrub jungle with openareas.

**Distribution:** Jerdon's Courser is endemic to Andhra Pradesh. However, 19th century records doattribute its presence in the neighbouring areas of the state of Maharashtra.

**Threats:** Clearing of scrub jungle, creation of new pastures, growing of dry land crops, plantationsof exotic trees, quarrying and the construction of the Telugu-Ganga Canal. Illegal trapping of birdsis also a threat.

2. The **Forest Owlet** (*Heteroglaux blewitti*) had been lost for more than a century. It has an interesting history. When notsighted for decades, posters were printed and Salim Ali, the premier ornithologist of India made a public appeal to look for the bird. After 113 long years, the owlet was rediscovered in 1997 and reappeared on the list of Indian birds.

**Habitat:** Dry deciduous forest.

**Distribution:** South Madhya Pradesh, in north-westMaharashtra and north-central Maharashtra.

**Threats:** Logging operations, burning and cutting of treesdamage roosting and nesting trees of the Forest Owlet.

Principal
Derabish College, Derabish

3. The **White-bellied Heron** (*Ardea insignis*) is an extremely rare bird found in five or six sites in Assam and Arunachal Pradesh, one or two sites in Bhutan, and a few in Myanmar. It is inherently rare, and populations have never been known to be very high.

**Habitat:** Rivers with sand or gravel bars orinland lakes.

**Distribution:** Bhutan and north-east India tothe hills of Bangladesh and north Myanmar.

**Threats:** Loss and degradation of lowland forests and wetlands through direct exploitation and disturbance by humans.

Principal
Derabish College, Derabish

4-7. Out of nine species of vultures, the population of three species- **White-backed Vulture** (*Gyps bengalensis*), **Slender-billed Vulture** (*Gyps tenuirostris*) and **Long-billed Vulture** (*Gyps indicus*) has declined by 99%. The **Red- headed Vulture** (*Sarcogyps calvus*) has also suffered a rapid decline in the recent past. Vultures keep the environment clean, by scavenging on animal carcasses. The decline in vulture populations has associated disease risks, including increased risk of spread of rabies and anthrax, besides adversely impacting the observance of last rites by the Parsis in the Towers of Silence.

**Habitat:** Forests, villages etc.

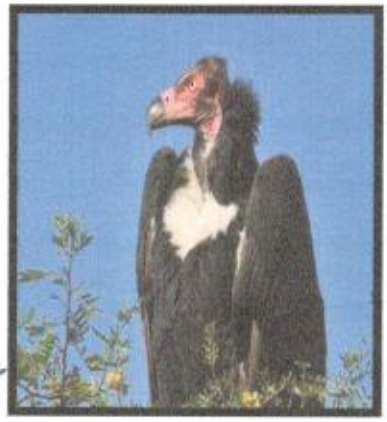
**Distribution:** Across India.

**Threats:** A major threat to vultures is the painkiller diclofenac used by veterinarians to treat cattle. When vultures consume these carcasses, diclofenac enters their system, but they are unable to metabolize it. Accumulation of diclofenac results in gout-like symptoms such as neck-drooping,ultimately leading to death.

White-backed Vulture

Slender-billed Vulture

Long-billed Vulture



Red- headed Vulture

Principal
Derabish College, Derabish

8. The **Bengal Florican** (*Houbaropsis bengalensis*) is a rare bustard species that is very well known for its mating dance. Among the tall grasslands, secretive males advertise their territories by springing from the ground and flitting to and fro in the air.

**Habitat:** Grasslands occasionally interspersed with scrublands.

**Distribution:** Native to only 3 countries in the world - Cambodia, India and Nepal. InIndia, it occurs in 3 states, namely Uttar Pradesh, Assam and Arunachal Pradesh.

**Threats:** Ongoing conversion of the bird's grassland habitat for various purposes includingagriculture is mainly responsible for its population decline.

9. **The Himalayan Quail** (*Ophrysia superciliosa*)is presumed to be extinct since no reliable records of sightings of this species exist after 1876. Intensive surveys are required as this species is hard to detect due to its reluctanceto fly and its preference for dense grass habitats. Possible sighting of this species wasreported in Nainital in 2003.

**Habitat:** Tall grass and scrub on steep hillsides.

**Distribution:** Western Himalayas.

**Threats:** Indiscriminate hunting during the colonial period along with habitat modification.

Principal

10. The beautiful **Pink- headed Duck** (*Rhodonessa caryophyllacea*) has not been conclusively recorded in India since 1949. Males have a deep pink head and neck from which the bird derives its name.

**Habitat:** Overgrown still-water pools, marshes and swamps in lowland forests andtall grasslands.

**Distribution:** Recorded in India, Bangladesh and Myanmar. Maximum records are from north-east India.

**Threats:** Wetland degradation and loss of habitat, along with hunting are the main causes of itsdecline.

11. The **Sociable Lapwing** (*Vanellus gregarious*) is a winter migrant to India. This species has suffered a sudden and rapid population decline due to which it has been listed as critically endangered.

**Habitat:** Fallow fields and scrub desert.

**Distribution:** Kazakhstan, Russia, Kyrgyzstan, Tajikistan, Uzbekistan, Turkmenistan, Afghanistan, Armenia, Georgia, Azerbaijan, Iran, Iraq, Saudi Arabia, Syria, Turkey, Egypt, India, Pakistan and Oman. In India, distribution is restricted to the north and north-west of thecountry.

**Threats:** Conversion of habitat to arable land, illegal hunting and proximity to humansettlements.

Principal
Derabish College, Derabish

12. The **Spoon Billed Sandpiper** (*Eurynorhynchus pygmeus*) requires highly specialized breeding habitat, a constraint that has always kept its population scarce. India is home to some of the last existing wintering grounds of this species(estimated at only 150-320 breeding pairs worldwide).

**Habitat:** Coastal areas with sparse vegetation. No breeding records further inland than 7 km from the seashore.

**Distribution:** Has been recorded in West Bengal, Orissa, Kerala and Tamil Nadu.

**Threats:** Habitat degradation and land reclamation. Human disturbance also leads to highincidence of nest desertion.

13. The **Siberian Crane** (*Grus leucogeranus*) is a large, strikingly majestic migratory bird that breeds and winters in wetlands. They are known to winter at Keoladeo National Park, Rajasthan. However the last documented sighting of the bird was in 2002.

**Habitat:** Wetland areas.

- **Distribution:**

  Keoladeo National Park inRajasthan.

**Threats:** Pesticide pollution, wetland drainage, development of prime habitat into agricultural fields, and to some extent, hunting.

## DISCUSSION:

The overall point on discussion of critical endangered animal species in India is to highlights the serve threats faced by these species and urgent needs for conservation efforts to save them for extinction. The declined population of these animal is a cause of concern as their extinction could have significant ecological and environmental consequence The Indian government and conservation organization must take necessary step to take these process by implementing measures such as habit restoration and anti poaching efforts and awareness campaign's .It is crucial and understand the importance the diversity and the role of each species in the ecosystem to ensure the survival the endangered animal .By working towards conserving these species, we cannot only protect them but also preserve the delicate balance of nature for the benefits of all living beings.

Principal
DERABISH COLLEGE

## CONCLUSION :

India is a home to significant number of critical animal endangered animal species ,Which are facing numerous threats including habitat loss ,poaching , hunting and human wildlife - conflict .Despite the efforts of Indian government and conservation organizations ,the population of these species continuous to decline .It is crucial to raise awareness about the importance of endangered animal and their conservation to ensure the survival .More efforts need to more to protect their habitat ,prevent protect to illegal wildlife trade ,and promote sustainable practices that coexist with these animal .Only by taking collective action , can we ensure that these endangered species are protected for future generation .

## ABSTRACT

The problem of malnutrition has unfavourable effects upon the health and well being of the individuals. In some cases, the health problems and illness are severe that the individuals may have to take medical treatment. Whereas, in other cases, when they are severe, they even prove to be fatal. In accordance to the research studies, the women and children are the ones, who are experiencing the problem of malnutrition to a major extent. One of the major cause is, when they are residing in the conditions of poverty and backwardness, they don't possess adequate resources needed in fulfilling in their daily nutritional requirements. In order to curb the problem of malnutrition and obtain diet and nutrition, the individuals need to possess the resources. In addition, they need to be well aware in terms of measures and approaches, which are needed to promote good health and curb malnutrition. In rural communities, there is a need to formulate measures and programmes, which aim to generate awareness and make provision of support and assistance to the individuals to curb the problem of malnutrition. In accordance to the research studies, the individuals, belonging to deprived, marginalized and economically backward sections of the society are the ones, who are experiencing the problem of malnutrition. The term malnutrition generally refers to both over-nutrition and under-nutrition. There are number of factors that cause malnutrition. In most cases, these lead to poor diet or severe infections. In accordance to the research studies, the individuals, belonging to deprived, marginalized and economically backward sections of the society are the ones, who are experiencing the problem of malnutrition. Among them, due to scarcity of resources, they are unable to make provision of essential nutrients in their diet. Hence, due to lack of essential nutrients, they are unable to lead to effective growth and development of their children and experience number of health problems and illnesses.

In current article a wide study on topic malnutrition is due with reference to Indian population. Being the second most populated and developing nation it is also in the phase of high malnutrition occurrence of malnutrition, kind and cause of malnutrition, as well as the ways to make a change to reduce its prevalence.

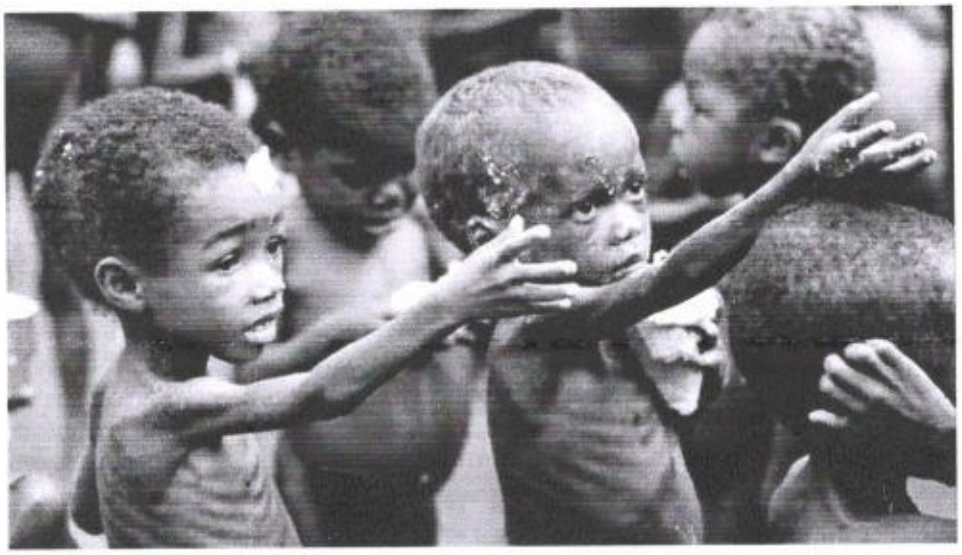
## ***Introduction***

Malnutrition is a health condition that result from eating a diet in which nutrients are either not enough or are too much such that the diet causes health problems

Malnutrition can also be defined as the insufficient , excessive or imbalanced consumption of nutrients. It include calories, protein, carbohydrates, vitamins or minerals. Not enough nutrients are called under nutrition or undernourishment while too much is called over nutrition. Malnutrition is often used to specifically refer to under nutrition where an individual's is not getting enough calories, protein or micronutrients

The world health organization (WHO) defines malnutrition as "***the cellular imbalance the supply of nutrients and energy and the body's demand fore them to ensure growth, maintenance and specific function.***"



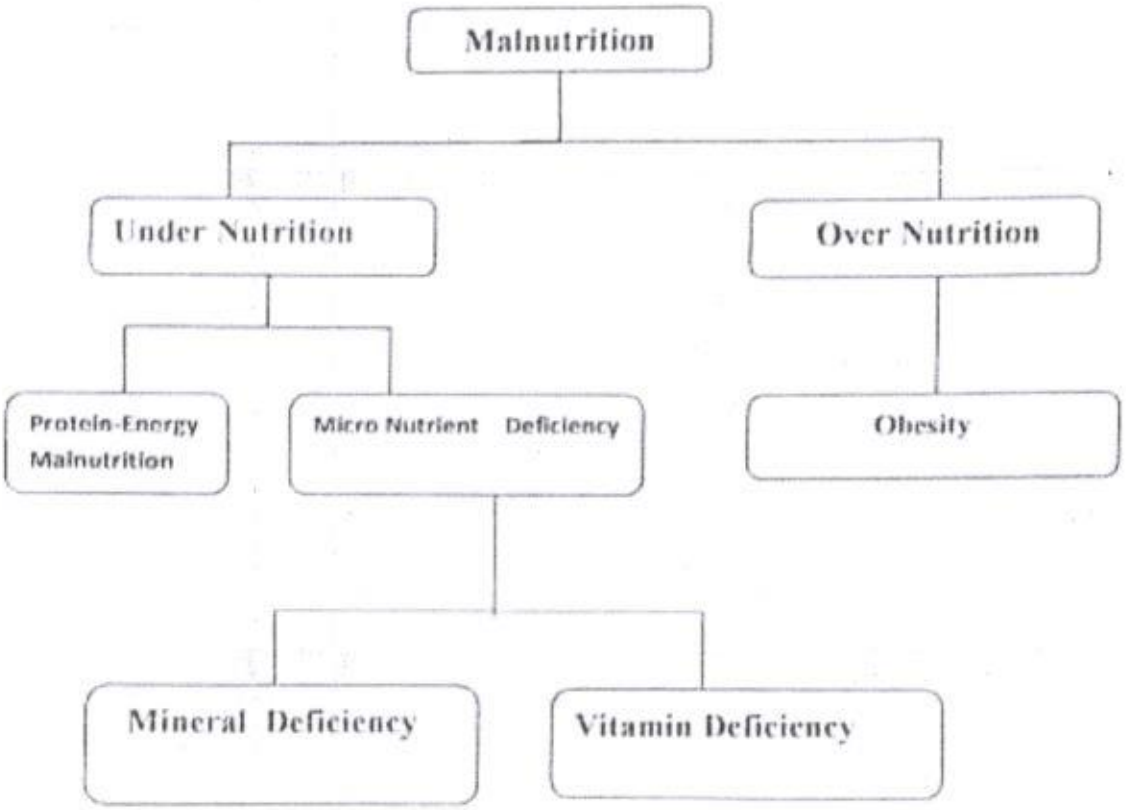
PRINCIPAL
DERABISH COLLEGE

DERABISH KENDRAPARA ESTD-1981 DERABISH

*TYPES OF MALNUTRITION:*

The malnutrition is broadly categorized into groups on the basic of amount of intake of nutrients by the person. This may be of two types :

(i) **Under nutrition**
(ii) **Over nutrition**



PRINCIPAL
DERABISH COLLEGE

## *CAUSES OF MALNUTRITION*

Malnutrition could arise from many factors. While sub-nutrition among the poor, mostly arises due to unavailability of proper nutritious food. Some of the main causes are :

1. ***Lack of as Balanced Diet :*** In countries where poverty prevails, people don't consume essential nutrients like proteins , carbohydrates, fats in their daily meal
2. ***Lack of a regulated Diet :*** *Irregular intake of food can causes malnutrition. Breakfast, Lunch ,and dinner must always be taken at a proper time Irregular timing of meals can cause indigestion and malnutrition.*
3. ***Lack of sound sleep and rest :*** *Low space and a suffocating bedroom can hamper the sleep of the child . Excess homework and watching television till late hours can also cause lack of sleep . This result I indigestion and malnutrition.*
4. ***Lack of exercise and games :*** *Malnutrition can also be caused due to lack of exercise and games . This slows down the digestive process causes malnutrition.*
5. ***Poverty :*** *Very often poverty is another major reason behind undernourished children. In the villages especially where the income level is restricted one is unable to provide suitable nutrition to their children.*
6. ***Illiteracy and ignorance :*** *Many a time's illiteracy and ignorance also result in malnutrition where in the parents are unaware of the dietary requirements of underweight and skinny.*
7. ***No access to hospitals :*** *The inability of a rural parent to afford a doctor's visit also causes the child to get undernourished*

PRINCIPAL
DERABIS

***CONCLUSION :***

Malnutrition is an important to development, and its presence indicates that basic physiological needs have not been met. What is observed as malnutrition is not only the result of insufficient or inappropriate food, but also a consequence of other conditions, such as poor water supply and sanitation and a high prevalence of disease. Thus reversing the procedure is complex, because many issues need to be addressed more or less simultaneously. And every situation is different, so that their is no single solution for all. There can only be general guidance on direction to pursue . Experience from lessons learnt shows that considerable time is needed to redress a situation (ten years and more), and that a strong supportive political and policy environment remains crucial supportive political and policy environment remains crucial throughout then period . There is no become permanent, offering a substantial return on investment.

# ACKNOWLEDGEMENT

I wish to convey my deep sense of gratitude and hearty thanks to Mr. Ardhendu Sekher Mallick in Zoology for having provide all help and cooperation to complete this project report successfully.

I would like to express my special thanks to all the faculties of the department who have extended their helping hand direct or indirectly to make the project Success and special, thanks to our guide Mr.Ardhendu Sekher Mallick, whose valuable advice, suggestion and active involvement in the project work.

At last I would like to express my gratitude with deep sense of feelings to my Parents & friends who have encouraged me & extended all help for the successful Completion of this project.

I also thanks Dr.Ashok Kumar Mallik assistant professor in department of conservation of wildlife and natural resources Sri Rama Chandra Bhanjadeo University Baripada,Mayurbhanja for supervision.

I also wish to convey my appreciation to my friends Mis.Prajnya Paramita Das , Mr. Binod Ojha and Miss. Lilipsa Sahoo for their constant cooperation and selfless help.

This Projects is true to the best of my knowledge.

Hemanta Behera

# ntroduction

min A and its active metabolites, collectively known as the retinoids, have commonly been used as toolsin the y of developmental biology. Retinoids are essential metabolites derived from carotenoid pigments. They play le in many biological functions, and the effects of deficient or excess amounts of retinoids have been umented for embryonic, neoplastic, and adult tissues.

noids were identified as agents capable o f inducing congenital defects in rats as early as the 1950s (Cohlon, 3), and of inhibiting a regenerative response in frog larvae (Niazi and Saxena, 1968). Since then, they have been wn to induce defects in antero-posterior axis development in frog (Durstonetal, 1989; Sive et al., 1990), chick ndin and Eichele, 1992), and mouse (Morriss-Kay et al., 1991). Amphibian appendage regeneration can similarly affected in the proximo-distal axis (Niazi and Saxena, 1978; Maden,1982), the antero-posterior axis, (Tickle et 1982; Kim and Stocum, 1986), and in the dorso-ventral axis (Ludolph et al., 1990). Many additional teratogenic cts have been documented in mammals (Lammer etal., 1985),

divergent effects of retinoids suggest that these compounds may exert their influence in several different s. This view has been reinforced by the discovery that several metabolites of vitamin A may beinvolved in ducing teratogenic effects. In addition, retinoids likely modulate developmental events through numerous cies of both cytosolic and nuclear proteins. Different retinoids, retinoid receptors, transcription cofactors, and A binding sites for receptors and receptor-ligand complexes, are required for regulation of growth and erentiation in different cell types. Furthermore, retinoids are lipophilic, and might have direct effects upon ular membranes. The numerous combinations of all of these features of retinoid metabolism and signal nsduction ensure that abroad and subtle repertoire of cellular and developmental processes can be hestrated in a manner that is specific to cell type. In this case, cell type does not refer solely to phenotype, but udes attributes of temporal and spatial context.

noic acid is present in amphibian embryos at concentrations sufficient to alter specification of pattern (Durston l., 1989), and is dispersed as a gradient across the posterior to anterior axis of chick limb buds (Thaller et al, 7). In the chick limb bud, implants impregnated with retinoic acid and placed in the anteriormargin mimic the e of polarizing activity (Tickle et al., 1982). Murine Hensen's node is capable of inducingthe same sort of pattern licating activity in chick, and indeed, appears to be the site of retinoic acid synthesis (Hogan et al., 1992). In tion, neural floorplate is a site of retinoid synthesis (Wagner et al., 1990), and might, therefore, play a role in terning the developing nervous system (Yamada et al., 1991). This can be confirmed both in vitro and in vivo. ral floor plate, Henson's node, and posterior limb bud tissues all appear to exhibit higher concentrations of noic acid /receptor complexes as assayed by response clement/reporter gene constructs (Wagner et al., 1992). s has led to speculation that retinoic acid is a morphogen.

mode of action of retinoid has proved difficult to characterize, and this is likely due to the diverse meansby ch cells and tissues can be affected. Retinoids are lipophilic, and their presence alters the viscosity ofcell mbranes (Kwasigroch et al, 1980) Post translational modification of proteins can also he affected: retinoid alter cosylation rates of several classes of molecules (Lotan et al. 1983; Roberts et al. 1984). Ratesof glycosylation can ct cell surface properties as slight changes in the steric characteristics of cell surface glycoproteins and olipids alter the relationships these classes of molecules have with each other(Kwasigroch et al, 1980), Such nges would indirectly impinge upon membrane fluidity as well as constrainthe activity of integral membrane nponents. Further more, the synthesis rates of several proteins such asfibronectin (Hassell et al, 1978) and agen types I, III, IV, and V (Forest et al., 1982) can be altered by the

### 3. Anuran tail regeneration

Amphibians have long been used in the study of tail regeneration (Ferretti, 2001). Urodeles regenerate their tails throughout their lives, but anurans do so only in a limited period, the tadpole stage, as the anuran tail is a transient appendage and is not present throughout an anuran's life. Much research has been performed using newts and salamanders, but the tail regeneration of the Xenopus larva has been considered to be a useful model system for analyzing the molecular mechanism underlying the appendage regeneration. A notochord is a major axial structure located in the center of the larval tail. It consists of vacuolated cells surrounded by a collagenous sheath. A spinal cord and a pair of sensory ganglions are located at the dorsal side of the notochord, Bilateral muscle masses cover the central notochord and the spinal cord. Dorsal and ventral fins are located at the midline of the tail. Major veins and arteries are in the mesenchymal space. The Xenopus larva regenerates most of its tail after amputation during its larval life until metamorphosis, with an exception in the refractory period between stages 45 and 47 (Taylor and Kollors, staging), at which the ability to regenerate the tail is lost in some populations of tadpoles (Beck et al., 2003). Reproducible tail regenerations were obtained within weeks using tadpoles at stages 48-50 (Sugiura et al., 2004).

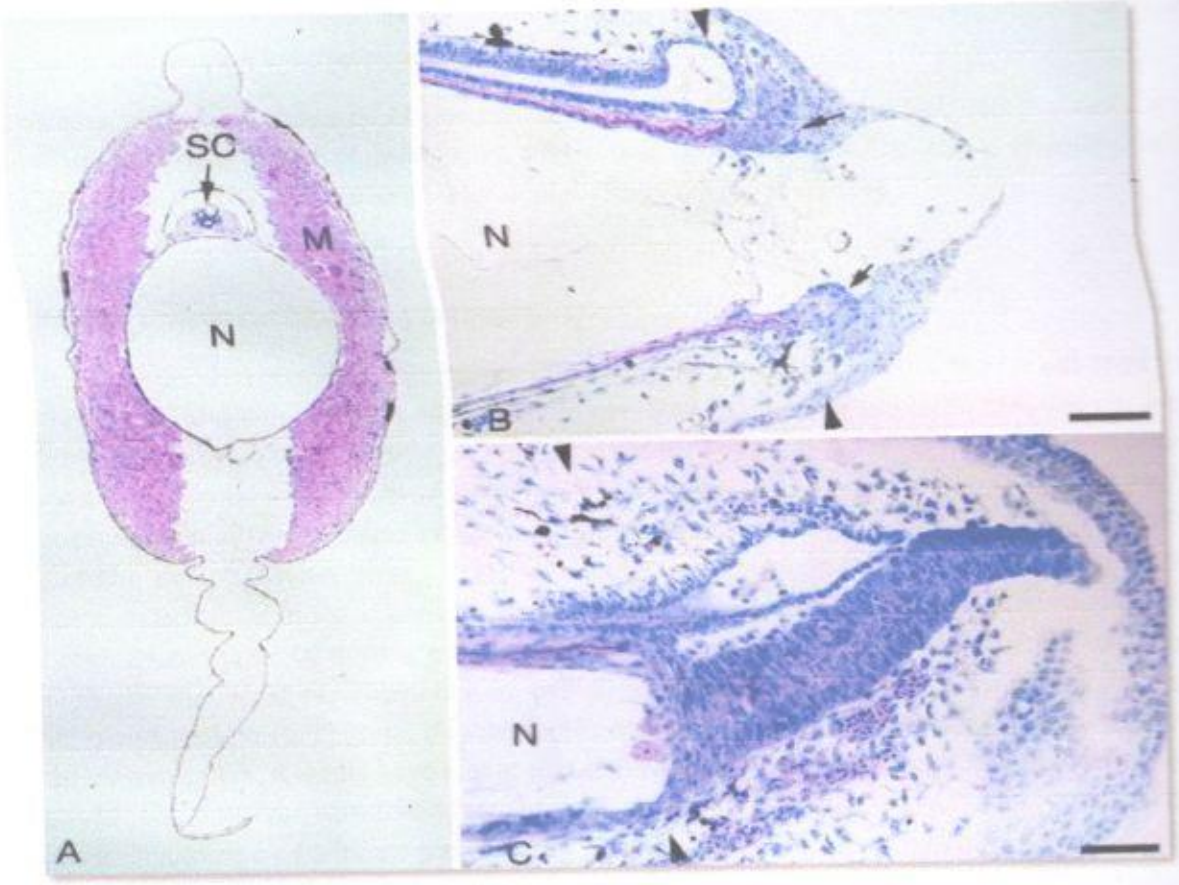

Fig. 1 Morphology of normal and regenerating tail of Xenopus tadpole. (A) Transverse section of a stage 50 tadpole tail was stained with hematoxylin and eosin. (B, C) Sagittal sections of the regenerating tail at days 2 and 3 after amputation (Mochii, et. al., 2007).

# CERTIFICATE

DERABIS COLLEGE KENDRAPARA ESTD-1981

This is to certify that " Soubhagya Laxmi Das " has successfully completed and submitted the Bachelor's of Science . Project entitled " THYROID DISEASE IN DERABISH BLOCK " to Derabish Degree College on 13/05/2023.

The project was conducted under the guidance of " Miss. Subhashree Behera ", who has supervised the research work and provided the necessary guidance throughout the project. The project was undertaken by the student as a partial fulfillment of the requirements for the award of the Bachelor's degree in Zoology from Derabish Degree College .

# ACKNOWLEDGMENT

I would like to express my heartfelt gratitude to my guide, " Miss. Subhashree Behera" for her unwavering support and guidance throughout the course of this project.

Without her constant encouragement and insightful feedback, this project would not have been possible. Her expertise in the field and willingness to share her knowledge have been invaluable to me.

I would also like to thank my family and friends for their unwavering support and encouragement throughout this project.

Finally, I would like to thank UTKAL UNIVERSITY for providing me with the opportunity to pursue this Bachelor's of Science program and for equipping me with the knowledge and skills needed to complete this project successfully.

This Projects is true to the best of my knowledge.

THANKING YOU

## INTRODUCTION

Thyroid disease is a prevalent condition that affects a significant proportion of the global population, with an estimated 200 million people worldwide suffering from thyroid disorders. The thyroid gland, located in the neck, produces hormones that regulate various bodily functions such as metabolism, heart rate, and body temperature. When the thyroid gland malfunctions, it can lead to a range of disorders, including hypothyroidism, hyperthyroidism, thyroid nodules, and thyroid cancer. These conditions can cause a wide range of symptoms and have potentially serious health consequences if left untreated. The diagnosis and management of thyroid disease require a multidisciplinary approach, involving various medical professionals such as endocrinologists, radiologists, and surgeons. There are various diagnostic tools and treatment options available, including blood tests, imaging studies, medication, surgery, and radioactive iodine therapy. However, effective management of thyroid disease requires an understanding of the underlying pathophysiology of the condition and the appropriate use of diagnostic and treatment modalities.

This project aims to provide a comprehensive overview of thyroid disease, including its pathophysiology, diagnosis, treatment, and management. The project will also explore the risk factors, symptoms, and complications associated with thyroid disease. It will analyze the diagnostic tools used to identify thyroid disease and the treatment options available, including medication, surgery, and radioactive iodine therapy. Finally, the project will cover strategies for managing thyroid disease and improving patient outcomes, including lifestyle modifications and follow-up care. Page 4 of 17 By providing a comprehensive overview of thyroid disease, this project aims to increase awareness and understanding of this common disorder and provide guidance for effective diagnosis and management. It is hoped that this project will be a valuable resource for medical professionals, patients, and their families seeking information about thyroid disease.

**SYNTHESIS:** Both T4 and T3 are iodine containing derivatives of thyronine which is a condensation productof two molecules of the amino acid tyrosine.

**STORAGE:** Thyroglobulin containing iodinated tyrosil and thyronil residues is transported to the interior of the follicles and remains stored as thyroid colloid till it is taken back into the cells by endocytosis and broken down by lysosomal proteases.

**RELEASE:** The T4 and T3 so released is secreted into circulation while MIT and DIT residues are deiodinated and the iodide released is reutilized. The uptake of colloid and proteolysis are stimulated by TSH: the quiscent gland has follicles distended with colloid and cells are flat or cubical, while the TSH stimulated gland has columnar cells and colloid virtually disappears.Normal human thyroid secretes 60–90 µg of T4 and 10–30 µg of T3 daily.

## REVIEW OF LITERATURE ON THIS PROJECT TOPIC:-

DERABIS COLLEGE KENDRAPARA ESTD-1981 DERABISH

Literature review on various techniques for diagnosing thyroid diseases: Hameed, (2017) has performed a research study on "Artificial neural network system for thyroid diagnosis". The proposed paper focuses on using Artificial Neural Network (ANN) as a significant technique of artificial intelligence to diagnose thyroid diseases. Multilayer feed forward architecture of ANN is adopted in the proposed design and the back propagation is selected as learning algorithm to accomplish the training process. The continuous values of three laboratory blood tests are used as input signals to the proposed system of ANN. Used 655 samples of real patients from certified advanced hormones laboratory in Kerala city. All types of thyroid diseases that may occur in patients are taken into account in design of system as well as the high accuracy of the detection and categorization of thyroid diseases are considered in the system. The result of this research shows that the proposed ANN system is able to precisely diagnose thyroid disease and can be exploited in practical.

The selected ANN has high classification rate which is about 99.2%. As a result, the proposed structure of ANN can effectively categorize the type of thyroid cases. The system is simulated via. MATLAB Software to evaluate its performance.

Amato et al. (2013) had carried out a research study on the title "Usage of Artificial Neural Network (ANN) in medical diagnosis". The objective shows that the capability, philosophy, limitations and powerful use of artificial neural network in the medical diagnosis, how it is useful

for physicians to diagnosis more reliable and therefore, increases patient satisfaction. They have created Artificial Neural Network (ANN) based diagnosis architecture, all the medical data has put into it and find the minimum optimal value. The Artificial Neural Network (ANN) based medical diagnosis architecture worked on various diseases like diabetes, cancer and cardiovascular diseases. In the model also discussed about how can be build the database, training and verification of the database using Artificial Neural Network (ANN) and how can be test in medical practice. The study also, suggested usefulness of Artificial Neural Network (ANN) in future.

Sharpe et al. (1993) performed a research on "artificial neural networks in diagnosis of thyroid function from in vitro laboratory tests". The main objective was to study this showing the potential benefit of using Artificial Neural Network (ANN) for the diagnosis of thyroid function. In this study used the two Artificial Neural Network (ANN) architectures and back propagation

Principal
DERABISH COLLEGE

algorithms where they are multilevel perceptron and Learning Vector Quantization (LVQ). They have used clinical material as a data set to be train by Artificial Neural Network (ANN) architectures.

Also, used the software neural works professional II package for random sampling of data was done on SYSMAT/SAMPLE add-on module. Trained the data set on both the Artificial Neural Network (ANN) architecture and shows the desired output.

- **Using neural network:** Prerana and Taneja (2015) has done the research on "Predictive data mining for diagnosis of thyroid disease using neural network". The main objective was for this study to introduce proposed Artificial Neural Network (ANN) concept research as an alternative for the earlier prediction of a disease. To train the proposed artificial neural network used two types of learning where in they are Supervised Learning (SL) and Unsupervised Learning (USL). They have done the predictive analysis of thyroid disease based on these above mentioned learning's. They have divided the process into three stages, data collection and classifying, architecture selection and learning and compare network performance and reaching to the best answer. From experiments they have proven that Levenberg Marquardt method is better in performance in comparison of simple gradient descent algorithm. Used MATLAB as a tool for data analysis purpose.

Review and Survey of Artificial Neural Network in Medical Science". The objective for the study was how proposed Artificial Neural Network (ANN) techniques will be more useful in medical science field to help in diagnosis and predict the more precise output. They have discussed about the various Artificial Neural Network (ANN) Techniques. They have also shown the Fundamental working principle of artificial neurons. In this research, a Decision Support System (DSS) is proposed to diagnose nodules into benign and malignant by analyzing data via. Artificial Neural Network (ANN). In this research study, 63 samples are taken out of dataset provided which are utilized to test and train the neural network based on algorithm. As a result, 95% accuracy is reached. In this research, mentioned four methods Bayesian networks, decision trees and simple classification models including Artificial Neural Network (ANN) are also useful for decisions in medical treatment.

Razia et al. (2015) have performed a research study on "A decision support system for prediction of thyroid disease a comparison of multilayer perceptron neural network and radial basis function neural network". In this research, they have used two neural network models Multilayer Perceptron (MLP) and Radial Basis Function Networks (RBFN) for the prediction of onset of

DERABIS COLLEGE ESTD-1987 DERABISSAR

Principal DERABISSAR COLLEGE

values in the dataset are dealt with k-Nearest Neighbor (k-NN) weighting pre-processing scheme the resultant data is provided as input to adaptive neuro-fuzzy inference system for the

Kala et al. (2010) has done the research work on "Medical diagnosis using incremental evolution of neural network". The main objective was to diagnosis of PIMA Indian diabetes. Therefore, have proposed an evolutionary neural network which is used in multi-layer perceptron. Discussed about the general architecture of multi-layer perceptron neural network and the general structure of the proposed algorithm. Used the evolutionary operators which are: selection, mutation, crossover, elite, jump and new. From the experiments shown that the proposed algorithm performed better compare than the conventional multi-layer perceptron with back propagation algorithm for training, modular neural networks, connectionist evolution of neural network, radial basis function network and adaptive neuro fuzzy inference system.. They are sure that proposed algorithm was able to achieve a high degree of accuracy for both training as well as testing data sets.

Razia et al. (2015) performed a research study on "A neuro computing frame work for thyroid disease diagnosis using machine learning techniques".Proposed research study based on using two neuronal models (SOM and LVQ). In this analysis, a framework victimization Self-Organized Map (SOM) beside learning vector quantization has been developed. The unlabeled thyroid data of about 215 different patients is obtained from a clinic and is used to train the SOM network using competitive learning algorithm. The researchers have also used the decision tree algorithms: Self-Organizing Map (SOM) neural networks and linear vector quantization. The experiments and results show that LVQ and SOM algorithm have better accuracy for diagnosis of thyroid disease.

Principal
DERABISH COLLEGE

## Aim:

The aim of this project is to provide a comprehensive overview of thyroid disease, including its pathophysiology, diagnosis, treatment, and management. The project aims to increase awareness and understanding of thyroid disease and provide guidance for effective diagnosis and management.

DERABISH KENDRAPARA ESTD-1981 DERABISH

## Objectives:

- To provide an overview of the anatomy and physiology of the thyroid gland.
- To describe the pathophysiology of thyroid disease, including the various types of thyroid disorders and their causes.
- To explore the risk factors, symptoms, and complications associated with thyroid disease.
- To analyze the diagnostic tools used to identify thyroid disease, including blood tests, imaging studies, and biopsies.
- To discuss the treatment options for thyroid disease, including medication, surgery, and radioactive iodine therapy.
- To explore strategies for managing thyroid disease and improving patient outcomes, including lifestyle modifications and follow-up care.
- To review the current literature on thyroid disease, including recent advances in diagnosis and management.
- To provide practical guidance for medical professionals, patients, and their families on the diagnosis and management of thyroid disease.
- To highlight the importance of patient education and engagement in the management of thyroid disease.
- To identify areas for further research and improvement in the diagnosis and management of thyroid disease.

Principal
DERABISH COLLEGE

## Meterials and Methodology:-

Sourse of data:-20 subjects of every age group who are suspected to be suffer from thyroid disorders or subjects with vague symptoms were included in the study.

DERABIS KENDRAPARA ESTD-1981 DERABIS

## Method of collection of data:-

A prospective cross sectional study of 20 subjects of age group of our local area Niscintakoili which comes under Cuttack district were taken into the study. These persons were suspected to be suffering from thyroid disorders or with vague symptoms like generalised weakness, easy fatigability, Lethargy, Disintrest in daily activities, Long term fever or Cold,m uscle pain to be suspecious of thyroid disorder, were subjected to detailed clinical examination. Their blood samples were collected and send it to thyroid testing labs for detailed biochemical testing and analysis. Then the data were collected from labs in the form of Thyroid reports. The data were about the concentrations of thyroid hormones.According to the concentrations of thyroid hormones. According to the concentrations of thyroid hormones, the persons, who were sufferers of thyroid disorders, were catagorized into various spectrums of thyroid disorder like hyporthyroidism, hyperthyroidism,subclinical or clinical hypothyroidism, Total T3 -0.87-2.73 ng/mL

## Materials:

For this project, the following materials will be used:

- Published research articles, reviews, and textbooks on thyroid disease.
- Online medical databases, including PubMed and Medline.
- Clinical guidelines and recommendations from professional organizations, such as the American Thyroid Association and the Endocrine Society.
- Patient education resources from reputable sources, such as the National Institute of Diabetes and Digestive and Kidney Diseases and the American Thyroid Association.
- Medical software for analyzing and organizing data.

## Methodology:

The following methodology will be employed to achieve the project objectives:

## Literature review:

A comprehensive review of published research articles, reviews, and textbooks on thyroid disease will be conducted. The literature review will focus on the pathophysiology, diagnosis, treatment, and management of thyroid disease. Online medical databases will be used to identify relevant

Principal DERABIS COLLEGE

articles, and search terms will include "thyroid disease," "hypothyroidism," "hyperthyroidism," "thyroid nodules," and "thyroid cancer."

**Data analysis:**

The data collected from the literature review will be analyzed using medical software to organize and categorize the information. The data will be organized according to the project objectives, including the anatomy and physiology of the thyroid gland, the pathophysiology of thyroid disease, diagnostic tools, treatment options, and strategies for managing thyroid disease.

**Review of guidelines and recommendations:**

Clinical guidelines and recommendations from professional organizations, such as the American Thyroid Association and the Endocrine Society, will be reviewed to identify best practices for the diagnosis and management of thyroid disease.

**Patient education resources:**

Patient education resources from reputable sources, such as the National Institute of Diabetes and Digestive and Kidney Diseases and the American Thyroid Association, will be reviewed to identify strategies for improving patient education and engagement in the management of thyroid disease.

**Synthesis of findings:**

The findings from the literature review, analysis of data, review of guidelines and recommendations, and patient education resources will be synthesized into a comprehensive overview of thyroid disease, including its pathophysiology, diagnosis, treatment, and management.

**Writing and editing:**

The project will be written and edited to ensure clarity, accuracy, and completeness. The project will be organized according to the project objectives, and appropriate headings and subheadings will be used to ensure easy navigation and understanding of the material.

**Review and revision:**

The project will be reviewed and revised by medical professionals to ensure accuracy and appropriateness of the information provided.

**Dissemination:**

The project will be disseminated through online platforms and medical conferences to reach a wider audience and increase awareness and understanding of thyroid disease.Thyroid disease is a common endocrine disorder that affects millions of people worldwide. It is caused by dysfunction of the thyroid gland, which can result in either hypothyroidism or hyperthyroidism. The aim of this project is to provide a comprehensive overview of thyroid disease, including its pathophysiology, diagnosis, treatment, and management. The project objectives are well-defined and will help to

Principal
DERABISH COLLEGE

provide a structured approach to the project. The literature review is an essential part of the project, as it will provide a comprehensive understanding of thyroid disease and help to identify best practices for diagnosis and management. The analysis of data collected from the literature review will help to identify patterns and trends in the information, which can be used to guide the project's conclusions and recommendations.

The review of clinical guidelines and recommendations is also an important aspect of the project, as it will provide evidence-based guidance for the diagnosis and management of thyroid disease. By reviewing patient education resources, the project can help to identify strategies for improving patient education and engagement, which can lead to better patient outcomes. The synthesis of findings is a critical component of the project, as it will help to organize the information and provide a clear and concise overview of thyroid disease. The project's writing and editing process will ensure that the information is presented in an accessible and understandable manner. One potential limitation of the project is the reliance on published research articles, reviews, and textbooks for the literature review. There may be unpublished research or clinical experiences that could provide valuable insights into the diagnosis and management of thyroid disease. However, by using a comprehensive search strategy and online medical databases, the project can help to minimize this limitation. In conclusion, this project will provide a valuable resource for medical professionals, patients, and their families on the diagnosis and management of thyroid disease. By increasing awareness and understanding of thyroid disease and providing evidence-based guidance, the project can help to improve patient outcomes and quality of life.

## RESULTS AND DISCUSSION

Identification of thyroid disease becomes most important and vital process in our day to day life of many patients in certain cases, it becomes a difficult task from both clinical diagnosis and statistical classification point of view. The poor performance of the traditional model based statistical methods and due to large number of interrelated patient attributes as well as extremely unbalanced groups in the thyroid diagnosis problem complicates the relationship between these attributes and the patient true group membership. After the emergence Artificial Neural network (ANN) is a flexible modeling technique exclusively used for complex functional mapping and showed progressiveness in the diagnosing process thyroid disease. After the emergence of artificial neural network, many researchers used different proportionate in order the diagnose thyroid disease in a most appropriate manner. Each of the researchers had performed different methodologies with a different objective but finally they focus on finding the accuracy and impact of thyroid diseases had not changed yet, still they do try different and wider context but eventually they all are working towards identifying the best suitable and appropriate methodology for diagnosing thyroid diseases with a fullest efforts.

## Conclusion

The pathology of the thyroid gland presents the pathologist with a particular set of diagnostic problems. If best practice and the minimum data set guidelines are adhered to, the correct diagnosis should be reached in most cases. Newer techniques such as immunocytochemistry can certainly be helpful in more difficult cases but, as in all areas of pathology, histological features take precedence and good communication with the relevant clinical colleagues is paramount.

Most of the researchers focused on artificial neural networks as a diagnosing tool to increase the accuracy of performance. There was no appropriate selection of artificial neural networks architecture which certainly affects the network performance wherein it is to perform effectively to reach the high accuracy. In this study, we had identified and found the various type of appropriate architecture and techniques where in the correct selection of diagnosing will ensure the accuracy and the network complexity can be reduced, so as to achieve the best result by comparing their performance to reach the best. possible. This study will certainly help the academicians and researchers to take forward a step towards identifying the best suitable and most widely used method of diagnosing thyroid diseases in a wider context.

# ACKNOWLEDGEMENT

*It is my pleasure to express my gratitude and high regards to my respected teacher* **Dr. ASHWINI KUMAR PRUSTY,** *Assistant Professor (Head of the Department) Department of Physics Derabish Degree college, Derabish for his kind guidance, assistance and advice during this project work. It is also admitted that without his supervision, it wouldn't be possible for me to prepare this project.*

*Also, I offer my thanks to all the faculty members of Physics, Department of Physics Derabish Degree college, Derabish and my batch mates for their unconditional help and inspiration.*

*Finally, I express my sincere thankfulness to my family members for providing* **me inspiration, encouragement and support.**

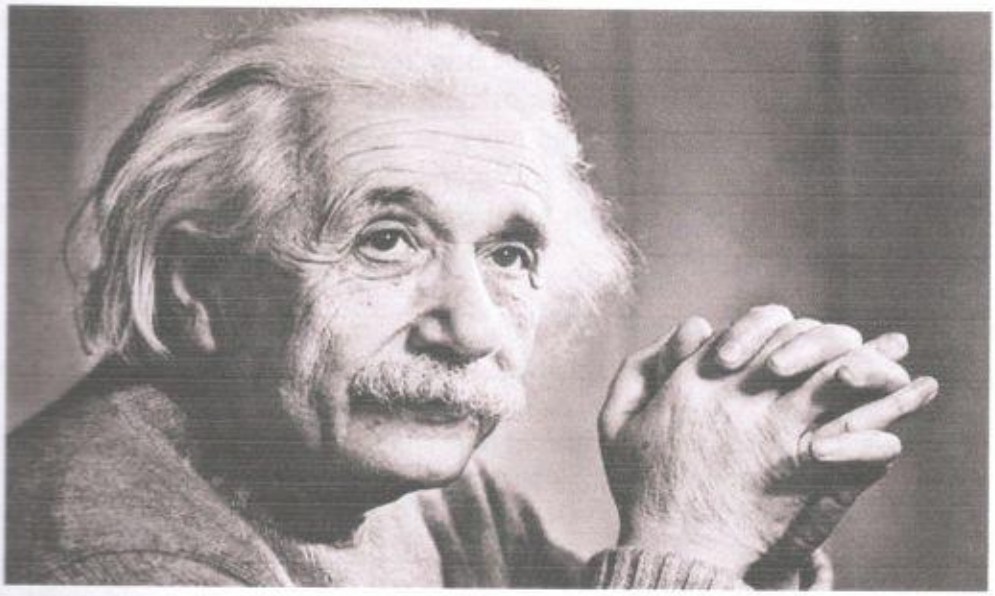
# *INTRODUCTION :-*

Black holes are perhaps the most strange and fascinating objects known to exist inthe universe. Our understanding of space and time is pushed to its limits by the extreme conditions found in these objects. They can be used as natural laboratories to test the behaviourof matter in very strong gravitational fields.

Black holes seem to play a key role in the universe, powering a wide variety of phenomena, from X-ray binaries to active galactic nuclei. In this article we will review the basics of black holephysics.

The simplest definition of a black hole is an object that is so dense that not even light can escape its surface. But how does that happen? The concept of a black hole can be understood by thinking about how fast something needs to move to escape the gravity of another object - this is called the escape velocity. Formally, escape velocityis the speed an object must attain to "break free" of the gravitational attraction of another body.



There are two things that affect the escape velocity - the mass of object and the distance to the centre of that object. For example, a rocket must accelerate to 11.2 km/s in order to escape Earth's gravity. If, instead, that rocket was on a planet with the same mass as Earth but half the diameter, the escape velocity would be 15.8 km/s. Even though the mass is the same, the escape velocity is greater, because the objectis smaller (and more dense).

What if we made the size of the object even smaller? If we squished the Earth's massinto a sphere with a radius of 9 mm, the escape velocity would be the speed of light. Just a wee-bit smaller, and the escape velocity is greater than the speed of light. Butthe speed of light is the cosmic speed limit, so it would be impossible to escape thattiny sphere, if you got close enough.

The radius at which a mass has an escape velocity equal to the speed of light is called the Schwarzschild radius. Any object that is smaller than its Schwarzschild radius is ablack

## Conclusion:-

DERABISH COLLEGE
KENDRAPARA
ESTD-1981

- When we look into the universe today, we see that pretty much every large galaxy has a super massive black hole in its heart. Even the Milky Way has ablack hole at its core with a mass of four million times that of the sun.

- Black holes are a long way of at least 26,000 light years (260 quadrillionkilometres)

- Its mass is still very small compared to the 200 billion solar masses of ourgalaxy so it cannot really harm us.

- . Even though black holes can cause death and destructions on a major scale, they also help galaxies themselves form! So we own our existence to them.

- Black holes may be used as worm hole in future in time travel.

## Reference:-

- An object with such a strong gravitational field that its escape velocity exceeds the velocity of light. One way in which black holes are believed to form is when massive stars collapse at the end of their lives. A collapsing object becomes a black hole when its radius has shrunk to a critical size, known as the Schwarzschild radius, and light can no longer escape from it.
- . The surface having this critical radius is referred to as the event horizon, andmarks the boundary inside which all information is trapped. Hence events within the black hole cannot be observed from outside.

- Theory indicates that both space and time become distorted inside the event horizon and that an object collapses to a single point, a singularity, at the centre of a black hole. Black holes may have any mass. Super massive black holes (10 solar masses) may exist at the centres of active galaxies. At the otherextreme, mini black holes of radii 10-10 m and masses similar to that of an asteroid may have been formed in the extreme conditions following the Big Bang.

- No black hole has ever been observed directly. However, an accretion disk may form around a black hole when matter falls towards it from a nearby companion star or other source. Energy predominantly at X-ray wavelengths isproduced as matter in the accretion disk loses momentum and spirals in; theseX-rays can be detected by satellites in orbit.

- Several black-hole candidates have been located in our Galaxy, most famously Cygnus X-1. In addition, there is good evidence for a super massive black holeof 3-4 million solar masses at the centre of our Galaxy.

- There are several theoretically possible forms of black hole. A non-rotating black hole without electrical charge is known (after K. Schwarzschild) as a Schwarzschild black hole. A non-rotating black hole with electrical charge is termed a Reissner-Nordström black hole after the German physicist Hans Jacob Reissner (1874-1967) and the Finn Gunnar Nordström (1881-1923). In practice, black holes are likely to be rotating and uncharged, a form known asa Kerr black hole. Black holes are not entirely black; theory suggests that theycan emit energy in the form of Hawking radiation.

# ACKNOWLEDGEMENT

I would like to express my special thanks of gratitude of my teacher **Prof.Ashwini Kumar Prusty**, who gave me the golden opportunity to do this wonderful project on the topic of "Zener Diode" which also helped me in doing a lot of research and I come to know about so many new things. I am really thankful to him.

I would also like to thank to my all friends who helped me a lot in finishing this project with in the limit time. I am making this project not only for marks but also to increase my knowledge.

Also,I thank to everyone who helped me to complete this project.

## Conclusion

We observe zener diode and it functioning in forward and reverse baising studied V-I charecterstics Graphically and theoratically . the zener diode with its accurate and specific revrese breakdone voltage allows for a simple inexpensive voltage regulator. Fine control over both the voltage and the supply current can be attained.

## ABSTRACT:-

To study and calculate the content of ascorbic acid in different citrus fruits.

## IDENTIFICATION OF PROBLEMS: -

To study and calculate the content of ascorbic acid in different citrus fruits. Vitamin C or ascorbic acid in citrus fruits is a water soluble carbohydrate like substance involved in certain metabolic processes of animals. Although most of the animals can synthesise vitamin C, it is necessary in the diet of some including men and other primates. It also acts as a powerful antioxidant which fights against free-radical induced diseases [1–5]. Nevertheless, an ascorbic acid excess can lead to gastric irritation, and the metabolic product of vitamin C (oxalic acid) can cause renal problems [6]. vitamin C inhibits oxidation processes responsible for apple juice aroma [7]. In order to prevent scurvy, disease characterized by haemorrhage especially in skin and mucous membranes Vitamin C was identified as a curative agent for survey in 1928. The name ascorbic acid is derived from the expression anaisearbatic vitamin, referring to vitamin's ability to prevent and to curve scurvy. First isolated in 1928 by Hungarian biochemist and Nobel Prize winner Albert Seent Ceyorghi. Vitamin C has been the object of continued active laboratory research to determine the specific mechanism of action of cells.

*The name "ascorbic" comes from its property of preventing and curing scurvy. Primates including humans and few other species of the same animal kingdom, notably the guinea pig, have lost the ability to synthesize ascorbic acid, and must obtain it in their food.*

*Ascorbic and its sodium, potassium, calcium salts are commonly used as antioxidant food additives.*

*These compounds are water-soluble and thus cannot protect fact from oxidation.*

*For this purpose, the fat-soluble esters of ascorbic acid with long chain fatty acid can be used as food antioxidants. 80% of World's supply of ascorbic acid is produced in China.*

DERABIS COLLEGE KENDRAPARA ESTD-1981

# ANALYSIS: -

## Results:-

*The following are the percentage of ascorbic acid to various citrus fruits.*

| Name of Fruits | Weight (g) | Juice (ml) | Amount of ascorbic acid per (mg/piece) |
|---|---|---|---|
| *Lemon* | *27.70* | *13* | *4.16* |
| *Bitter orange* | *86.50* | *34* | *9.86* |
| *Sweet orange* | *95.52* | *45.8* | *10.53* |
| *Citrus maxima* | *180* | *47* | *7.20* |

*Another result on percentage of ascorbic acid present on different citrus fruits like Lemon,Orange and Citrus maxima are follows-*

*Lemon juice = 31.68%*
*Orange juice=48.48%*
*Citrus Maxima = 70.4%*

DERABISH KENDRAPARA ESTD-1961 DERABISH

## Conclusions: -

*The following conclusions have been drawn from the above result and discussion.*

*The concentration of Ascorbic acid varies from one citrus fruits to another one and also varies from one method to another method of determination.*

*The percentage of ascorbic acid was found to be less in lemon juice and more in Citrus Maxima juice.*

*Here starch solution was added to the fruit juices, before doing titration due to which some of the fruit content reacted starch and a permanent complex was formed which could not be oxidized.*

*It is necessary that the fruit juice be stored in cool temperature in order to its ascorbic acid not to decrease.*

# ***INTRODUCTION***

"Women" is the non-differentiate part of the society and is the most important supplement within it. We can't imagine a complete, natty and dynamic planet excluding women.

Women of course mean to 'female' which derived from Latin Word 'femella' or 'femina' even known to opposite to men.

From the past, mainly historic period to current period women's had got suppressed in society and seems then as in demean view.

After globalization surprisingly we can found to see that women's are contribute there thinking, knowledge, labour and efforts in everywhere. May be there is any field where women's neither have contribution. In the field of science, politics, agriculture, Health care, and everywhere we found to see the power and dedication of the women. They are now become well educated, wealthiest, socialist, functional also from every aspects of social and global activities or development, they proved themselves as best and uncompetitive.

So we have not to discriminate among men and women we have to respect women always and facilitate them to be like themselv.

A women is a female human being. The word women is usually reserved for an adult; girl is the usual term for a female child or adolescent. The plural women is also sometimes used for female humans, regardless of age, as in phrases such as "women's rights".

Laski – "Rights are those conditions of social life without which no man can seek in general to be himself at his best".

They include civil & political rights which refer to a person's rights to take part in the civil & political life of their community without discrimination or oppression, these include rights and freedom such as the rights to vote, the rights to privacy, freedom speech and freedom from torture.

It is something which you are initiated by virtue of being human. Human rights are based on the principle of respect for the individual there fundamental assumption is that is person is a moral and rational being who deserves to be treated with dignity they are calls human rights because they are universal.

Women's rights are the rights and entitlements claimed for women and girls worldwide, formed the basis for the women's rights movement in the nineteenth century and feminist movement during the twentieth century. In some countries these rights are institutionalized or supported by law, local custom and behavior, whereas in others there ignored and suppressed.

They differ from broader nations of human rights through claims of an inherent historical and traditional byes against the exercises of rights by women and girls in favor of main and boys.

Women's rights are the fundamental human rights that were enshrined by the united nations for every human being on the planet nearly seventy years ago. These rights include the right to live free from violence, slavery and discriminations; to be educated to own property; to vote; and to earn a fair and equal wage.

# CONCLUSION

Human rights are the rights which are believed to belong to entire human race. It means it belongs to all and not to one specific group. Human rights are the fundamental rights and are available simply by the fact of being human. Thus they are different from privilege, which can be taken away at someone's whim. The international law gives freedom to womenfolk to enjoy the same human rights and fundamental freedom as enjoyed by other individuals. But due to mass violation of human rights in general and women'S rights in particular, women are not able to enjoy their civil, political, social, economic and cultural rights or face multiple obstacles in enjoying these rights. To eradicate violence against them, to make their voice heard in decision making process, to ameliorate their overall position and enable them to enjoy their rights, especially their rights to life, liberty, equality and dignity, is the need of an hour. The history has witnessed women struggling in every era and every part of the world for their rights. The umbrella of human rights is massive and various nations face different challenges in promoting and implementing human rights. Violence against women is widespread in all the corners of world and such violence is a human right violation that manifests itself in number of ways.

In our nation, the Directive Principles of State Policy, enshrined in Part IV of the Indian Constitution reflects that India is a welfare state. The directive principles affirms that: the State must strive to promote the welfare of the people (Art. 38), must direct its policy towards securing: men and women equally have the right to adequate means of livelihood [Art. 39 (a)], material resources of the community be so distributed to serve the common good [39 (b)], equal pay for equal work for both men and women [39 (c)], etc. If India is welfare state then why attitude of government towards women is frustrating? Why are crimes against women increasing?

Principal

DERABIS COLLEGE
KENDRAPARA
ESTD-1981

Why is literacy rate of women in India low? Why is sex ratio skewed in India? National Crime Report Bureau (NCRB) statistics reveal that crimes against women have increased by 7.1% nationwide since 2010. There is an increase of 9%, 10.5% and 4.6% in rape cases, kidnapping cases of women and dowry deaths, respectively in the year 2014 as compared to the year 2013 as per the reports of NCRB. Literacy rate of females in India is 65.46% as against 82.14% of males as per Census 2011. Due to violent treatments meted out to girl child at the time of birth decrease the female birth ratio in India. Thus sex ratio in India is 940 females per 1000 males.36% of Indian women are chronically under-nourished from their childhood itself.5As per one of the articles of newspaper, the Indian government has allocated Rs 1000 crores every year towards the Nirbhaya Fund6- for schemes to ensure safety and security of women since the year 2013. But since last three years, the fund has remained unspent due to failure of government to design the schemes useful for women.

The present study discloses that the status of women seems to be regressing even though the entire world is progressing. The researcher finds contrasting trends in the society i.e. on one hand legislative wing of the country is making efforts to enact new laws for emerging challenges and amend the existing ones in case of inadequacies; stakeholders are making efforts to protect women, women are gradually gaining awareness of their rights, and on other hand there is increase in crimes against women. Women, at international, national or local level have been victimized in past or present. Even today, they are victims of suppression, oppression and violence. It is said that water is a compound i.e. 2 atoms of hydrogen and 1 atom of oxygen. To protect women"s basic rights and to ameliorate their position, 2 components i.e. stakeholders and society as a whole will have to make efforts and on other side women folk instead of surrendering to the inferior status granted to them, should

Principal

gain awareness of their rights and should voice the exploitation exercised against them.

# REVEW OF LITRATURE

Review of literature is a vital part of any research. It helps the researcher to know the areas where earlier studies had focused on and certain aspects untouched by them. There have been numerous thought-provoking studies on human rights violation against women. A look at the studies shows that violations against women are increasing day by day in the local and global context.

Women have always been treated differently, whereas men have claimed all rights they have denied them to women. Religion has also helped in perpetuating the denial of equal rights to women. They have also been subject to socio-economic and cultural deprivations. They have been vulnerable to violence and exploitation such as harassment, taunts, abuses, battering, molestation, rape, dowry deaths, sati, mental and physical torture.

Caste system is peculiar to India. Here people are branded as untouchables, denying them the right to live as human beings. They are oppressed, suppressed and marginalised by the so-called upper caste people.

Violence, discrimination and abuse against women and dalits should be eliminated. Governments, private organisations and individuals have been fighting against these evils, but not with much success. Education and enlightenment can go a long way to break the social, economic and cultural shackles that have bound women.

→With the long cherished moments of completion of this project, with warm gratitude and regards, I recall the people who have encouraged and helped me.

→First of all, I extend my deepest gratitude to my revered supervisor **Dr.Sandeep Bal** under his active guidance I completed my long cherished dream. He provided moral support, affectionate encouragement, critical analysis and priceless suggestions at all stage of my thesis Work. Since my three years of academic engagements under his active supervision, I learned many things which I cannot explain within a paragraph. Honesty, sincerity and punctuality are the core principle of his behavior which always inspires me to follow the same path for my future academic career. Again, I sincerely thanks from the core of my heart to my supervisor.

→I am immensely thankful to all my respected teachers of my Department-**Sr.Prof Santanu Kumar Mati, Sri.Brundaban Das and Dr.Sandeep Bal,** scholars for their valuable suggestions and guidance throughout my work.

→I am cordially indebted to libraries of Derabis Degree College, Kendrapara, odisha.

→It is Essential to acknowledge and appraise from the bottom of my heart, to my Friends

For assinstaking me to overcome towards the accomplishment of my thesis work.

→The paintaking effort of edting has meticulously been done by my respectable friends and seniors and my others inseparable friends despite their own academic works, for which words fall short

→The words will be insufficient to owe my gratitude to my father and mother who have

become a perennial source of inspiration for me throughout my life for their constant support and motivation. I am thankful to. all my family members for their encouragement.

## Conclusion

Although the Women's Rights Movement can be chronologically traced through three interlocking waves, with vastly different focuses through each of these eras, the struggle for true equality has been constant and never-ending since the 1840's. The First Wave of Feminism is inexorably tied to suffrage, typically considered as starting in Seneca Falls and ending with the passing of the 19th Amendment. R 01elatively, this was likely the most radical and society-shaking of each of these movements, as prior to then women were rightless and voiceless; and then, suddenly, women were making enormous advances in the political and economic spheres, gaining social standing, more favorable marital rights, economic and property rights, and eventually the right to vote due to the determination, ambition, and steady leadership of women such as Susan B. Anthony, Sojourner Truth, Elizabeth Cady Stanton, Victoria Woodhull, amongst other similar like-minded individuals. When the 19th Amendment was passed, the Women's Rights Movement briefly quieted - but it remained necessary, as proven by the following waves. The Second Wave of Feminism, ushered in by *The Feminine Mystique*, *The Second Sex*, and other similar texts, was aimed specifically at the social standing of women. Led by Betty Friedan and Gloria Steinem, amongst others, this wave was concerned with changing societal expectations and perceptions of women; with abolishing the objectification of women and replacing it with respect on par with that of men; with changing inequalities within the workforce. This more militant and driven face of feminism helped to push great changes for women in society, although opposition from anti-feminists often stopped their efforts dead in their tracks, including halting the passing of an Equal Rights Amendment.

PRINCIPAL
DERABISH COLLEGE

The lack of legal equal rights proved the continued need for a women's rights movement, and the Third Wave of Feminism built on principles previously established, proving to be even more inclusive and driven. This wave encompasses groups previously pushed out of previous waves - women of colour, queer women - and strives to fight society's perceptions and their own invisibility head-on. The Women's Rights Movement has made enormous gains in the game of rights - giving women legal standing, respect in society, visibility, and voices. But the fact that opposition continues to halt the upward mobility of women in society; and that women are still not truly fully equal, legally or in perception, and that many groups of women remain ignored, proves that women's rights is still relevant - and that the movement is far from over.

## Conclusion

Although the Women's Rights Movement can be chronologically traced through three interlocking waves, with vastly different focuses through each of these eras, the struggle for true equality has been constant and never-ending since the 1840's. The First Wave of Feminism is inexorably tied to suffrage, typically considered as starting in Seneca Falls and ending with the passing of the 19th Amendment. R 01elatively, this was likely the most radical and society-shaking of each of these movements, as prior to then women were rightless and voiceless; and then, suddenly, women were making enormous advances in the political and economic spheres, gaining social standing, more favorable marital rights, economic and property rights, and eventually the right to vote due to the determination, ambition, and steady leadership of women such as Susan B. Anthony, Sojourner Truth, Elizabeth Cady Stanton, Victoria Woodhull, amongst other similar like-minded individuals. When the 19th Amendment was passed, the Women's Rights Movement briefly quieted - but it remained necessary, as proven by the following waves. The Second Wave of Feminism, ushered in by *The Feminine Mystique*, *The Second Sex*, and other similar texts, was aimed specifically at the social standing of women. Led by Betty Friedan and Gloria Steinem, amongst others, this wave was concerned with changing societal expectations and perceptions of women; with abolishing the objectification of women and replacing it with respect on par with that of men; with changing inequalities within the workforce. This more militant and driven face of feminism helped to push great changes for women in society, although opposition from anti-feminists often stopped their efforts dead in their tracks, including halting the passing of an Equal Rights Amendment.

The lack of legal equal rights proved the continued need for a women's rights movement, and the Third Wave of Feminism built on principles previously established, proving to be even

more inclusive and driven. This wave encompasses groups previously pushed out of previous waves - women of colour, queer women - and strives to fight society's perceptions and their own invisibility head-on. The Women's Rights Movement has made enormous gains in the game of rights - giving women legal standing, respect in society, visibility, and voices. But the fact that opposition continues to halt the upward mobility of women in society; and that women are still not truly fully equal, legally or in perception, and that many groups of women remain ignored, proves that women's rights is still relevant - and that the movement is far from over.

## CONCLUSION

It can be concluded that the study area is to obtain the financial, social, technical support and skill development for income generation which leads to self empowerment. NGOs, Government awareness programs and other SHG members are found to be main motivating persons to encourage the women to form SHGs in the study area. No conflicts are found among the group members. The study finds that there is a shift from borrowing of loans for consumption purposes to production purposes after joining SHGs. After joining SHGs, thry have understood the importance of economic activities for women. Their role and responsibility in the family has also improved. They are socially and politically aware and economically empowered after associating with SHGs. It can be concluded that the impact of SHGs is not uniform in all the villages. This could be attributed to several factors like motivating persons, satisfaction over functioning, percentage of increase in monthly income, expenditure, percentage of increase in monthly savings, level of knowledge, level of skill development, participation in social service activities, political awareness and problems handling capacity. However, there are various issues such as negative attitude of banks, non cooperation among the members, lack of knowledge to manage financial affairs of the group due to lower levels of education and lack of knowledge on the rules and regulations for the functioning of the SHGs.

# CHAPTER-IV

## 4.1 CONCLUSION: -

Furthermore,the poverty dimension should not be omitted from the nexus diversification fishery conservation / management but information is lacking on this intricate relationship do people/ communities who are lets poor, manage their fisheries resources better? No evidence from the fisheries sector was foundincluding poverty in the equation ids opening the debate even wider, yet , as was seen earlier , poverty &diversification are intimately linked and omitting one from the picturecould lead to erroneous decisions experience is however starting to emerge from the application of sustainable livelihoods approaches to improving our understanding of this true way and complex relationship and helping to identity entry points at the activity and policy level to improve the livelihoods o fishers identity entry points at the activity and policy level to improve the livelihood of fishers whilst conserving their natural resources based the transient nature of fisheries resources conditions the livelihood of those who in one way or another relay on it for part of their incomes with likely repercussions on the nature of poverty faced "transitory " or "chronic " and for which two different types of support policies can be devised "cargo net " in the former "safety net" in the later (Barrett 2005) . Sustainable livelihood approaches develop to in form policy makers of the exact of fishers, andimplicated in had with new fisheries management approaches such as the ecosystem approach to fisheries ,may offer constructive solution for the simultaneous promotion of diversification and fisheries conservation supported by the right type of policies they should ensure long term improvement in the livelihood of coastal and inland dwellers .

## 4.2 POLICY SUGGESTION

The improvement of human and social capital of the fisherfolk and the political and institutional environment could be entry points to making physical, financial and natural capital more efficient and to reduce vulnerability through a better choice of the strategies, permanent achievements,diversified and enduring partnerships, a better representation of communities leading to an active roleinthepreparation and implementation of policies.

Future interventions will have to focus on building social capital, for example through development of professional organisations, particularly by improving the existing informal groups. The capacity of fisheries communities will be enhanced by making them familiar with the essential of organization development and leadership skills. This will help them to be a real partner to Government and other intervening institutions.

Therefore, the Government and other financial institutions should focus to developing some partnership with all stakeholders at regional level to reinforce their capacity, the sector makes more visible and facilitates the eligibility of the sector for funds mobilised for poverty reduction in rural areas.

# CHAPTER – 1

## 1.1 INTRODUCTION

Coronavirus disease 2019 (COVID 19) is defined as illness caused by a novel coronavirus called. SEVERE ACUTE RESPIRATORY SYNDROME CORONAVIRUS 2 ( SARS -cov - 2 formerly called 2019 - n Cov ), which was 1st identified amid an outbreak of respiratory illness cases in Wuhan city Hubei province China . It was initially reported to the WHO on Dec 31 , 2019 . On Jan 30 , 2020 the WHO declared the COVID 19 outbreak a global health emergency . On Mar 11 ,2020 the WHO declared COVID 19 a global pandemic .

Coronaviruses are zoonotic . This means they 1st develop in animals before developing in humans . For the virus to pass from animal to humans ,a person has to come into close contact with an animal that carries the infection . Once the virus develops in people , coronavirus can be spread from person to person through respiratory droplets . This is a technical name for the wet stuff that moves through the air when you cough to sneez . The viral material hangs out in these droplets and can be breathed into the respiratory tract ( our windpipe and lungs ) , where the virus can then lead to an infection .

COMMON SYMPTOMS

* Fever
* Tiredness
* Dry cough

SOME PEOPLE MAY EXPERIENCE

# CHAPTER IV

## 4.1 Suggestions

Following are the few suggestions for the improvement of migrant workers of the village .

* Mark the people under Below Poverty Line (BPL) and provide them BPL card so that they can get more facilities from the govt site .

* To provide primary health care services and creates awareness about health among the villagers.

* Job oriented programmes should be implemented in the village level .

* Introduce various employment programmes for the youth population to reduce the burden of unemployment

* To introduce various schemes for poor peoples of the village.

## 4.2 Conclusion

The above analysis painly indicates the overall status of the migrant workers of the village is not good . In this study most of the migrant headed by the male members . Most of the people have in the age group of 30 - 50 .The average family size of the migrant is 6.2 % . Most of the people belonging Other Backward classes & most of the people in Below Poverty Line . They are engaged mostly in primary sector . Most of the people in that village earning 4000 - 6000 monthly. Overall we found that the condition of migrant people of Barimula village is not good .

# INTRODUCTION

In nature the evalution of population is conceptually straight forward. If a group relies on a local area for its sustenance then its population will be limited by the productivity of that area. If productivity doesn't meet the demand of the group, or the group will move to find more productive land. Thus sustainability can be viewed as a ration of the demands of the group compared to productivity of the land.

India is the second overpopulated country in the world which reached 130 cores and one sixth of the population of the world. It is next to china and has 2-4 percent of the total population of the world land area where she has to support nearly 16% of the world population. According to 1981 census it had 68.4 corers of population. In 1991 its population was 84.4 corers. According to the 2001 census its population is 102.7 corers. The growth of population per year is more than 17 million which is equal to the total population of Australia from this survey it is evident that India's population increasing very rapidly.

The limitations apply to humans; we are bound by our regions both geographical and political. If a country can't produce enough a food element in to analysis, as it effectively raises the amount of food a region has. Thus the population of an area could theoretically greatly exceed the productivity level of its political boundaries if it imports enough to feed its population. This however brings up another level of analysis, dissemination of goods if a countries Govt. fails to adequately dispense goods to its population, then Govt. can be substitute for land and population can be measured as the ration of demands of the people to the ability of the Govt. to meet those demands in terms of infrastructure and distribution. Ultimately, humans are collectively limited by production capabilities of planet earth.

## INTRODUCTION

By absenteeism we mean, the schedule time off from college occurs when a student is not present at class during a normal scheduled college period. In colleges, frequent unexcused absences are considered to be truancy, and many have substantial legal penalties for both the students and the parents. Frequent absence from college is associated with failing grades, poor performance, and disciplinary problem and long-tem social difficulties. As for students, they should have self aware within themselves about the issue. Being absent is not helping them to achieve their aimed goals in their studies. Occasionally, it shows the students hidden attitude or hidden personality of not fully responsible towards themselves and towards others plus they could be labeled as the type of person which having the disciplinary problems within themselves. In addition, excessive absenteeism may lead to lower performance rate, incur problems in their moral and behavior as they are not having the interest in attending classes in schools or colleges. College has its own number of day's classes. Things could get worst when they could be expelled from the examination or expelled from their college which then will be placed in alternative colleges if they are continuously absent throughout the year. In consequences, they will earn huge losses as they had waste time, money and effort since they had study in college for certain period of time.

One of the most common areas where classroom practices of individual faculty members differ is attendance policy. Some faculty requires attendance. Some faculty count attendance positively in grade determination while others count the lack of attendance against the student's grade. Even most faculty who don't require attendance by their students encourages attendance in variety of ways. Inherently

Principal
DERABISH COLLEGE

**Table No.: 1.4**

Classification of Respondents on the basis of Class

It is decided by the research committee of the department to interview the +3 students of Arts. Science & Commerce stream.

| Stream | No. of Respondents | Percentage |
|---|---|---|
| Arts | 5 | 50% |
| Science | 2 | 20% |
| Commerce | 3 | 30% |
| Total | 10 | 100% |

It reveals that 50% respondents belong to Arts stream, 30% belong to Commerce stream and 20% belong to Science stream.

**Table No.:1.5**

Opinion of Respondents on attending classes

| Category of Response | No. of Respondents | Percentage |
|---|---|---|
| Yes | 7 | 70% |
| No | 3 | 30 |
| Total | 10 | 100% |

It reveals that 70% of the respondents attend classes regularly and only 30% do not attend classes regularly.

PRINCIPAL
DERABISH COLLEGE

**Table No.:1.6**

Reasons of absent from classes (Refer Table No.:1.5)

| Reasons of Absent | Type of Response | | Percentage | |
|---|---|---|---|---|
| | Yes | No | Yes | No |
| a). Teaching Uninteresting | - | 3 | - | 100% |
| b) Teachers remain Absent | - | 3 | - | 100% |
| c) Tuition | 2 | 1 | 67% | 33% |
| d) Lack of Classroom | - | 3 | - | 100% |
| e) No employment | 1 | 2 | 33% | 67% |
| f) Less importance on attendance | 3 | - | 100% | - |
| g) Any other (Specify) | 1 | 2 | 33% | 67% |

The above table reveals that all the respondents disagreed that teaching as uninteresting, teacher remain absent and lack of classroom are the reasons of absenteeism. 67% agreed that tuition is a cause of absenteeism, while 33% disagreed with this statement. All the respondents agreed that less importance on attendance is the main reason of absenteeism.

**Table No.: 1.7**

Classification of Respondents on the basis of Family Annual Income

| Family Annual Income (INR) | No. of Respondents | Percentage |
|---|---|---|
| 0-50,000 | 6 | 60% |
| 50,000-100,000 | 3 | 30% |
| >100,000 | 1 | 10% |
| Total | 10 | 100% |

PRINCIPAL
DERABISH COLLEGE

It reveals that 60% of the respondents are having annual family income within Rs. 50,000 (INR) or less, 30% of the respondents are having annual family income between Rs. 50,000 to Rs. 100,000 (INR) and only 10% of the respondents are having annual family income above Rs. 100,000(INR) .All the respondents opined that they are not in habit of drugs, alcohol or nicotine. All the respondents viewed that teachers are co-operative.

Respondents suggest that strict attendance, parents care and vigilance, attending classes should be their primary duty, awareness, teachers-student interaction, improvement of teaching method and course, teacher should not hold tuitions and must not be allowed to sit at the examination, attitudinal change etc. are required to solve the problem of absenteeism. More over the suggest for introduction of employment generating courses.

# INTRODUCTION

DERABIS COLLEGE KENDRAPARA ESTD-1981

Most of the developing countries of the world including India are facing a social tragedy found in the form of child abuse and child labour. A large number of children below the age group 12-14 are forced to work as labour in many places, especially in the agricultural and industrial areas the physical, emotional, educational and medical needs of these working children are made to work for long hours, The are often battered by their employees and harassed by their senior colleagues unlike the adult labourers these child labours denote have labour union of their own to fight for their rights and safeguard their interest. Hence their exploitation continues without any protest .Neither the government nor the public is serious enough to make organised and the psychologist have not taken much interest in highlighting this grave problems. The nation is also not aware of the gravity of the problems.

- According to the constitution of India Child Labour may be defined as a person who is below the age of 14 year and is working for an caring.
- According to home flaks, child labour is any work done by children that interferes with their full physical development. Their opportunities for desirable minimum of education of their needed recreation.
- According to the concerned for working children(CWC)of Bangalore –a child labour is a person who has not completed his/her fifteen year of age and is working with or without wages/income on part time or a full-time basis .

## Introduction:

The Indian freedom struggle has conventionally been associated with the organized nationalist movement of Satyagraha, non-violence and its major advocates-Gandhi, Nehru and Patel. This perception of the movement has lent to it a monochromatic and patriarchal nature. The organised resistance against the British in fact finds history in the 1800's, when in its infancy pioneers were not only male leaders, but also rebel female leaders like the Rani of Jhansi. However, with the progression of the struggle into a more structured and coherent movement, the role of women and their nationalist contributions also changed. The change, however, cannot be viewed as a linear transformation. Instead, it is a layering or fragmentation that makes the role of women and femininity during the freedom struggle a more complex phenomenon. This can clearly be seen in Gandhi's views on the role of women, where they are encouraged to embody the virtues of the mythological Sita-Draupadi and dismiss the more "situationally" accurate Rani of Jhansi symbol. Thus, this report will attempt to analyze the multifaceted role of the woman freedom fighter in India by contrasting her militant and autonomous contributions to her more passive and "domestic" contributions during Satyagraha. This will be done by contrasting female militant and revolutionary tendencies, as seen in the contributions of the rebel leader Rani LakshmniBai, with the Gandhian theory on women's role and contributions during the Satyagraha movement and its subsequent effect on the work of the Gandhian prototype, Sarojini Naidu. However, in studying Naidu's work it is apparent that she tried to rebel from Gandhi's narrowly defined characterization of woman. It is thus conducive to mention that it is difficult to solely view the contributions of the freedom fighters in terms of labels, which in turn renders this complex persona of femininity during the period.

Principal
DERABISH COLLEGE

Gandhi's definition of female heroism by using similar, mythological figures. In exhorting such examples she propagated Gandhi's message of female involvement through non-violent, passive actions from the domestic sphere. At the same time however she rebelled from the constraints of her guru's teachings, to express her desires for a more involved female leadership in mainstream nationalist politics.

DERABIS COLLEGE KENDRAPARA ESTD-1991 DERABIS

PRINCIPAL DERABISH COLLEGE

## CONCLUSION:

KENDRAPARA ESTD 1968

In analyzing the role of women in the independence movement, it thus becomes clear that the perception of the Indian woman, her strength and her subsequent contribution to the movement is not monochromatic. Her changing role, with the progression of the movement has emerged in layers, where each perception of female strength and courage has reinforced or impacted the other. This is evident in Gandhi's thinking where he favored one definition of female heroism over the other. Influenced by his bias towards non-violence he dismissed valor and bravery as exemplified by Rani of Jhansi for a more passive symbol. Her violent approach and resort to a fighting strategy directly contradicted his theory of the "ideal woman." Thus he opted for a Sita-Draupadi representation of female strength where the emphasis was on morality and virtue. Instead of a more historically realistic symbol like the Rani, he included mythological entities into his philosophy, thus giving women this complex task of emulating myths. Furthermore, while he emphasized on how crucial it was for women to break away from the constraints of domesticity, he also perpetuated a separation of the sexes into two different spheres of influence, thereby, leaving limited options for women. His views on women in the political sphere were extremely complex and often times conflicting, which formed a contradiction in his theories. Among his women followers, Sarojini Naidu adopted some of his ideals and implemented them in her work in spreading and mobilizing the Satyagraha movement among women. She came to be associated with the Gandhian prototype and was publicly hailed by Gandhi. Yet at the same time she personally tried to break away from the constraints put forth by his narrow definitions of womanhood. Therefore, even though she attained a position of leadership, it was mainly to advocate women's issues as opposed to mainstream national problems; thus she and others like her were relegated to this passive role in the political movement, at least in contrast to the Rani's more authoritative, rebellious and militant role. Hence, in viewing Naidu's contribution it is evidenced that while she is recognized as the Gandhian prototype, she still appears to reject some of his ideals, which brings to light the fact that it is difficult to only view the women's contributions based on labels. Nevertheless, in conclusion the variegated contributions and views on the female role: the Rani's aggressive and more militant activities, Gandhi's ideas on a more passive and virtuous female identity and Naidu's acceptance of these values while still rebelling from her leader's definition of womanhood together render a complex perception of femininity during the Indian freedom struggle.

## Conclusion :

It is true that Dhauli developed as an urban centre only after the kalinga war and owing to ikts varired importance find its place in the ourstmap of the world. The tourists coming from far and ide to Odish are definitely filled with enthusiasm while visiting this histori place Dhaui. The Ashokan Edicts alongwith te fore par of an emerging elephant, presence of some old temples, and the peace pagoda havetremenously enhaced the importance of Dhauli as a captivating place of torism.The oveall strcture of thestupa is in theshape ofa dome.one can spot the Buddha ootprints aswell as the odhi tree over the stone panes. Over the panels, one also spots the image of Ashoka who keeps his word f war in front of Lord Buddha suggesting that he had given up the idea of wa completely . In the vicinity of this stupa, there lays a monastery devoees. And at a short distance from the shanty Stupa , yo Find the temple of Dhavaleswar that was renovated in the year 1972 and it a point to vsit Dhauligiri and explore various Buddhist attractions that add to the sacred signification of Dhauligiri in Odisha.

vary. Not all are linked together on a common political platform, but virtually all seek the sometimes elusive but nonetheless feminist goal of women's empowerment. The groups active in the movement have thus, been struggling to mainstream their objectives and create a new image of womanhood, by addressing the challenges posed by the conservative forces, which, as discussed earlier, are often also articulated by women's organizations. It is difficult to say how successful they have been, but conservatism continues to be a force to contend with, embedded as it is in social and cultural mores, institutions and increasingly, in political forums

Brief Report on the Event —

A Extramural Seminar organised by Department of Economics on the topic - How to write a Research Proposal / synopsis. on 06.01.2024 in Hall No-14, Derabish college, Derabish. Dr. Minaketan Behera was the the Resource person of the seminar. He has discussed How to write a Research proposal various steps that include in the Research process and How its helpful to students to improve their skills. Ideally, it will demonstrate the quality and importance of your project as well as your ability to conduct the proposed research. The proposal also gives you the opportunity to think through your research project, to refine your focus and to predict any challenges that may arise. The seminar was presided over by the Mr. Chandra Sekhar Nayak - principal in-charge. Mr Sanjay Kumar Mishra HOD of Economics was the main branch of this Seminar. At the end Benu Mohanana Lecture in Economics extended vote thanks all distinguished dignitaries and Students. The seminar has benefited to the Students staff and faculty members of the College in many ways.

# Derabis College hosts seminar on 'Research Methodology and Academic Writing'

**PBD BUREAU**

DERABIS, FEB 26

A two-day national seminar on "Research Methodology and Academic Writing" was organized by the Internal Quality Assurance Cell (IQAC) in collaboration with the Department of Economics at Derabis College in Kendrapara district on February 25-26.

Dr. Minaketan Behera, Professor and Chairperson of the Centre for Informal Sector and Labour Studies at Jawaharlal Nehru University, graced the seminar as the Keynote Speaker. Dr. Sibasankar Mohanty, Associate Professor of Analytical and Applied Economics at Utkal University, and Sarat Kumar Kar, President of the Governing Body of the college, attended as the guests of honour. The seminar was chaired by Chandra Sekhar Nayak, the Principal of the College.

During his keynote address, Dr. Behera elucidated the definition, aims, and objectives of research methodology. He also provided insights into online platforms available for scholars to write research papers, discussed topics such as plagiarism, ethics, e-journals, research designing, and highlighted the applicability of qualitative and quantitative research to real life. He also emphasized the advantages of pursuing research as a career for students and academicians.

Dr. Siba Sankar Mohanty elaborated on the techniques of academic writing and advised academicians to prioritize clarity and simplicity in report writing. He stressed that research should be brief, precise, clear, objective, systematic, supported by evidence, and free from plagiarism.

The seminar featured a lively Question & Answer session with both academic experts, engaging more than fifty-one delegates from various colleges. Additionally, seven delegates presented their research papers during the event.

# National Seminar at Derabis College

## 51 Delegates and 7 Papers presentation

A two days National seminar on "Research methodology and academic writing" has been organized by IQAC in collaboration with the department of Economics in Derabis college at Kendrapara district on 25th and 26th February 2024.

Dr Minaketan Behera, Professor and Chairperson, Centre for informal sector and Labour Studies, Jawaharlal Nehru University, New Delhi attended as the Keynote speaker, Dr. Sibasankar Mohanty, Associate Professor, Analytical and Applied Economics, Utkal university, Vanivihar and Mr. Sarat Kumar Kar, President Governing Body of the college attended as guest of honour of the seminar. Mr. Chandra Sekhar Nayak, the Principal of the College chaired the seminar. Key note speaker Dr. Behera in his key note address highlighted the definition, aims and objectives of Research methodology. He also narrated about the on-line platforms available for a scholar to write research papers, plagiarism, ethics, e-Journals, research designing, qualitative and quantitative research and its applicability to life. He also suggested about the advantages of research as a career for students and academicians.

Dr. Siba Sankar Mohanty elaborated about the techniques of the academic writing and advised the academicians to avoid complexity in report writing. He also narrated research should be brief, exact, clear, objective, systematic, full of evidences and free from plagiarism. There was QA session answered by both the academic experts. More than fiftyone delegates from various colleges attended the seminar out of which seven of them presented their papers. Governing Body president Mr. Sarat Kumar Kar, assured the students to organize more such seminars to enhance their knowledge and advised the students to do hard work and prepare themselves to face any challenges in life.

Mr. Biswajit Sahoo, the Convenor of the seminar welcome the guests and Mr. Sanjay Kumar Mishra conveyed vote of thanks. Mr. Santanu Kumar Mati, and Dr. Rudrangi Patnaik and other faculty members also present on the occasion.

# Speakers At National Seminar In Odisha's Derabis College Ask Researchers To Shun Plagiarism

Kendrapada: A two-day national seminar on "Research methodology and academic writing" was held at Derabis College in Odisha's Kendrapada district.

The seminar, organised by IQAC in collaboration with the department of Economics in Derabis College, concluded on Monday.

Dr Minaketan Behera, Professor and Chairperson of the Centre for Informal sector and Labour Studies, Jawaharlal Nehru University, New Delhi attended the seminar as the Keynote speaker.

Similarly, Dr Sibasankar Mohanty, Associate Professor, Analytical and Applied Economics, Utkal university, and Sarat Kumar Kar, Presidentof the Governing Body of the college, were guest of honour.

Principal of the college Chandra Sekhar Nayak chaired the seminar.

In his key note address, Dr Behera highlighted the definition, aims and objectives of research methodology. He also spoke about the online platforms available for a scholar to write research papers, plagiarism, ethics, e-journals, research designing, qualitative and quantitative research and its applicability to life. He also explained about the advantages of research as a career for students and academicians.

Dr Siba Sankar Mohanty elaborated on the techniques of the academic writing and advised the academicians to avoid complexity in report writing. He said research should be brief, exact, clear, objective, systematic, full of evidences and free from plagiarism.

More than 51 delegates from various colleges attended the seminar where seven papers were presented.

Governing Body president Sarat Kumar Kar said more such seminars will be organised to enhance the knowledge of the students. He advised the students to do hard work and prepare themselves to face any challenges in life.

Convenor of the seminar Biswajit Sahoo welcomed the guests and Sanjay Kumar Mishra conveyed vote of thanks. Santanu Kumar Mati, and Rudrangi Patnaik and other faculty members were also present on the occasion.

Contact no- 7735005979, What's app no- 9938687194

## Abstract :-

Research plays a vital role in creating new knowledge, developing new ideas, technologies and innovations for the progress of human being and society as a whole. But according to research insights database Scival India has only 140 researchers per 10,00,000 population, compared to 4,651 in the United states. For a student, taking up research as a career has several preconceived notions, the lack of awareness about research opportunities and the prejudice regarding research. The present paper examines the myth and reality in aspects of research and shows the reason why India is lagging behind research and the students preconceived notions and prejudice regarding research. Then using secondary data from various books, journals, articles and statistics the universal perspectives of research are presented and it attempts to encourage young aspiring minds towards inherent quest for research. Finally, this paper explain the real meaning, practical aspect and inherent way of research process. Specifically it gives an insight to student to choose research as a career.

## Keywords:-

Aspects, consistency, data, inquisitiveness, investigation, myth, research

## Introduction:-

Research as a process of creating new knowledge benefits the wellbeing of both individual and society as a whole. Research plays a vital role in increasing human knowledge, enrich science, generate progress, improve quality of life, promote innovation and share scientific findings with the public. Thus for the progress of society and development of new ideas, technologies and innovations there must be wide spread of research and development. Between 2017 and 2022 India's research output grew by about 54% according to research insights database sciVal. The

# "Research Methodolgy and Academic writing"

Prof.Biswajit Behera

Lecturer in Economics S.S.B Degree collage
.Mahakalapara.Kendarapara

Systematic search for an answer to question or a solutions to a problem is called .Research refers to acquiring new knowledge or adding someting new to the exsiting stock of knowledge,

According to kerlinger

"Research is a systematic, controlled ,empirical and critical investingation of hypothetical relations among ~~national~~ natural phenomena"

A research problem is a statement about an area of concern ,a difficulty to be solved or a question that exist in literature, in theory or in practise that needs to be understood and investigated it is one or more sentences indicating the goal ,purpose or overall direction of the study .

## Objectives of formulating Research problem

The main objective of formulating research problems are as fllows;

1-To make readers acquaintace with the topic being studided.

2-To determine the obiective and intention of the research .

3- To identify each and every step of the research process.

4- To provide the framework for reporting the results and indicates what is probably necessary to conduct the study &explain how the findings will present this information.

## Criteria for selection of a good research problem

In selecting a research problem ,one should take care of the following things,

1 .It should be original

# ACADEMIC RESEARCH :- A CAREER PROSPECTIVE

*Akshaya Kumar Mohanty*

*H.o.D. Economics*

This article reveals the secret behind academic success for the students. Some students consider academic success as being able to earn marks, all others are of the opinion that it entails successful career. But my view is, academic success is far beyond earning good marks, it is more of actualizing a positive outcome towards one's dream. We may quote Dr. A.P.J. Abdul Kalam "Dream is not that which you see while sleeping, it is something that does not let you sleep". Dreams are the seedlings of realities. To succeed in your mission, you must have single-minded devotion to your goal.

The creation of new knowledge by using the existing knowledge in a creative way so as to generate new concepts is research. A student must have a dream to create new ideas and innovations which are indispensable for the wellbeing of the society. Simply, research is searching for knowledge and searching for truth. Research has been defined in a number of different ways.

"In a formal sense, it is a systematic study of a problem attacked by a deliberately chosen strategy which starts with choosing an approach to preparing a design and acting upon it in terms of designing research hypothesis, choosing methods and techniques, searching or developing data collection tools, processing the data, interpretation and ends with presenting solutions of the problem" --- WIKIPEDIA

Hence the major steps in conducting research are

- Identification of research problem
- Literature review

## About the College :

Each and every institution has its own history. The history of **Derabis College** dates back to the year 1981 when some enlightened minds of this locality thought about the setting up a College in such a remote and underdeveloped area like Derabis with a mission and vision of providing a sphere of higher education. Their idea of establishing a centre of higher education has been a magical spirit for the then enterprising locals. Location of the College is quite convenient. Situated at the heart of Derabish, it is 03 Kms away from Chhata Chhak on NH-5(A), 07Kms from Cuttack Chandabali Road, 70Kms from Cuttack via Chandikhol and 55 Kms from Cuttack via Salipur.

## Vision & Mission :

To provide education in the best possible form for the students to be with all round personality development leading to a prosperous career with high sense of academic excellence.

To expand education and dissemination of knowledge to the denied and underprivileged sections of men and women in the Society.

To imbibe scientific temperament with human values in the minds, for the upliftment of men and women.

To inculcate the spirit of consciousness with regards to the constitutional rights and lead them to the interest of the National's mainstream.

The institutional logo comprises of three distinct dynamic features such as the temple, the burning lamp and the open book. It symbolizes that the College aims at imparting knowledge by dispelling darkness in a continuous process keeping in view of the glorious past, the dynamic present and the prosperous future.

## About the Place (Kendrapara) :

**Kendrapara District** is an administrative district Odisha state in eastern India. The town of Kendrapara is the district headquarters. **Derabis College** is just 7 kilometers from Kedrapara town. Kendrapara District is well known as the Tulasi Khetra. Epics unveil the fact that Lord Balram killed Kandrasura here, then he married his daughter Tulasi and settled here. Since then the place is known as Kendrapara.

### Places of Attraction

There are many prominent tourist places in Kendrapara District. One of the famous spot is 'Bhitara Kanika National Park'. Most popular Buddhist Shrines, **Udaya Giri** and **Ratna Giri** are just 20 km drive from **Derabish**, Kendrapara. **Sri Baldevjew Temple** is the most popular temple of the District, Aul **Raj Palace** in Aul, **Kanika Palace** is situated near Rajkanika town are prominent places of attraction.

## About the Programme: Subtheme

1. Meaning and Aspects of research
2. Writing a research proposal
3. Review of literature
4. Conceptualization of variables and measurement
5. Research problem
6. Research design, sampling, questionnaire, field research
7. Writing academic research papers
8. Publication process
9. Presentation of thesis, dissertation, project reports etc

## The objective of the Seminar is likely:

1. To explore and discuss about the quality of research related to actual practice in the field work.
2. Participants may discuss about awareness and opportunities in research, innovation and development.

Principal
DERABISH COLLEGE

## Call for Paper and guidelines:

Research papers are invited in the form of original works from the researchers, scholars and students. Medium of research paper can be in English only in MS word (Times Roman font size 12.5 having 1.5 spacing). Authors are requested to follow strictly the specification given below without which it would be very difficult for the selection of papers for publication. Submission of Abstracts and the research paper should be submitted with the following information and in this order:

1. Title of the abstract
2. Name and designation of Author
3. Institutional Affiliations
4. E-mail address
5. Mobile number
6. Body of Abstract
7. Keywords alphabetically

The abstracts should not exceed three hundred words and a full paper not more than three thousand words.
Authors are requested to kindly send the abstracts and full papers through E-mail ID.

## Important Dates & Participation Details:

1. Extended Abstract-20:02:24
2. Full Papers-22:02:24
3. Submit to the E-mail ID-derabishcollege@gmail.com

## Certificate and Publication:

**Certificate**: On successful completion of the conference, certificates will be given to all paper presenters in the valedictory function.

**Publication**: Selected papers will be submitted for publication in an edited volume.
